GSI	Moss	Pam Boyle Rodriguez?	We received the major accomplishment, the Green Stormwater Infrastructure Implementation Plan, looking out many years. We need to get them on the agenda to review it. Urban Forest is impacted because some street trees could be compromised by some of the GSI Features, and are also in now very compacted soil. A balance needs to be struck. When trees die, uncompact the soil and put in bioretention features. Cisterns and other features are planned for parks. Share their budget when we redo a park. Teach city staff, neighbors, and Grassroots to maintain GSI features. April 11th program and tour of pilot GSI in Southgate neighborhood near Peers Park. shared interest with PRC: creek "boom" cleanups, Buckeye Creek, Dewatering impact, San Francisquio Creek Phase II.
