

TABLE OF CONTENTS

City of Palo Alto Emergency Water Supply and Storage Project

	<u>Page</u>
Acronyms and Abbreviations	v
S. Summary	S-1
Introduction	S-1
Project Description	S-1
Project Objectives	S-2
Role of the EIR	S-2
Summary of Impacts and Mitigations	S-2
Analysis of Alternatives to the Project	S-5
Secondary Effects of Growth.....	S-7
Cumulative Impacts.....	S-8
1. Introduction	1-1
Purpose of the EIR	1-1
CEQA EIR Process	1-1
Public and Agency Involvement	1-5
2. Project Description	2-1
Introduction	2-1
Project Background	2-1
Project Objectives	2-2
Project Description	2-5
Discretionary Approvals Required for the Project.....	2-48
3. Environmental Setting, Impacts, and Mitigation Measures	
3.1 Introduction.....	3.1-1
3.2 Land Use, Agricultural Resources, and Recreation	3.2-1
3.3 Visual Quality.....	3.3-1
3.4 Geology, Soils, and Seismicity	3.4-1
3.5 Hydrology and Water Quality.....	3.5-1
3.6 Biological Resources	3.6-1
3.7 Cultural Resources	3.7-1
3.8 Transportation and Traffic.....	3.8-1
3.9 Air Quality	3.9-1
3.10 Noise and Vibration	3.10-1
3.11 Hazards and Hazardous Materials	3.11-1
3.12 Public Services and Utilities.....	3.12-1

	<u>Page</u>
4. Cumulative Impacts	4-1
CEQA Analysis Requirements	4-1
Related Projects	4-1
Description of Cumulative Projects.....	4-8
Description of Cumulative Effects.....	4-10
5. Analysis of Alternatives	5-1
Introduction and Approach	5-1
Alternatives to the Project	5-3
Alternatives of the Project Reviewed, but No Longer Considered.....	5-16
Alternatives of the Project	5-21
6. Growth Inducement and Other Topics Required by CEQA	6-1
Growth Inducement Potential and Secondary Effects of Growth.....	6-1
Other Topics Required by CEQA	6-6
7. Report Preparers	7-1
Project Sponsor/Lead Agency.....	7-1
Technical Advisory	7-1
EIR Authors and Consultants	7-1

Appendices

A. Notice of Preparation and Scoping Letters.....	A-1
B. Special Status Species Considered for the City of Palo Alto Emergency Water Supply and Storage Project	B-1

List of Figures

S-1 Existing and Proposed City Wells, and Proposed Reservoir Sites	S-3
S-2 Emergency Supply Duration Criteria.....	S-4
2-1 City Water System Pressure Area Boundaries	2-3
2-2 Existing and Proposed City Wells, and Proposed Reservoir Sites	2-6
2-3 Proposed Eleanor Pardee Park Well Site	2-10
2-4 Proposed Library/Community Center Well Site	2-11
2-5 Proposed Heritage Park Well Location	2-12
2-6 Proposed Middlefield Well Site	2-14
2-7 Proposed California Avenue Parking Lot Well Sites	2-15
2-8 Proposed Downtown Parking Lot Well Sites.....	2-16
2-9 Conceptual New Emergency Well Cross Section	2-17
2-10 Preliminary Plan View of Proposed New Well Sites.....	2-18
2-11 El Camino Park Reservoir Development Area	2-27
2-12 El Camino Park – Typical Reservoir Construction Layout	2-29
2-13 Proposed Stanford Shopping Center North Reservoir	2-31
2-14 Stanford Shopping Center South Reservoir Site	2-33
2-15 Proposed Town and Country Reservoir.....	2-35
2-16 Mayfield Reservoir and Pump Station Upgrade Site.....	2-42
3.2-1 Project Area and Surroundings.....	3.2-2
3.3-1 Existing Hale Well Site.....	3.3-3
3.3-2 Existing Rinconada Park Well Site.....	3.3-4
3.3-3 Existing Fernando Well Site.....	3.3-6
3.3-4 Existing Peers Park Well Site	3.3-7

Page**List of Figures (cont.)**

3.3-5	Existing Matadero Well Site	3.3-9
3.3-6	Proposed Eleanor Pardee Well Site	3.3-10
3.3-7	Proposed Library / Community Center Well Site	3.3-12
3.3-8	Proposed Heritage Park Well Site	3.3-13
3.3-9	Proposed Middlefield Well Site	3.3-15
3.3-10	Proposed Downtown Parking Lot Well Sites	3.3-16
3.3-11	Proposed California Avenue Parking Lot Well Sites	3.3-18
3.3-12	Proposed El Camino Park Reservoir Site	3.3-19
3.3-13	Proposed Stanford Shopping Center North Reservoir Site	3.3-21
3.3-14	Proposed Stanford Shopping Center South Reservoir Site	3.3-22
3.3-15	Proposed Town & Country Shopping Center Reservoir Site	3.3-24
3.3-16	Existing Mayfield Pump Station Site	3.3-25
3.4-1	Principal Active Faults in the Project Vicinity	3.4-4
3.5-1	Historic Rainfall Trends for the San Jose Area	3.5-2
3.5-2	San Francisquito Creek Watershed and the Project Area	3.5-4
3.8-1	Palo Alto Roadway Network	3.8-2
3.8-2	Twenty-four Hour Traffic Volumes	3.8-3
3.8-3	Palo Alto Truck Routes	3.8-5
3.8-4	Existing Transit Facilities	3.8-6
3.8-5	Existing Bicycle Network	3.8-8
3.10-1	Effect of Noise on People	3.10-2
5-1	Existing Connections with Other Agencies, City of Palo Alto	5-4
5-2	Potential SCVWD Interconnection, City of Palo Alto	5-8
5-3	Potential Desalination Facility, City of Palo Alto	5-13
5-4	Potential Site Locations – Emergency Water Supply ECA	5-18

List of Tables

S-1	Summary of Impacts and Mitigation Measures for the City of Palo Alto Emergency Water Supply and Storage Project	S-9
1-1	Summary of Issues Raised on the Scope and Content of the Draft EIR	1-3
2-1	Capacity Available from Rehabilitated Wells	2-23
2-2	Summary of Potential Reservoir Locations	2-37
2-3	Summary of Reservoir Pipelines Construction Work Area	2-39
2-4	Operational Electrical Needs	2-48
2-5	Discretionary Permits Potentially Required	2-49
3.2-1	Emergency Water Supply and Storage Project Planning Designations	3.2-8
3.2-2	Summary of Potential Land Use, Agricultural Resource, and Recreation Impacts	3.2-12
3.2-3	Summary of Applicable Mitigation Measures – Impact 3.2-1 through 3.2-3	3.2-13
3.3-1	Summary of Potential Visual Quality Impacts	3.3-30
3.3-2	Summary of Applicable Mitigation Measures – Impact 3.3-1 through 3.3-2	3.3-31
3.4-1	Active Faults in the Project Vicinity	3.4-5
3.4-2	Modified Mercalli Intensity Scale	3.4-7
3.4-3	Summary of Potential Geology, Soils, and Seismicity Impacts	3.4-12
3.4-4	Summary of Applicable Mitigation Measures – Impact 3.4-1 through 3.4-3	3.4-13
3.4-5	Summary of Liquefaction Potential	3.4-14

List of Tables (cont.)

3.4-6	Summary of Potential Expansive Soils	3.4-15
3.5-1	Santa Clara Basin.....	3.5-8
3.5-2	Definitions of Beneficial Uses of Surface Waters.....	3.5-9
3.5-3	2002 CWA Section 303(d) List of Water Quality Limited Segments	3.5-9
3.5-4	Summary of Potential Hydrology and Water Quality Impacts	3.5-14
3.5-5	Summary of Applicable Mitigation Measures – Impact 3.5-1 through 3.5-7.....	3.5-15
3.5-6	Water Level Response 1988 Groundwater Pumpage.....	3.5-19
3.6-1	Plant Communities and Wildlife Habitats within and Adjacent to the Project Sites	3.6-2
3.6-2	Special Status Species with Potential to Occur within the Project Vicinity.	3.6-10
3.6-3	Summary of Potential Biological Resources Impacts.....	3.6-23
3.6-4	Summary of Applicable Mitigation Measures – Impacts 3.6-1 through 3.6-4	3.6-24
3.7-1	Examples of Prehistoric Sites in the San Franciquito Creek Vicinity.....	3.7-5
3.7-2	Summary of Potential Cultural Resource Impacts	3.7-11
3.7-3	Summary of Applicable Mitigation Measures – Impacts 3.7-1 through 3.7-3	3.7-12
3.8-1	Summary of Potential Transportation and Traffic Impacts	3.8-12
3.8-2	Summary of Applicable Mitigation Measures – Impacts 3.8-1 through 3.8-6	3.8-13
3.9-1	Air Quality Data Summary for the Proposed Project Area	3.9-3
3.9-2	State and National Criteria Air Pollutant Standards, Effects, and Sources ..	3.9-5
3.9-3	Summary of Potential Air Quality Impacts	3.9-8
3.9-4	Summary of Applicable Mitigation Measures – Impacts 3.9-1 through 3.9-3	3.9-9
3.10-1	Noise Levels in the Vicinity of the Proposed Project Sites.....	3.10-4
3.10-2	Summary of Potential Noise Impacts.....	3.10-9
3.10-3	Summary of Applicable Mitigation Measures – Impacts 3.10-1 through 3.10-3	3.10-10
3.10-4	Typical Noise Levels from Construction Equipment.....	3.10-11
3.10-5	Short Term Construction Noise Levels with and without Mitigation	3.10-13
3.11-1	Summary of Potential Hazards and Hazardous Waste Impacts	3.11-9
3.11-2	Summary of Applicable Mitigation Measures – Impacts 3.11-1 through 3.11-6	3.11-10
3.11-3	Schools in the Project Vicinity.....	3.11-14
3.12-1	Summary of Potential Public Services and Utilities Impacts	3.12-6
3.12-2	Summary of Applicable Mitigation Measures – Impacts 3.12-1 through 3.12-3	3.12-7
4-1	Planned and Approved Projects in the Project Vicinity	4-3
5-1	Existing Intertie Capacity Emergency Water Supply Alternatives Analysis.....	5-5
5-2	Desalination Options – Facilities Required Emergency Water Supply Alternatives Analysis	5-11
5-3	Estimated Desalination Costs Emergency Water Supply Alternatives Analysis	5-15
5-4	Alternatives Comparison – Project Objectives and Selected Environmental Constraints	5-17
5-5	Reservoir Site Comparison – Key Impact Issues Areas	5-22
6-1	Agencies Having Authority to Implement Major Mitigation Measures for Growth-Related Impacts.....	6-5
