Recommendation
Staff recommends that Council authorize the City Manager or designee to execute a contract with Cal-West Signal and Lighting, in the amount of $150,000, for on-call traffic signal construction support services.

Executive Summary
The City operates and maintains approximately 99 signalized intersections throughout the City. This contract provides construction support for functions outside of the capacity of City services including: the construction of foundations for traffic signal cabinets and poles; installation of underground conduit facilities; installation of electrical facilities such as vehicle speed feedback signs and video detection systems; and additional on-call services. This contract may be extended twice, each extension for either an additional $150,000 or additional one-year time period.

Background
On February 8, 2011, the City released a Request for Proposals for On-Call Traffic Signal Support Services. Three proposals were received in response to the RFP. The proposals were reviewed by staff from the Utilities Department and the Transportation Division of the Department of Planning and Community Environment. Cal-West Signal & Lighting was selected as the preferred contractor for this project based on experience in offering similar service with other local agencies around the San Francisco Bay Area and because they best fit the selection criteria identified within the RPF by the review committee including their ability to provide immediate response support, equipment inventory, and reference checks.

The City currently does not have an On-Call Traffic Signal Support Services contractor. Staff from the Utilities Department provides both regular maintenance functions for traffic signals and special project support on an as needed basis and when maintenance functions allow.
Special projects that cannot be implemented by City staff are competitively bid on an as-needed basis per project. Having an on-call contractor will provide a more streamlined process for the City to implement special project improvements and allow the City to focus its resources on regular maintenance functions.

**Discussion**

The proposed project includes providing on-call support services to help advance special projects such as the installation of video detection systems to help better optimize traffic signal operations, installation of new traffic signal field equipment such as traffic signal cabinet and pole standards, installation of vehicle speed feedback signs to encourage speed reductions along arterial streets, and the installation of enhanced pedestrian crosswalk facilities.

Cal-West is familiar with the traffic signal standards of the City having helped with the installation of facilities along Arastradero Road and Alma Streets.
**Timeline**
This project provides on-on-call support services through the current and new FY2011-12. The project may be extended twice for either an increase in funding in an amount equal to the initial contract value each time or for a time extension equal to one year each time.

**Resource Impact**
This project is funded through the Capital Improvement Program (CIP) through the PL-05030 Traffic Signal Upgrades project. The project will allow City staff to focus its efforts on regular traffic signal maintenance functions.

**Policy Implications**
This project is consistent with the following Comprehensive Plan Goals and associated Policies and Programs: Goal T-4 (An Efficient Roadway Network for All Users) and Goal T-6 (A High Level of Safety for Motorists, Pedestrians, and Bicyclists on Palo Alto Streets).

**Environmental Review**
Typical improvements through this project are maintenance functions that qualify for categorical exemption from CEQA. No environmental review is required for award of the contract.
