

RESIDENTIAL GREEN POWER ELECTRIC SERVICE

UTILITY RATE SCHEDULE E-1-G

A. APPLICABILITY:

This schedule applies to separately metered single-family residential dwellings receiving retail energy services from the City of Palo Alto Utilities under the Palo Alto Green plan. Palo Alto Green provides for the purchase of enough renewable energy credits (RECs) to match 100% of the energy usage at the premises every month. These REC purchases support the production of renewable energy, increase the financial value of power from renewal sources, and create a transparent and sustainable market that encourages new development of wind and solar power.

This rate schedule applies everywhere the City of Palo Alto provides electric service.
