No quorum, but we had a good discussion about October 3 CCAC meeting. We think that a simpler document focusing on the big picture rather than the detail would be useful for future presentations. Providing lots of detail at this point encourages listeners to focus on details rather than on the big picture. We all agreed that with our expertise and time constraints it is not manageable to do the detailed work that needs to be done to decide on more than a broad vision for Cubberley. The detailed documents we created about currently existing services and where they are offered can be saved on the web for reference and will serve as a valuable starting point for future professional consultants and/or committees trying to gather the necessary details if the community decides to pursue building a community facility at Cubberley. We will focus on the broad strokes needed to make recommendations to the City and School District about the next steps for Cubberley.
