The purpose of the Community Forum is to provide citizens with an informational exchange on the topic of aircraft noise and its impact on the community. Various community noise groups are invited to attend and to give presentations related to their research and activities and on the aircraft noise topic.

A Community Forum provides the opportunity for the public to gather information from various opinions and perspectives on a designated topic. In the spirit of productive community engagement, respectful comments, questions and listening to various points of view are required. This Forum is intended to frame issues and engage participants in the sharing of information.

Thank you for attending
