

LARGE COMMERCIAL GREEN POWER ELECTRIC SERVICE

UTILITY RATE SCHEDULE E-7-G

A. APPLICABILITY:

This schedule applies to demand metered service for large commercial customers who choose service under the Palo Alto Green plan. A customer may qualify for this rate schedule if the customer's maximum demand is at least 1,000KW per month per site, who have sustained this demand level at least 3 consecutive months during the last twelve months

B. TERRITORY:

The rate schedule applies everywhere the City of Palo Alto provides electric service.

C. UNBUNDLED RATES:

(1000 kWh block option):

	<u>Commodity</u>	<u>Distribution</u>	<u>Public Benefits</u>	<u>Total</u>
<u>Summer Period</u>				
Demand Charge (per kW)	\$6.42	\$12.55		\$18.97
Energy Charge (per kWh)	0.05562	0.01825	0.00321	0.07808
Palo Alto Green Charge (per 1000 kWh block)				15.00
<u>Winter Period</u>				
Demand Charge (per kW)	\$5.50	\$6.04		\$11.54
Energy Charge (per kWh)	0.04990	0.01898	0.00321	0.07209
Palo Alto Green Charge (per 1000 kWh block)				15.00

(100% renewable green option):

	<u>Commodity</u>	<u>Distribution</u>	<u>Public Benefits</u>	<u>Palo Alto Green</u>	<u>Total</u>
<u>Summer Period</u>					
Demand Charge (per kW)	\$6.42	\$12.55			\$18.97
Energy Charge (per kWh)	0.05562	0.01825	0.00321	0.0150	0.09308
<u>Winter Period</u>					
Demand Charge (per kW)	\$5.50	\$6.04			\$11.54
Energy Charge (per kWh)	0.04990	0.01898	0.00321	0.0150	0.08709

CITY OF PALO ALTO UTILITIES

Issued by the City Council

CITY OF PALO ALTO
UTILITIES

LARGE COMMERCIAL GREEN POWER ELECTRIC SERVICE

UTILITY RATE SCHEDULE E-7-G

D. SPECIAL NOTES:

1. Calculation of Charges

The actual bill amount is calculated based on the applicable rates in Section C above and adjusted for any applicable discounts, surcharges and/or taxes. On a customer's bill statement, the bill amount may be broken down into appropriate components as calculated under Section C.

2. Seasonal Rate Changes

The Summer Period is effective May 1 to October 31 and the Winter Period is effective from November 1 to April 30. When the billing period includes use both in the Summer and the Winter Periods, the usage will be prorated based on the number of days in each seasonal period, and the charges based on the applicable rates therein. For further discussion of bill calculation and proration, refer to Rule and Regulation 11.

3. Maximum Demand Meter

Whenever the monthly use of energy has exceeded 8,000 kilowatt-hours for three consecutive months, a maximum demand meter will be installed as promptly as is practicable and thereafter continued in service until the monthly use of energy has dropped below 6,000 kilowatt-hours for twelve consecutive months, whereupon, at the option of the City, it may be removed.

The maximum demand in any month will be the maximum average power in kilowatts taken during any 15-minute interval in the month provided that in case the load is intermittent or subject to violent fluctuations, the City may use a 5-minute interval. A thermal-type demand meter which does not reset after a definite time interval may be used at the City's option.

The billing demand to be used in computing charges under this schedule will be the actual maximum demand in kilowatts for the current month. An exception is that the billing demand for customers with Thermal Energy Storage (TES) will be based upon the actual maximum demand of such customers between the hours of noon and 6 PM on weekdays.

LARGE COMMERCIAL GREEN POWER ELECTRIC SERVICE

UTILITY RATE SCHEDULE E-7-G

4. Request for Service

Qualifying customers may request service under this schedule for more than one account or one meter if the accounts are at one site. A site shall be defined as one or more utility accounts serving contiguous parcels of land with no intervening public right-of-ways (e.g. streets) and have a common billing address.

5. Power Factor

For new or existing customers whose demand is expected to exceed or has exceeded 300 kilowatts for three consecutive months, the City has the option of installing applicable metering to calculate a power factor. The City may remove such metering from the service of a customer whose demand has dropped below 200 kilowatts for four consecutive months.

When such metering is installed, the monthly electric bill shall include a “power factor penalty”, if applicable. The penalty adjustment shall be applied to a customer’s bill prior to the computation of any primary voltage discount. The power factor penalty is applied by increasing the total energy and demand charges for any month by 0.25 percent or (1/4) for each one percent (1%) that the monthly power factor of the customer’s load was less than 95%.

The monthly power factor is the average power factor based on the ratio of kilowatt-hours to kilovolt-ampere hours consumed during the month. Where time-of-day metering is installed, the monthly power factor shall be the power factor coincident with the customer's maximum demand.

6. Changing Rate Schedules

Customers may request a rate schedule change at any time to any applicable full service rate schedule as is applicable to their kilowatt-demand and kilowatt-hour usage profile

UTILITY RATE SCHEDULE E-7-G

7. **Palo Alto Green Participation**

Customers choosing to participate shall fill out a Palo Alto Green Power Program application provided by the Customer Service Center. Customers may request at any time, in writing, a change to the number of blocks they wish to purchase under the Palo Alto Green plan.

Palo Alto Green provides for either the purchase of enough renewable energy credits (RECs) to match 100% of the energy usage at the facility every month, or for the purchase of 1000 kilowatt-hour (kWh) blocks. These REC purchases support the production of renewable energy, increase the financial value of power from renewal sources, and creates a transparent and sustainable market that encourages new development of wind and solar.

8. **Primary Voltage Discount**

Where delivery is made at the same voltage as that of the line from which the service is supplied, a discount of 2 1/2 percent for available line voltages above 2 kilovolts will be allowed; provided, however, the City is not required to supply service at a qualified line voltage where it has, or will install, ample facilities for supplying at another voltage equally or better suited to the customer's electrical requirements. The City retains the right to change its line voltage at any time after providing reasonable advance notice to any customer receiving a discount hereunder and affected by such change. The customer then has the option to change the system so as to receive service at the new line voltage or to accept service (without voltage discount) through transformers to be supplied by the City subject to a maximum kilovolt-ampere size limitation.

{End}
