

DID YOU KNOW

Every glass of water brought to your table in a restaurant may require up to another two glasses of water to wash and rinse the glass. Since nearly 70 million meals are served each day in U.S. restaurants, we could possibly save more than 26 million gallons of water if only one person in four declined the complimentary glassful.

THANK YOU!

Please ask for
water only if you
plan to drink
it and help
Palo Alto with
its water
conservation
efforts.

We're all in this together!
