<td>If housing for families is included what about a neighborhood school so elementary kids don’t have to cross El Camino. Also: this entire survey seems kind of ridiculous. What difference can it possibly make what kind of architectural structures the random group of people filling out this survey prefer? What can possibly be gained from that information? The Council put together a NV community task force. Where is the report and recommendations from that group? Who is proposing these three alternatives? And does any of this matter when the property is privately owned? With a 10-30 year window, most of the people filling out this survey will probably be dead or have moved. I feel like this is a waste of time just so the staff and politicians can say there was public input. And, no, I’m not grumpy because of shelter-in-place. I have participated in many community meetings and conversations on this topic and I do not feel that this survey serves any useful purpose.</td>

<td>The City supported designs are not what the neighbors or many residents of PA want. They are contrived to suit the planning Depts ideas; just as Ciberlywas. The residents have been very clear on what is desired but Mr Lait and crew will NOT listen. Historical preservation of this unique site can be accomplished along with other goals. there is an excellent and diverse working group in place; why won’t the city listen to them?The current plans as submitted will further negatively impact the Ventura community. The City consultants do not live here and should be fired immediately.g</td>

Yes, I do. We should reduce traffic, substantially reduce non-community-serving offices, eliminate parking problems, and create true below-market rate housing and community amenities. The proposals in this survey don't achieve that. Frankly, this entire survey is extremely one-sided and biased. In the past, the city has endeavored to run properly-balanced surveys using scientific sampling, citing arguments from various sides. This survey falls far short of that prior standard of competence. The survey also contains all sorts of false information and errors. For example, comparing the Existing Uses and Alternative 1 makes it look like the latter will add retail to the Fry's site. That's untrue. The survey also seems to have no input from the majority of members of the very committee the City created to help review North Ventura. Small wonder we residents believe that the city's development staff are completely out of touch with the public they're supposed to serve.

24  City should bring in diverse housing in all areas, downtown, midtown, and everywhere. Its not ok to just make one area available for diverse housing while others are not.

25  Wider sidewalks along Park Blvd. Setbacks similar to Cloudera building. Remove parking along Park Blvd to facilitate safer bicycle and pedestrian traverse. In the big picture, none of these proposals is what the community wants. The proposals overrun Ventura with density, traffic, congestion, and more commercial development while not providing housing for our neediest as well as forgoing community amenities such as adequate parkland and other livability standards. My understanding is that the NVCAP working group has not been provided an opportunity to discuss these proposals, nor to present their own designs to the community. The community should have a chance to review the proposals of the working group rather than being forced to choose among three flawed proposals foisted on it. Please allow the working group to do its job.

28  I feel we have a great opportunity to have a high-density, more inclusive plan. Sustainability (GHG reduction) and equity are the top priorities

30  don't make congestion any worse!

31  This survey is ill-designed (ask me) and manipulative. The proposals are the work of people who worship at the alters of "growth" and density. They will result in substantial degradation of life here in Palo Alto and beyond. The working group has been trivialized. Palo Altans are being given a choice of tortures and asked to select. I refuse to be cynical. We can do better.

32  Consider many diverse types of housing - townhome/flats, small scale apartments, midrise apartments. The existing context is pretty ramshackle -let's make this neighborhood something we are proud of, not a haphazard collection of industrial and post WWII bldgs. Let's have a neighborhood we can be proud of. While we can certainly acknowledge the history here, we don't need to preserve the cannery or all the existing structures.

33  This is *the* key site for housing in the city of palo alto; we need to seize it.

34  I have attended some meetings and looked at the alternatives. It would appear office space is a priority, but residents don't want offices here. There is no reason that all of the priorities and goals mentioned above are mutually exclusive. I don't get this process; why invest the time and effort to set up these NVCAPs and then not listen to the members? The 14 citizens on the panel seem to feel their input is unrepresented by these alternatives and the alternatives are outside muni code and land use parameters.

35  None of these proposals are what the community wants. The proposals overrun Ventura with density, traffic, congestion, and more commercial development while not providing housing for

39 provides adequate parking 4/16/2020 10:46 PM

40 None of these proposals reflects my hope for this area. Each exceeds the maximum density allowed per current zoning and Palo Alto's current housing allocation/need. With COVID-19 proving to spread most severely in the densest settings, we need less density, not more. We need high-quality, less dense housing for our most deserving workers with large, attractive parks and shops. These proposals are not the working group's. The process has been hijacked. The community needs more input starting with through the working group. Do not allow Sobrato to dictate that the City or neighbors must pay to preserve their desired hefty profit margin. Eminent domain and other tools, such as partnering large tech companies, exist to do justice to this opportunity. Preserving the dilapidated cannery structure would be a huge mistake. We can honor the history with a nice plaque and open plaza. The space is too badly needed for modern housing and other resident needs. Blight does not make right. 4/16/2020 8:35 PM

44 None of these proposals are what the community wants nor do they reflect the intention of the majority of the NVCAP working group. The working group has not even been allowed to discuss the proposals and yet these proposals are misleadingly attributed to them. The proposals overrun Ventura with density, traffic, congestion, and more commercial development while not providing housing for our neediest as well as forgoing community amenities such as adequate parkland and other livability standards. <td>High traffic arterials are dangerous for crossing and walking, esp for those who use wheelchairs or elderly people. The higher density should be protected from El Camino smog and speeding. Plus El Camino is unattractive and stuck in the 1950s. It's an ugly street that feels like a freeway slicing town I half when I visit. This should be a dense tree lined boulevard with a protected bike lane and wide sidewalks of at least 20 feet like in Berlin.</td>

<td>Need to have enough parking to draw people in and allow the businesses to thrive. Example: Coupa Cafe that just opened in Mountain View in a fancy new building with parking underground has fewer than 40 spots. There’s almost never a space open. How can they stay in business? There’s nowhere nearby to park and walk. You need ample parking for tenants and people frequenting the businesses. You need businesses that can actually stay afloat. Small markets, as much as we like that idea, just can't compete with Mollie Stones, Piazza’s, Whole Foods, Costco, Safeway, Sprouts. Look at the local failures before doing that again. What kinds of businesses will attract people there, and how many? What will it take to allow owners to be able to afford the rent? 18. Byke and foot bridge over Page Mill Rd at Ash Street and improved pedestrian access at Park St over Page Mill Dr.  

19. the more stories the better; sprawl is the biggest problem  

20. 2-3 story max height limit  

21. NO SINGLE FAMILY HOMES!! Dense, affordable housing  

22. Possible some cottage clusters or duplex/quadplex  

23. I believe this is the best place to ‘go big’. We rarely get this much land to plan and we need to be very forward thinking about the use of the land. The Redwood City Downtown Master Plan is a good example of planning that encouraged height without significant impact to existing uses.  

24. 2 story town homes to transition from existing Ventura residential.  

25. The townhomes in Arbor Real are nice.  

26. Disagree with the entire question. Typologies are incomplete as discussed here.  

27. I visit PA for shopping and to see friends and arrival feels anticlimactic because of old buildings and wide arterials. There are too many non lively single family hoods already. This should be modern, walkable, with the more height and design experimentation so visitors can take unique photos to share with the world that PA does new things and looks like it too!  

28. 20+ story buildings on el Camino  

29. Why these extreme examples - big and small? How about some housing in Fry's building? BMR housing needs emphasis.  

30. High-rise apartment complexes to maximize housing wherever possible  

31. Re-work the streets a bit to leave an Open Community Square (like in a Euro city).  

32. 10 story would work on el camino  

33. Higher density options would be fine here.  

34. 8-Story Mid-Rise Block with Ground-Floor Retail would be the best of both worlds for walkable streets  

35. N/A  

36. Whatever gets the most housing built sounds awesome to me.  

37. 10-story blocks would provide more housing  

38. Would be nice if actual high-rises were presented as options.  

39. Could go taller than 8 stories, especially if it led to more open space. I would rather have more open space and more density if it meant less “massing” -- my goal is to have a vibrant community, which means people + retail + public life; that can come in many combinations.  

40. More mixed use of all types, and less parking  

41. 2 story max  

42. Convert Fry’s building into low-income rental housing. Housing over neighborhood serving retail where CS zoning it.
Q15 A number of non-traditional housing ideas have been suggested by Working Group and community members. Please indicate your preferences for these housing types.

31  neighborliness, economy, simplicity, communality  4/12/2020 4:16 PM
32  Whoa, a bad rendition of Dutch architecture. It's ugly and not dense enough.  4/12/2020 3:44 PM
33  I like the compactness  4/12/2020 2:44 PM
34  Beams create a rhythm, a sense of style that helps me know where I am and also a sense that the property is one. I feel safe with this structure above. This would be a great way to recycle fallen trees and other materials and repurpose them for artistic accents like this.  4/12/2020 2:38 PM
35  Ugly Too dense one parking spot is not enough  4/12/2020 2:27 PM
36  Very Urban look - all surfaces, no nature allowed.  4/12/2020 1:41 PM
37  Not dense enough  4/12/2020 1:21 PM
38  Too much concrete, doesn't look inviting  4/12/2020 12:51 PM
39  Dislike front entrance with wood fence, small windows, architecture  4/12/2020 11:50 AM
40  The redwood accents add much-needed warmth, especially if the gray surfaces were replaced with an earthier tone.  4/12/2020 11:05 AM
41  the density is too low and the common and private spaces are too intermingled.  4/12/2020 10:06 AM
42  Architecturally interesting.  4/12/2020 9:54 AM
43  Feels too generic as these repeat, but also, no windows. Feels less private to be built like this than to have apartments. That said, nice enough.  4/11/2020 10:23 PM
44  Fine, but the outdoor space seems a little silly. Too uniform. Not big enough windows nor privacy from neighbors in this layout. English mews have more character. Needs to be more near retail and density for vibrance.  4/11/2020 5:34 PM
45  Too sterile.  4/10/2020 8:23 PM
46  ugly and anti-social  4/10/2020 8:14 PM

It has a roof garden/terrace/safe walking space for toddlers or babies in strollers with interesting plantings that create separate outdoor room spaces that allow for smaller or larger groups of people to be. This photo above is nice yet too exposed as a public space for people to have intimate conversations or relax without being watched. intersection, and much too much traffic for Park. Also, this is wishful thinking. The fact is retail in Palo Alto struggles. Also, we want to support existing retail on Cal Ave not add to its competition. In addition, the reality is that it will be difficult to find tenants who can afford the space succeed in a location with a limited customer base.
