Speaker Series #3
Planning for Sustainable Development

Sustainable Mobility

Ten Easy Steps to Ease Congestion, Earn Money, and Solve Global Climate Change

This is the third in a series of presentations sponsored by the Palo Alto Department of Planning & Community Environment to provide insight and guidance for preparing the Comprehensive Plan amendment.

Jeffrey Tumlin, Principal and Multimodal/Transit Oriented Development Practice Leader at Nelson/Nygaard in San Francisco, will discuss how transportation should support individual and collective goals by striking a balance between mobility and accessibility transportation objectives. Mr. Tumlin will describe how our transportation decisions have serious implications on our efforts to curb global warming and discuss ten steps that could make a significant impact in reducing CO2 emissions and achieve green mobility.

The City Council, Boards, and Commissions and the public are encouraged to attend.

Jeffrey Tumlin
Principal, Nelson/Nygaard Consulting Associates Inc.

Jeffrey Tumlin is an expert with 17 years of experience in multimodal transportation planning, with an emphasis in minimizing the impacts of growth, and is the co-author of BART’s Station Access Guidelines and Transit Oriented Development Guidelines. He has managed Transit Oriented Development projects and station area plans for four dozen rail station areas, Transportation Master Plans for downtowns and cities, Transportation Management Plans for major projects, and Parking Management Strategies for multiple jurisdictions. He is also the recipient of the City of Palo Alto’s “Consultant of the Year” award in 2000 and was instrumental in the development of Stanford’s Office Transportation Programs’ innovative transportation management strategies.
