Call to Order / Roll Call
Approximately 6:02 pm

Madina Klicheva, Administrative Assistant, conducted the roll call and announced that there is a quorum present.

1. Adoption of a Resolution Authorizing Use of Teleconferencing for Planning and Transportation Commission Meetings During Covid-19 State of Emergency

MOTION
Chair Hechtman introduced the item and stated that the item will need to be adopted monthly until the Commission begins in-person meetings. He moved the adoption of the resolution.

SECOND
Vice-Chair Roohparvar seconded

VOTE
Madina Klicheva, Administrative Assistant, conducted a roll call vote and announced that the motion passed 7-0.

MOTION PASSED 7-0 (Ayes: Alcheck, Chang, Lauing, Hechtman, Roohparvar, Summa, Templeton)

Commission Action: Motion by Hechtman, seconded by Roohparvar. Pass 7-0

Oral Communications
The public may speak to any item not on the agenda. Three (3) minutes per speaker.¹

Chair Hechtman invited members of the public to speak on items, not on the agenda.

---

¹. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
². Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
³. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Madina Klicheva, Administrative Assistant, announced that there are no speakers for oral communications.

**Agenda Changes, Additions and Deletions**

The Chair or Commission majority may modify the agenda order to improve meeting management.

Chair Hechtman called for any agenda changes, additions and deletions.

Rachael Tanner, Assistant Director, reported that Staff has no proposed changes to the agenda.

**City Official Reports**

2. Directors Report, Meeting Schedule and Assignments

Rachael Tanner, Assistant Director, reported that at the last City Council meeting, the Council adopted an Interim Urgency Ordinance to integrate Senate Bill (SB)9 into the Palo Alto Municipal Code (PAMC). Also, Council made a Motion of Intent to adopt an Interim Ordinance that contained additional updates to integrate SB478 into the PAMC. Staff will be bringing both ordinances to the Planning and Transportation Commission (PTC) for review in January 2022. In their coming meeting, Council will be appointing new Commissioners to the PTC and the new Members will be joining the Commission in the year 2022. At the end of November, Council heard the tenant protection item, and Council directed Staff to continue work on most of the topics that PTC recommended. In January 2022, Staff will be presenting ordinances for various tenant protections to the PTC. Council was still discussing when Commissions and Boards will resume in-person meetings. Staff predicted it the Commission will hold in-person meetings in January or February of 2022. Council has held several hybrid meetings and they were successful. Lastly, the Sustainability Climate Action Plan (S/CAP) Ad Hoc Committee will hold a meeting to discuss how land use and transportation can be used to reduce the City’s greenhouse gas emissions.

Commissioner Summa reminded the Commission that public speakers are allowed to speak up to 5-minutes during public comment for action items and that time can be reduced to 3-minutes at the discretion of the Chair. The agenda has an error and she requested that Staff fix that for future meetings.

Vice-Chair Roohparvar inquired how the City’s 1990 greenhouse gas emission levels compare to present times. Sylvia Star-Lack, Transportation Manager, answered that the City currently is less than 1990 greenhouse gas emission levels due to the utility moving to green clean power.

**Action Items**

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Public Comment is Permitted. Applicants/Appellant Teams: Fifteen (15) minutes, plus three (3) minutes rebuttal.
All others: Five (5) minutes per speaker.2,3

3. Review Programs of the Implementation Chapter of the Comprehensive Plan and Recommend Modifications or Additions

Chitra Moitra, Planner, stated that the goal of the presentation is to have Planning and Transportation Commission (PTC) review the programs of the Implementation Chapter of the Comprehensive Plan and recommend modifications or additions as necessary for City Council to consider. Section 65400 of the State mandated Government Code requires the City to submit an annual report by April 1st to the Office of Planning and Research (OPR) and the Department of Housing and Community Development (HCD). Section 19.04.030 of the Palo Alto Municipal Code (PAMC) requires PTC annual review of the Implementation Chapter and recommend any revisions for Council consideration. Due to prior PTC members commenting that one meeting with PTC is not enough time for PTC members to suggest changes to the Implementation Chapter. Staff included a second meeting in the process in the fall of each year to allow PTC another chance to review the status. PTC will be reviewing the Housing Element’s policy and programs at their February review along with the Comprehensive Plan policies and programs. The Implementation Chapter contained 410 programs with the Natural Environment Element housing the majority of those with 109 programs. Staff has added an additional column to the implementation table format that shows the status of each program. For the year 2021, eight Comprehensive Plan programs have been completed, 31 programs were partially complete, 276 were ongoing and 95 were pending. Of the 410 programs, 72 have been completed in the last 4-years, which equated to roughly 18 percent completion. Many of the programs that were completed in previous years have transitioned into ongoing programs. Next steps included Staff returning to PTC in February of 2022 with any updates or changes that the Commissioners have suggested and then the item will be presented to City Council in March of 2022.

Chair Hechtman invited Commissioners to ask clarifying questions of Staff.

Commissioner Lauing asked if the City is on track with its accomplishments.

Ms. Moitra remarked that the Comprehensive Plan goes to the year 2030 and so 20 percent it is modest progress.

Commissioner Chang inquired of the 100 programs that have been designated as short-term programs, how many of those have been completed.

Ms. Moitra could not recall the specific number. She mentioned that the programs that have been completed have not followed the specific timing as defined for short-term, medium-term, and long-term.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Commissioner Chang appreciated that answer because she wanted to understand why several medium-term programs have been completed before short-term programs. She understood that programs deemed as short-term were higher priority programs.

Ms. Moitra explained that programs that receive funding move up the list of priorities.

Clare Campbell, Long Range Planning Manager, added that if Commissioners have questions about specific programs. To share those with Staff and Staff can follow up with the different departments.

Commissioner Chang mentioned that renter protections were not considered to be a short-term item and was started over several other planning-related short-term programs.

Ms. Campbell confirmed that the City was able to obtain a Fellow through the Challenge Grant Fellowship who helped Staff with the renter protection program. That additional resource helped Staff move the renter protection program along quickly.

Commissioner Alcheck inquired if the spreadsheet in the Staff Report is what is submitted to the various federal departments.

Ms. Moitra answered yes.

Commissioner Alcheck pointed out the sentence on the bottom of Packet Page 13 that read “the status should include progress in meeting its share of regional housing needs and local efforts to remove governmental constraints”. He requested an explanation of what that sentence means.

Ms. Moitra predicted that the sentence is a remnant carried over from the previous year’s report.

Commissioner Alcheck restated if the review includes a discussion of meeting the Regional Housing Needs Allocation (RHNA).

Ms. Moitra restated that the housing programs will come to PTC in February 2022.

Ms. Campbell confirmed that is correct and the housing programs will be incorporated into the full annual reporting.

Commissioner Alcheck asked if the report is an opportunity to give Palo Alto leadership an update on how the City is meeting its goals; or if the report is a public relations effort to keep the community aware of the status of the City’s progress.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Moitra answered that the report covers both aspects because it is a status report and it does show Palo Alto leadership what has been accomplished.

Ms. Campbell noted that the primary purpose of the report is to accomplish the annual reporting that is required by April 1st. The information in the report can be viewed as a status report, but that is not Staff’s intent.

Commissioner Alcheck commented that when the programs are viewed together broadly, it is easy to become consumed in the details of each program’s success. The report is an opportunity to show Palo Alto leadership truthfully how the City is progressing through the various programs. One of the challenges that folks have is understanding the gap between the Comprehensive Plan statement and the action that has to happen at City Council to empower items to occur. He shared that it would be interesting to understand from Staff what local efforts would be required to remove governmental constraints to meet the RHNA. He encouraged Staff to provide more information on what PTC and Council can do to achieve faster success for each program.

Chair Hechtman requested that Commissioner Alcheck hold his comments until the discussion portion of the item.

Commissioner Alcheck agreed to hold his comments.

Commissioner Summa asked what happens when there is a program that is no longer consistent with how the City wants to proceed.

Ms. Campbell confirmed that the City can make amendments to the Comprehensive Plan as needed.

Albert Yang, Assistant City Attorney, confirmed that the City did amend the policy of not allowing housing sites on San Antonio, but that change is not reflected in the status report.

Commissioner Summa understood that the City had abandoned the program regarding underground utilities.

Ms. Campbell disclosed that Staff does not know the status of that particular program.

Ms. Moitra indicated that she would follow up with department Staff.

Chair Hechtman invited public comment.

Madina Klicheva, Administrative Assistant, called on Cindy Chan.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Cindy Chan begins her comments regarding Castilleja School.

Chair Hechtman requested that Ms. Chan hold her comments until the Castilleja item is heard.

Ms. Chan apologized and confirmed she would hold her comments until later in the meeting.

Chair Hechtman closed public comment and brought the item back to the Commission for discussion.

Commissioner Alcheck wanted to see a process where the City can take specific actions to empower Staff to be able to move forward with specific programs. Housing is a high priority in the community and it would be helpful to understand the governmental constraints that are holding the various housing programs back.

Commissioner Chang commented that there is a self-imposed deadline that the City has to complete short-term items in the first 5-years. As presented, it was hard to understand the big picture status of where the City is and is City on track. If that can be understood, then PTC, Staff, and Council can understand the status and gaps. Many of the short-term programs relate to retail strategy and those programs deserve to be a higher priority because of the COVID-19 pandemic. Also, it is hard for the City and PTC to respond to applicants because the City currently does not have an overall retail strategy.

Vice-Chair Roohiparvar asked if Staff engages in resource planning and provides regular checks in with Council outside of the annual budget process.

Ms. Campbell clarified that every department has its own programs, policies, and projects. The City does have a mid-year budget process as well as an annual budget process. During those times is when each department reprioritizes its various goals and purposes for its individual programs, policies, and projects.

Ms. Moitra added that Capital Improvement Projects (CIP) also consider budget, resources, planning, etc.

Vice-Chair Roohiparvar inquired if there are check-ins with City Council or only the formal processes.

Rachael Tanner, Assistant Director, noted that if Staff does not have Council authority, Staff cannot do it. That authority can rest in the Comprehensive Plan that is adopted by Council, but if there is no budget. Then Staff cannot move forward with the work.

Vice-Chair Roohiparvar agreed that it depends upon whether funding is available and resources. Then prioritization is changed based on whether funding and Staff time is available.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Tanner concurred that major events, such as a pandemic, can drastically shift what programs and projects move forward more quickly.

Vice-Chair Roohparvar asked if Council drives the decision on prioritization or does Staff have the ability to operate and act.

Ms. Tanner answered that direction is provided to Staff through the Comprehensive Plan and Council may use the Comprehensive Plan to inform their budgeting and priority decisions.

Commissioner Summa stated that the City would love to complete all of the programs, but folks have to understand that it cannot all be done or all done at once. She requested that the Housing Element Ad Hoc Committee discuss L2.4.6 and the trio of programs regarding parks under C4. She predicted L6.3.1 would be easy to implement because there are existing standards and best practices around bird-friendly building design. Regarding L7.1.2, that work is long overdue and she encouraged Staff to explore that at a rapid pace.

Commissioner Lauing mentioned that L4.2.2 states that the Office of Transportation continues to assess parking in the California Avenue District and he could not see how that comment is related to formula retail.

Chair Hechtman inquired if Staff added any new programs.

Ms. Campbell answered no.

Chair Hechtman commented that the relationship between the ongoing status and completed status is confusing. Some of the completed programs transitioned to ongoing programs. He asked if there is better clarification that can be used to distinguish between the two statuses.

Ms. Campbell agreed that Staff also struggles with those determinations. With each year, Staff develops better reporting skills. One component that Staff is working on is better understanding what each status means and making sure that all City departments are using the same approach.

Chair Hechtman appreciated Ms. Campbell’s answer and that Staff is aware that the reporting is confusing. He asked why Staff has decided to bring the item to PTC twice a year.

Ms. Campbell restated that a prior PTC Member had requested that Staff bring the item to PTC twice a year. This will allow Staff time to implement any changes that are suggested by PTC Members before the April 1st deadline.

Ms. Moitra added that what is presented is a huge volume of information and one session is not enough time for PTC Members to provide meaningful comments.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Chair Hechtman remarked that seeing the item twice is not very efficient of time, but he understood Staff’s logic. He recommended that Staff bring the item to PTC in December instead of February and that would allow Staff enough time before their deadline to make any changes recommended by PTC.

Ms. Moitra disclosed that the issue of bringing it earlier than February is that the PTC will not receive the full-year accomplishments.

Commissioner Summa stated that PTC could try it semi-annually.

Commissioner Lauing supported Chair Hechtman’s suggestion to have the item come to PTC in December instead of February.

Commissioner Chang supported Chair Hechtman’s proposal, but if the goal is to have PTC review it earlier to help assist with reprioritization, she requested that Staff parse the completions status out department by department or by priority determination as well as provide Staff commentary on which groups of programs have been reprioritized and why.

Ms. Tanner emphasized that the document’s intent is not to raise flags to PTC or Council about priorities. Staff cannot do analyses for all 410 programs and the second meeting is to allow Commissioners to ask questions and provide meaningful feedback that Staff can incorporate into the document.

Commissioner Alcheck stated that it is never a bad idea to have the PTC interact with Comprehensive Plan topics. In prior years, PTC Members worked in groups of two to edit the Comprehensive Plan and now that process is no longer used. He supported Staff and other Commissioners who want to have two presentations on the topic a year. He restated that it would be helpful if Staff had the authority to flag items for PTC and Council that need higher priority or that have become lost among the other programs.

Commissioner Summa asked if the PTC reviews proposed Comprehensive Plan amendments.

Mr. Yang answered yes.

Vice-Chair Roohparvar agreed that it would be helpful to have the item come to the Commission twice. She agreed with Commissioner Alcheck that it would be helpful if Staff could flag high-priority programs, but confirmed that Ms. Tanner said that Staff does not have the resources to do that. She suggested that Staff flag two or three items, or major alarming overarching issues, that are of concern so that PTC and Council can consider them.

Chair Hechtman requested that Staff show in the spreadsheet what items have changed status since the PTC last reviewed it. He was not requesting a progress report on all 410 programs.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
4. PUBLIC HEARING/QUASI JUDICIAL/LEGISLATIVE: Review of the Castilleja School's Requested Conditional Use Permit and Variance per Council Direction March 29, 2021, and Review of a Draft Ordinance per Council Direction Amending Section 18.04.030 Regarding Definition of Gross Floor Area in the R1 Zone for Below Grade Garages. Zone District: R-1(10,000). Environmental Review: The Final Environmental Impact Report (EIR) was Published July 30, 2020 and the Draft EIR was Published July 15, 2019

Chair Hechtman read the item into the record.

Rachael Tanner, Assistant Director mentioned that there are several members of the public who have decided to have a spokesperson for their comments.

Amy French, Chief Planning Official, requested that Commissioners state any disclosures they have for the item.

Vice-Chair Roohparvar shared that Preserve Neighborhood Quality of Life (PNQL) contacted her and they provided a binder with all of the published public comments.

Commissioner Summa disclosed she also received a binder.

Commissioner Chang agreed that she also received a binder and that she had met with several concerned neighbors.

Commissioner Lauing confirmed he also received a binder.

Commissioner Alcheck noted that he did not receive a binder.

Chair Hechtman shared that he had a Zoom meeting with two of the applicant’s attorneys during which they reviewed the elements of the documents that have been presented to the City. He indicated that when Commissioner Templeton arrives at the meeting, he will request that she share any disclosures she has.

Ms. French announced that the applicant has prepared a presentation as well and their presentation is focused on the Transportation Demand Management (TDM) Plan. Staff recommended that the Planning and Transportation Commission (PTC) continue the item to a date uncertain. In 2020, PTC recommended approval to City Council for the Conditional Use Permit (CUP) as well as approval of the Variance. PTC supported CUP Finding 1 with a vote of 4-2, with the dissenters expressing concerns about enrollment increases, number of events and potential impacts. PTC had a split vote of 3-3 on Finding 2 due to a disagreement regarding Staff’s interpretation of the subterranean parking facility. One PTC Member suggested a Zoning Text Amendment facilitate Staff’s interpretation. City Council discussed the project on March

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson's presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

implementation. At this time, Staff was not requesting any feedback regarding a potential RPP for the neighborhood and public art. Regarding events, Staff recommended that Castilleja School be allowed 70 events, with five major events and no Sunday events. On December 2, 2021, ARB reviewed the academic building's 4,370-square foot reduction and reconsidered the massing and compatibility of the design with the residential neighborhood. Three ARB Members expressed interest in further modifications to the Kellogg-facing façade which two ARB Members opposed. ARB also discussed the construction phasing and the temporary campus. The ARB unanimously supported the 34-month schedule using a temporary campus on Spieker Field. A third party was obtained to laser count the existing buildings' square footage on campus. Based on the volumetric space, the existing campus is larger than the proposed campus. Staff recommended that PTC focus their discussion on the garage GFA definition, enrollment increase procedures, TDM plan measures, RPP versus time-of-day restrictions, special events and any other direction or comments.

Chair Hechtman invited the Chair of the ARB to provide any additional comments.

Osma Thompson, Chair of the ARB, noted that while ARB unanimously supported Option E for the parking garage. Each Board Member had concerns regarding the fence that comes with Option E and garage truck maneuvering. The ARB would like to explore those two areas more thoroughly.

Chair Hechtman invited Commissioners to ask clarifying questions of Staff.

Vice-Chair Roohparvar inquired if the word “base” means calculations without parking reductions. She recommended that the definition for “base” be refined because the current definition is too vague. She asked what does Council means in their motion when they say that the parking garage shall be partially excluded from the GFA calculation.

Albert Yang, Assistant City Attorney, confirmed that Staff will refine the definition for base parking requirements. Regarding Council’s motion, the Council made motions over two nights and the motions made on March 15, 2021, were later refined on March 29, 2021.

Vice-Chair Roohparvar asked if 25 students is a class size at Castilleja School.

Ms. French explained that class size varies depending on the class.

Vice-Chair Roohparvar asked if the parking reductions will change the analysis for the number of trips to the project.

Ms. French clarified that the number of trips is set by the motion and the project cannot do new net trips.
Vice-Chair Roohparvar requested that Staff further explain what volumetric GFA means.

Ms. French shared that the PAMC includes in the calculation of GFA volumes of a building where if the first floor exceeds 17-feet above grade it is counted twice towards GFA. The lobby of the existing gym and the main gym area currently exceed 17-feet. Those portions have been counted twice in the current measurements per PAMC. The current Fine Arts Center also exceeds the 17-foot threshold, but that building is proposed to be demolished. The new building will not exceed the 17-foot threshold and will have a smaller footprint than the existing structure.

Vice-Chair Roohparvar asked why the existing offsite parking facility located on Cowper Street does not count as satellite parking.

Ms. French confirmed that the parking is located on a residential street and Castilleja School has an agreement with the church located there. Council’s motion stated that the satellite parking cannot be in a residential neighborhood and so the existing parking is not in the right location.

Vice-Chair Roohparvar requested that Staff explain the penalties if Castilleja School becomes out of compliance.

Ms. French explained that for every infraction, the penalties increase, and the penalties will be applied if Castilleja School does not come into compliance through mitigations or TDM measures.

Vice-Chair Roohparvar asked if there is a current problem with Castilleja students and faculty parking on the neighborhood streets or is that an anticipated impact.

Ms. French added concerning satellite parking, the existing satellite parking is 500-feet away from the campus. Typically, a Parking Adjustment that included satellite parking is not farther than 500-feet away from a project.

Philip Kamhi, Chief Transportation Official, shared that residents in the neighborhood have not raised concerns to Staff about Castilleja students and faculty parking on the neighborhood streets. The typical process to determine if an RPP is needed is for residents to express their concerns through a parking survey conducted by Staff. For schools, there are other possible parking solutions and Staff is required to explore those options before implementing an RPP.

Vice-Chair Roohparvar wanted to know if there is a non-residential neighborhood within 500-feet of the Castilleja campus that could have satellite parking.

Ms. French could not recall if there is one within 500-feet of the campus.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Mr. Yang clarified that 500-feet is the limit outlined in the PAMC where satellite parking can be counted towards the parking requirement for the site. Council’s motion directed Staff to explore satellite parking as a Condition of Approval and that it would not replace onsite parking.

Vice-Chair Roohparvar asked if that approach would trigger any environmental analyses.

Mr. Yang concurred that supplemental analysis may be needed depending on where it is located.

Chair Hechtman suggested the Commission take a 10-minute break and then continue with Commissioner questions of Staff.

[The Commission took a 10-minute break]

Chair Hechtman invited Commissioner Templeton to share any disclosures she may have.

Commissioner Templeton answered that she has no disclosures to share.

Commissioner Summa understood that satellite parking is parking at a remote location that uses shuttles. Offsite parking that is located within 500-feet of a project would be parking that fulfills part of the parking requirements for a project.

Ms. French explained that the satellite parking can only be tied to a Parking Adjustment if it is located within 500-feet of a project.

Jonathan Lait, Director of Planning, concurred that Commissioner Summa’s understanding is correct. For Castilleja School, they are meeting the parking requirement through a reduced Parking Adjustment and if there is a need for additional parking. That parking can be located offsite but would not be required parking.

Commissioner Summa commented that typically offsite parking is for commercial or multi-family zones.

Mr. Lait restated that through the CUP, the City can impose a condition for offsite parking.

Ms. French confirmed that commercial zones do contain language about having satellite parking 500-feet away to meet parking requirements. In response to Council’s motion, the applicant has submitted a Parking Adjustment request in which various parking tools can be used to fulfill those requirements.

Mr. Yang clarified that the applicant is not proposing there be offsite parking.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. Commissioner Summa asked if Council’s motion used the term ‘base requirement’ or ‘parking requirement’. She argued that there is quite a difference between the two terms.

2. Mr. Lait explained that Staff took that direction as using the PAMC required parking that was required at the time Council saw the application and not from a reduced parking 50 percent threshold.

3. Commissioner Summa stated that removing the buildings with the volumetric space does not result in a project with no grandfathered square feet over what would be allowed.

4. Ms. French explained that the gym is the most grandfathered space. The Fine Arts Center that will be demolished, the applicant is not proposing to put that square footage back in the new building.

5. Commissioner Summa shared that she did not understand how the school can build more square footage with the new facility that would otherwise not be allowed on the site.

6. Mr. Lait explained that the CUP process was the vehicle that was used in the past to allow the site to exceed the permitted floor area calculation in the R-1 Zone. A more contemporary reading of the PAMC disclosed that using the CUP process is not the right approach. The applicant then submitted a Variance application. Staff acknowledged that there were errors made in assessing the existing floor area and that the project is over the floor area ratio (FAR) that would be allowed currently.

7. Commissioner Lauing pointed that PTC did not receive information in the Packet for many of the items that Staff outlined is within the PTC purview. He inquired if those materials will be available at the continued hearing.

8. Mr. Lait agreed that all of the information is not in the Packet. The reason is that the feedback received from PTC and ARB will help inform the next step of Staff bringing back more refined information and Conditions of Approval. If there is information that PTC wants to be included in the next Packet, he requested that be shared with Staff.

9. Commissioner Lauing inquired what will the Variance be asking for.

10. Ms. French answered that she would have to find the information and will provide it later in the meeting.

11. Commissioner Lauing clarified that Council has not approved any of PTC’s recommendations except for the starting point of 450 student enrollment.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. French confirmed that Council has not certified the Environmental Impact Report (EIR) or motions to approve the project.

Commissioner Chang shared that she reviewed the minutes and understood that Council recommended that PTC consider a no underground garage option. She asked if a no underground parking option was ever presented.

Ms. French confirmed that in the Draft EIR there is no underground garage alternative and that was part of the analysis.

Commissioner Chang inquired when the EIR was drafted.

Ms. French answered that the Draft EIR was prepared in 2019 and the Final EIR to address the comments received on the Draft EIR was prepared in July of 2020.

Commissioner Chang reiterated that at the March 2021 Council meeting, they instructed PTC and Staff to review a non-underground parking facility option and an underground parking facility alternative. She reasked if Staff and PTC ever received a new, no underground alternative since that March 2021 motion.

Ms. French answered no, the March 15, 2021, Council motion was later refined on March 29, 2021, and Staff completed the work based on the March 29, 2021 motions.

Commissioner Chang asked what are the requirements for a Parking Adjustment.

Ms. French explained that Parking Adjustments are typically done by the Director of Planning and several code statements must be met to grant those.

Commissioner Alcheck asked if the proposed floor area is greater, less than, or equal to existing conditions.

Ms. French confirmed that the proposed floor area is less than existing conditions.

Commissioner Alcheck inquired what the floor area is if the parking garage is included.

Ms. French restated that per Council’s motion, the garage will not be counted toward the floor area.

Commissioner Alcheck asked if Staff thinks that it is counter-intuitive to approve a smaller garage when the school is only going to be growing in size.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. French explained that GFA addresses bulk and mass above grade and anything below grade is not adding bulk and mass. The success of the TDM Program will determine if a larger garage should have been approved.

Commissioner Alcheck wanted to understand what flaws Council foresaw with PTC’s recommended approach on how to phase in increased enrollment.

Ms. Lait mentioned that Council expressed that Council wanted consequences to be applied in a more timely fashion than what was recommended in PTC’s suggested approach.

Commissioner Alcheck remarked that maybe Council did not understand PTC’s phased enrollment approach. The Commission had established that the school has to show proof that they have sustained a no net increase for the past increase before a new increase can occur.

Mr. Lait agreed that the Commission provided a very thoughtful approach for Council to consider and Council has asked Staff to reevaluate it.

Commissioner Alcheck recalled that PTC’s original recommendation was to start enrollment increases in the 420 student range instead of 450 students. He asked if Staff has a visual diagram of how PTC’s original enrollment proposal would work and provided that to the Council.

Chair Hechtman could not recall discussing volumetric measurements when PTC discussed the Variance. He asked when the PTC reviews the Variance again, will it include volumetric floor area or GFA, or both.

Mr. Yang clarified that the volumetric floor area is part of GFA and both measurements will be included in the presentation for the Variance.

Chair Hechtman invited the applicant to present their presentation and disclosed that they will have 15-minutes.

Nanci Kauffman, Head of School for Castilleja School, expressed appreciation to Staff and the Commission for their thoughtful guidance on the project. The proposal before the Commission was built on many years of compromise between the school, the neighbors, and the City. The proposal responded to the neighbor’s concerns by reducing the school’s footprint, capping car trips, limiting hours of operation, reducing the number of events, moving parking out of sight, saving and adding trees, and mitigating noise. All of this is achieved while still meeting the project’s objective of building a modern, sustainable campus and educating more girls.

Regarding the enrollment increase, educating more girls for a better and more equitable future is one of the core goals of the school. To achieve this goal, Castilleja School needs the City’s

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
help to allow for more girls to be enrolled. Castilleja School understands that enrollment increases rely upon the school’s ability to mitigate trips, events, and parking. Regarding parking, with the help of the City, there is a way to responsibly grow enrollment while still meeting all of the parking requirements. They requested that the Commission provide clear actionable steps that Castilleja School can take to move their project forward for approval.

Adam Woltag, the applicant’s architect, reminded the Commission that the proposed campus design included a dispersed campus drop-off approach. Council recommended that the project team reduce the parking garage footprint along with other parking recommendations. Parking Options A through E reflected those recommendations by reconfiguring the lot and allowing further protections for trees. ARB supported Option D and Option E because they allowed protections for trees and reduced below-grade parking capacity. Option D accommodated 69 parking spaces below grade with 26 spaces remaining above grade. It also reduced the garage’s impact on adjacent trees and allowed loading and deliveries to be located below ground to mitigate noise. Option D did not affect traffic circulation as it pertained to the distributed drop-off strategy. Option E accommodated 52 parking spaces below grade with 37 spaces above grade. The parking garage footprint was reduced to reduce or eliminate impacts to adjacent trees and shifted the pool to allow for more protection of trees. Loading and deliveries for Option E are proposed to be at grade level and included an acoustic fence along Emerson to mitigate noise. Option E does not affect the distributed drop-off strategy.

Elizabeth Hughes, the applicant’s TDM expert, remarked that Castilleja School already has an excellent TDM Program. All of the additional proposed measures make their plan superior to other TDM Programs. TDM is a synergistic grouping of elements and is not a single element. The synergist grouping creates a TDM measure that is significantly more enhanced. Castilleja School’s proposed TDM Program incorporated the existing measures that included enhanced measures and added additional measures to make the plan more robust. The TDM Program will accomplish no net new trips and cover the parking shortfalls.

Chair Hechtman suggested that the Commission hear from the public speakers, hear the applicant’s rebuttal and then decide either to ask questions of the applicant or move to continue the hearing to a date uncertain. He announced that each speaker will have 2-minutes to speak.

Alan Cooper shared that his home is located across the street from Castilleja School. He appreciated that the City continues to work with the school and the neighbors to come to a compromised agreement. Per his letter sent to the Commission, the letter outlined seven concerns in which he provided simple solutions and he requested that the Commission consider those recommendations. He strongly encouraged Castilleja School to move to an offsite temporary campus during construction.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Tanner remarked that the PTC’s Procedural Rules indicate that the Chair can only limit public speaker comments to 3-minutes and that the language in the agenda contains an error. She requested that the Chair allow 3-minutes per speaker and allow Mr. Cooper an additional minute for his comments.

Mr. Yang supported Ms. Tanner’s understanding of the PTC’s Procedural Rules.

Chair Hechtman apologized and requested that Mr. Cooper take an additional minute to provide any other comments.

Mr. Cooper announced that he has no further comments.

Anu Priyadarshi asked that the Commission support Castilleja School’s modernization plan. The proposal reduces the school’s impact on the neighborhood and the environment. She requested that the Commission support Option D for the parking garage so it can house more cars if the school ever decided to expand in the future.

Eduardo Llach encouraged PTC to move the project forward to City Council for approval. He acknowledged that Palo Alto High School has constructed many buildings over the years on their campus while Castilleja has remained the same size. He commented that the proposed improvements to protect more trees are fantastic. He stated that he has always supported Castilleja’s project and will continue until it is approved.

Madina Klicheva, Administrative Assistant, called on J. Fleming. Due to J. Fleming having technical difficulties, she called upon Jochen Profit.

Jochen Profit seconded Mr. Llach’s comments and encouraged the Commission to recommend approval to the City Council. He seconded Commissioner Alcheck’s comment of having the City approve a larger garage to allow the school to expand in the future.

Julia Ishiyama expressed that the proposed enrollment increase plan that is based on no net new trips already creates an incentive structure that guarantees compliance. She remarked that the small group of residents who oppose the project may never support the project. The City should not continue to accommodate their unrealistic enrollment concerns. She emphasized that the City needs to approve the project so that the school can continue to educate more girls. She did not support limiting enrollment to Palo Alto residents only.

Ms. Klicheva called on LFB, but after LFB had technical difficulties, she moved to Lian.

Lian stated that after the last PTC hearing on Castilleja, it was understood that the garage will not bring more cars to the neighborhood. She encouraged other organizations in Palo Alto to follow Castilleja’s lead regarding their TDM Program. She strongly supported the underground

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Mary Sylvester spoke on behalf of five residents and Keith Bennett with Save Palo Alto’s Groundwater. Underground construction, along with climate change and population growth, impacts the community’s groundwater. She encouraged any decisions made on underground construction to be made based upon an up-to-date Geotechnical Study. Also, that the EIR be project-design specific and include accurate and current ground conditions. The Draft EIR was prepared in 2017, the Geotechnical Study had a clearly-stated expiration date of early 2020 and the Draft EIR did not consider the excavation of the proposed swimming pool. The water table at the pool location was 25-feet below grade in autumn and raised to 18-feet below grade during winter storms. Contractors are required per the Building Code to dewater 2-feet below the deepest excavation, but oftentimes they go deeper. Palo Alto’s Dewatering Ordinance does not impose any restrictions on the rate or total amount of groundwater that is pumped. Also, unless it is specifically required as a Condition of Approval, cut-off walls are not required. Based on projects located in Old Palo Alto, which has similar soils, groundwater could be lowered by 5-feet or more for many months and likely over an area that extends 500-feet from the construction site. The school is located on a parcel that is near an area of high recharge for the deep aquifer and the City relied on that aquifer for emergency portable water supply. Groundwater also provides water for vegetation as the soils above the water are moist. An often overlooked impact of underground construction in high groundwater areas was greenhouse emissions from the concrete used. The manufacturing of concrete releases 400-pounds of CO2 per ton of concrete and the CO2 emissions for the underground construction for the project equated to 1,340,000 pounds. Underground construction will also increase the load on the City’s Stormwater Management System. In conclusion, she recommended that a new Geotechnical report and updated Draft EIR be complete as well as the applicant consider design alternatives that do not require underground construction.

Maya Blumenfeld supported Castilleja’s modernization plan. Castilleja is one of the finest all-girl schools in the country and she encouraged PTC to recommend again that Council approve the project. The improved proposal fulfilled many of the concerns the City and neighbors had while allowing the school to grow.

Rebecca Sanders announced that she is Co-Chair of Palo Alto Neighborhoods (PAN) and spoke on their behalf. PAN believed that none of the proposed parking options complied with the law because they all add more floor area to the site than is allowed. PAN explained that if Castilleja adopted a TDM that earns Castilleja a 20 percent parking reduction. Then Castilleja can meet the City’s parking requirements with their existing 89 spaces. This option would not require an underground garage which benefits the neighbors, the City, Castilleja and the environment. PAN encouraged PTC to recommend that Castilleja returns with a parking proposal that does
not include an underground garage. She concluded by thanking Ms. Sylvester for expressing her concerns regarding underground construction and groundwater.

Ms. Klicheva called on Andie Reed and requested she provide her comments to the Commission.

After Ms. Reed had technical difficulties, Chair Hechtman suggested that the Commission hear the next speaker in line and then return to Ms. Reed.

Barbara Gross thanked the Commission for recommending approval to Council at their last meeting. Per Council direction, Castilleja made improvements to their project, and she stated those improvements should allow the Commission to again recommend approval. She supported having deliveries off of Emerson Street and more isolated on the campus. She agreed that the folks who oppose the project continue to be unsatisfied with any changes the school proposes.

Ms. Reed spoke on behalf of a group of five residents. She appreciated that Council recommended that Dudek, a third-party, measure the existing square footage of the campus. Dudek released their assessment regarding square footage on November 17, 2021. The report mentioned that the existing GFA was substantially more than what was allowed by the Code. This report proved that the square footage being requested in the Variance will also make the campus exceed GFA. In the PTC Packet, there was no mention of the report. Regarding the Variance, she explained that the findings that the PTC considered at their November 2, 2020 meeting did not list the number of square feet that was being asked for. The Variance requested that the floor area ratio be .48 and the Code only allowed .30. Dudek was hired to calculate the GFA analyzed in reference to the current Code. The two buildings with extra volumetric space were built after the Code was in effect. She argued that just because the proper square footage was not reported. That does not make those buildings compliant with Code. Neighbors have been saying since the beginning that the proposed block-long building was too massive for the neighborhood. The proposed plans showed that 7,100-square feet was not being counted toward GFA and she requested that the Planning Department reevaluate that. She mentioned that the Fehr and Peers parking report from July 2021 identified that there were 89 existing surface parking spaces and this was not mentioned in the Staff report. Castilleja proposed to move their pool to allow for more parking underground but this action reduced surface parking by 60 spaces. Regarding a potential RPP, neighbors would be required to pay for parking that was currently free and an RPP would not cover nights and weekends. Regarding events, the schedule provided in the Staff report was indecipherable. She requested that Staff provide a legible list to the public and allow neighbors to opine on the list of events before the CUP is finalized. Regarding the TDM, she acknowledged that the program is very robust but neighbors are concerned about enforcement. In conclusion, she reported that

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
neighbors are amendable to an enrollment increase of 450 students, rebuilding the campus with less volume and mass, retaining current surface parking spaces, and lowering the number of events on nights and weekends.

The Commission took a short break before continuing with public comment.

Bill Burch spoke on behalf of five residents and shared that they support Castilleja and its modernization plans. He acknowledged that the Palo Alto process can be arduous at times but the results were wonderful projects that benefit the community. Castilleja presented their modernization plans 10-years ago and through those 10-years Castilleja has shown good faith in listening and agreeing to compromises presented by the City and neighbors. Regarding the TDM Program, the program has grown and become a way of life for students and faculty. The school advocates for internal carpools and encourages bicycling and walking to and from campus. The campus design has changed to accommodate neighbor and City concerns. The process for approval has been prolonged and over that time Castilleja has not been allowed to increase enrollment. The project has received unprecedented scrutiny for 10-years. He addressed residents’ opinions about keeping Castilleja a Palo Alto-only school. This type of action would not allow underserved populations to receive a world-class education and he did not support that. He stated that many residents are concerned about growth. He argued that the proposed project is not an expansion because the campus will have a smaller footprint and car trips will be capped. Castilleja has already limited the number of events to the City’s recommended amount and has reduced the parking garage to preserve trees. Castilleja has vowed to keep car trips level so that they can increase enrollment and educate more girls. He strongly encouraged PTC to move the project forward to Council for approval.

Cindy Chen remarked that she is a neighbor who lives on Emerson Street and she greatly appreciated the parking garage options that Castilleja has proposed. She encouraged PTC to approve Parking Option D with the 69 parking spaces in the underground garage which will remove more cars from neighborhood streets and prevent parking on Speiker Field.

Hank Sousa requested that PTC not approve any additional enrollment increases after 450 students have been reached. He requested that the school stay at 450 students for 10-years so that the neighbors have time to assess the impact. The existing 89 parking spaces are adequate for a cap of 450 students. He recommended that Castilleja encourage students not to drive to school and use shuttles instead. He did not support the proposal to move the existing swimming pool. Neighbors have expressed these minor changes for years, but Staff has not acknowledged them.

Jason Stinson recommended approval of Option D for the underground parking garage and the modified pool. Option D protects trees and moves more cars below grade. Modifying the

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.

2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

location of the pool will further protect existing trees. He strongly supported Castilleja’s proposal to plant 100 more trees on campus.

Jim Fitzgerald supported Castilleja and their proposal. He found it unfortunate that Council sent the proposal back to PTC after PTC recommended approval of the project. The new plan preserved more trees, reduced traffic and car trips to campus, reduced hours of operations, reduced events, and had enhanced aesthetics to campus buildings. Castilleja continued to be a quality neighbor and is committed to making the changes work.

Kathleen Foley-Hughes thanked PTC for voting to recommend the project to Council at their last discussion regarding Castilleja. She remarked Castilleja is a gem, an asset to the City and she expressed frustration that the project has been drug out for so long. She predicted that the proposed improvements to the project will allow PTC to recommend approval again to Council.

Lesley King spoke for five other residents who supported the Castilleja renovation project. Regarding the CUP, the application already outlined a starting enrollment of 450 students and the school can only add more students when they successfully meet the no net new trips threshold. The TDM Program is well developed and shows the compromise that Castilleja has demonstrated throughout the process. The school has been running a successful TDM Program for years which shows great promise that the newly proposed TDM Program will be successful. She acknowledged that over a decade ago the school was over-enrolled. Since this discovery, the school has been closely monitored and has worked towards regaining the trust of the community through various actions. Regarding the parking garage, she appreciated Commissioner Alcheck’s questioning if the City should approve a larger garage. ARB supported Option E because it complied with Council’s mandate but all five Board Members also supported Option D because it protected just as many trees and maximized underground space. She agreed with the comments that when Council recommended that 52 parking spaces be below ground, the number seemed arbitrary and had no supporting data. She pointed out that the Staff report admitted that even though the chart showed a shortfall of 30 parking spaces if the school enrolls 540 students. That chart and the Parking Demand Study did not include the TDM Program. She stated that this flawed data should not have been present in the Staff report. Regarding the Text Amendment, she did not know where the threshold of 50 percent of the amount of parking capacity that can be allowed below ground came from.

Neva Yarkin announced that she is an adjacent neighbor to Castilleja. She expressed that allowing an increased enrollment will only lead to more traffic and congestion in the neighborhood. She recommended that Castilleja use a school-wide shuttling service to help mitigate traffic. She stated that the underground parking garage will require tons of cement and does not help the City reduce its greenhouse gas emissions. She shared concerns about the temporary campus that will be housed on-site while construction is underway. Requiring
students, faculty, parents and residents to navigate around construction equipment is a huge safety concern. She argued that Stanford University, Palo Alto High School and train crossings will also be impacted by the project.

Rita Vrhel spoke for five other residents who opposed Castilleja’s project. She stated that the proposed project is not a question of having girls uneducated versus they must go to Castilleja. She strongly did not support other speakers who disrespected folks who opposed the project. She acknowledged the Fehr and Peers’ July 2021 Parking Study and Dudek’s November 17, 2021, GFA assessment. She confirmed that neither report was included in the ARB Packet or PTC’s Packet. She believed that the two reports showed ample evidence that Castilleja should reevaluate and redesign their proposed project. Fehr and Peers’ study indicated that a parking garage is not necessary which made the proposed Text Amendment unnecessary. The report noted that there are 330 available parking spaces around the school and so an underground garage is not necessary. Castilleja has financially benefited greatly by ignoring their current CUP and Use Permit. When Castilleja received their Use Permit in 2000, the then Planning Director reported that at no time did Castilleja School indicate that they intended to increase enrollment. Also, that any application to increase enrollment would not be favorably looked upon by the City. Use Permit Number 99-UP-48 did not allow for increased floor area or an increase in students. She encouraged PTC to review the documents and recommend denial of the project to Council.

Roger McCarthy spoke for five other residents who requested that the PTC expeditiously approve the project. He emphasized that he has no association with Castilleja School and his interest in the project stemmed solely from having more women in the STEM fields. Through his technological leadership positions, he witnessed firsthand the acute shortage of women in the STEM fields. For generations, the country’s co-education system has failed to educate female secondary students for STEM careers. The percentage of women in the STEM fields in the United States is predicted to shrink to 22 percent by 2025. He acknowledged that Silicon Valley is dominated by men from entry-level positions to the highest leadership roles. He encouraged PTC to begin to address the problem and promote change by allowing Castilleja, an all-girls, non-sectarian school, to increase their enrollment. A study showed that girls who graduate from secondary all-girls schools are far more likely to enter STEM fields than co-education schools. He found it frustrating that folks continued to use the R-1 zoning requirements as a reason to hold up the school’s plans. R-1 zoning was developed to use economics to achieve racial segregation which has since been repealed. He restated that the PTC should stop the goalposts from moving and approve the proposed plans.

Roy Maydan wanted to see City leaders make decisions that will positively impact property values and quality of life in the community. He strongly supported PTC’s prior recommendation to approve the project and was disappointed that Council sent the recommendation back to
PTC for further review. He supported any parking garage proposal that removed as many cars
from the street while protecting trees.

Stewart Raphael confirmed that Castilleja's existing TDM Program has reduced traffic in the
neighborhood by 30 percent. The school continued to demonstrate its willingness to commit to
a robust TDM Program and have it be successful. He pointed out that the Draft EIR states that
the underground parking garage will not bring additional car trips to the campus. He
recommended that PTC recommend approval of the project to Council.

Tony Hughes expressed that the proposal should be one that can be easily recommended for
approval to Council. He stated that he has spoken in support of the project many times and will
continue to support the project until it is approved. He asked why Castilleja was under such
scrutiny when the other high schools around the City have been allowed to grow and expand.

Vania Fang shared that her home is across from Castilleja School on Kellogg Street. She fully
supported the project and was excited to be able to look out at an updated campus with more
trees and green space. She strongly encouraged PTC to again recommend approval of the
project to City Council.

Yair Blumenfeld echoed all of the previous speaker's comments who support the project. He
stated that there are no other schools within the City that are committed to improving traffic
and have included environmental aspects to their remodeling projects.

Rob Levitsky mentioned that his property adjoins Castilleja's property. He stated it took 5 1/2-
years of residents commenting before Staff applied the Tree Ordinance to the project, 4 ½-
years to protect the homes located on the site, and 4 ½-years for Staff to listen that the
underground garage is not a basement. The applicant and Staff continue to miscalculate the
square footage that is allowed. He encouraged PTC to thoroughly review and deny the Variance
for square footage. The underground garage will require permanent encroachments into the
Melville Avenue public utility easement as well include a tunnel under the sewer line. He stated
that the underground garage is unnecessary and should be removed from the proposed design.

Deborah Goldeen confirmed that Castilleja is an incredibly important part of the value of the
community and they desire the City's support. The delay after delay for the project she stated is
obstructionism. The City does not hold residents to the standards that are applied to Castilleja
and does not require residents to protect trees. In a dream world, she wished that Stanford
University would lease property to Castilleja, and then they could sell the property which then
could be made into housing.

Jeff Levinsky supported Council's adoption that the underground garage must be counted as a
floor area. The PTC should not recommend that the underground garage be exempt from floor

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
   the time of the spokesperson's presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
   provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
   of speakers.
area because it has been shown that the underground garage is not needed. Castilleja has enough surface parking spaces to adequately park the project.

Mr. Levinsky’s audio cut off. Ms. Tanner suggested that the Commission move to the next public speaker and then return to Mr. Levinsky.

Terry Holzemer stated that the expansion of the school has never been about women’s education or its wonderful merits. Neighbors have never commented on the education that the school provides to girls. Neighbors want a reasonable expansion that fits in with the neighborhood. He remarked that it is time to stop demonizing the neighbors. He supported an enrollment increase of 450 students and then allowed a reasonable amount of time for neighbors to access the impacts. He restated that the reports have shown that an underground garage is not needed. He wanted to understand why Castilleja was receiving exceptional treatment to having to count for GFA that already exceeded the current code. He wanted to know if all non-profits and churches located in an R-1 Zone be allowed the extra floor space and will underground garages be allowed without counting the square footage. He agreed that 50 to 70 events a year are a lot of events for the neighborhood to have to deal with.

Ms. Klicheva invited Mr. Levinsky to proceed with his comments. She suggested that Mr. Levinsky call in and provide his comments.

Chair Hechtman requested that Ms. Levinsky submit his comments in writing to the Commission. He invited the applicant to present their rebuttal comments. After the rebuttal, he suggested that the Commission move to continue the item and then begin the item at their next meeting with questions of the applicant.

Mindie Romanowsky, lands use counsel for Castilleja School, clarified that the refined Council motion of March 29, 2021 did not require a Text Amendment to effectuate the Council’s underground parking goals. There is no Council mandate nor a legal requirement that PTC considers or recommends a Text Amendment. She encouraged PTC to provide feedback on the proposed parking options and continue the meeting to a date certain. If PTC does consider the Text Amendment, she requested that PTC allow Castilleja the ability to park more than 50 percent of cars below grade in a way where the entire parking garage does not count towards FAR. She strongly requested that PTC approve Option D for the underground parking garage. The underground construction of the garage was thoroughly analyzed by third-party professionals and found to have insignificant impacts. Regarding the square foot and Variance request, Dudek’s report was linked to the Packet and has been uploaded to the City’s webpage under Castilleja. Regarding Option D and Option E for the parking garage, Option D housed 149 parking spaces and Option E housed 143. During peak parking demand at an enrollment of 540 students, Option D had a 19 parking space shortfall and Option E had a 25 parking space

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.

2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

shortfall. The parking study did not take into account any TDM measures and so the parking shortfalls will be mitigated through TDM.

Commissioner Lauing stated that the agenda for the next meeting already has several items on it.

Ms. Tanner remarked that the wireless item would be moved to a future meeting and that it is important that the Commission review Castilleja in the next meeting.

Commissioner Alcheck supported Chair Hechtman’s suggestion that the item be continued to December 15, 2021, and that the Commission begins the item with clarifying questions of the applicant.

Commissioner Summa recalled that Staff stated that they would be bringing additional information to the Commission for consideration for the Castilleja project.

Ms. Tanner suggested that new information not be included in the December 15, 2021 meeting Packet and that the hearing picks up where it is left off. She suggested that any motion of continuation state whether public comment will be open or closed.

Commissioner Summa commented that any commenters who had technical difficulties should be allowed to speak at the next meeting.

Chair Hechtman clarified that the public had the opportunity to comment on the project. The next step will be for PTC to discuss the items that Staff has presented and give direction at the December 15, 2021 meeting. The public will not be allowed to comment at the December 15, 2021 meeting, but will have another opportunity to comment when the item returns at a subsequent meeting.

Commissioner Chang requested that all of the applicant’s presenters be present at the December 15, 2021 meeting.

Commissioner Lauing asked if there is a timeframe in which the item must go to Council.

Ms. Tanner answered no, there is no set time on when the item will be presented to Council.

Chair Hechtman clarified that Staff will return to PTC before going to Council.

Ms. Tanner pointed out that PTC and ARB will hold hearings on the item before it goes to Council.

MOTION
Commissioner Alcheck moved that the item be continued to December 15th, 2021. At such time, PTC will pick up exactly where they left off with the close of public comment and begin with questions of the applicant and its representatives. Then begin deliberation amongst themselves to give direction to Staff. So, that Staff may come back with some fleshed-out options for PTC to then recommend to City Council at a date uncertain.

SECOND

Commissioner Lauing seconded.

Commissioner Alcheck supported the approach of having the item fresh in the Commissioner’s minds and that the process continues on the current track.

VOTE

Ms. Klicheva called a roll call vote. The motion passed 6-0 with Commissioner Templeton absent.

MOTION PASSED 6(Ayes: Alcheck, Chang, Lauing, Hechtman, Summa, Roohparvar) -0 with Commissioner Templeton absent

Chair Hechtman appreciated that public commenters banded together and provided their comments through one spokesperson.

**Commission Action:** Motion by Alcheck, seconded by Lauing. Pass 6-0-1 (Templeton absent)

**Approval of Minutes**

Public Comment is Permitted. Five (5) minutes per speaker.

5. October 13, 2021 Draft PTC Meeting Minutes

MOTION

Commissioner Alcheck moved approval of the draft minutes as revised.

SECOND

Vice-Chair Roohparvar seconded.

Ms. Klicheva called a roll call vote.

Commissioner Summa abstained for she was absent for the October 13, 2021 meeting.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Klicheva announced that the motion passed 5-0-1 with Commissioner Summa abstaining and Commissioner Templeton absent.

MOTION PASSED 5(Ayes: Alcheck, Chang, Lauing, Hechtman, Roohparvar) -0-1(Summa abstain) with Commissioner Templeton absent

Commission Action: Motion by Alcheck, seconded by Roohparvar. Pass 5-0-1 (Summa abstain, Templeton absent)

6. October 27, 2021 Draft PTC Meeting Minutes

MOTION

Commissioner Alcheck moved to approve the minutes as revised.

SECOND

Chair Hechtman announced that Commissioner Lauing seconded.

Ms. Klicheva called a roll call vote.

Commissioner Summa abstained for she was absent for the October 27, 2021 meeting.

Ms. Klicheva announced that the motion passed 5-0-1 with Commissioner Summa abstaining and Commissioner Templeton absent.

MOTION PASSED 5(Alcheck, Chang, Lauing, Hechtman, Roohparvar) -0-1(Summa abstain) with Commissioner Templeton absent

Commission Action: Motion by Alcheck, seconded by Lauing. Pass 5-0-1 (Templeton absent, Summa abstain)

Committee Items

Chair Hechtman called for Committee items; seeing none he moved to Commissioner questions, comments, and announcements.

Commissioner Questions, Comments or Announcements

Commissioner Summa stated that at the October 27, 2021 meeting the Commission discussed electrification issues. She inquired when that would come back to the Commission and would all the items be brought back together.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. Rachael Tanner, Assistant Director, predicted that they would come back in the first quarter of 2022 and that they would come back separately.

2. Commissioner Alcheck inquired when the Emergency Ordinance that was recently passed that responded to SB9 would come before the Commission.

3. Ms. Tanner agreed that Staff barely had enough time to draft the Emergency Ordinance due to the time that the law passed and the time that it goes into effect. The Emergency Ordinance went into effect right away whereas a regular ordinance requires two readings.

4. Commissioner Alcheck asked if the framework of the ordinance was influenced by PTC’s discussion of objective standards.

5. Ms. Tanner explained that the Emergency Ordinance addressed objective standards that are based on the Individual Review Guidelines which apply to two-story homes. PTC’s discussion focused on multi-family and objective standards for those types of projects.

6. Chair Hechtman shared that the ribbon-cutting ceremony for the pedestrian and bike bridge over San Antonio Road was well attended.

7. Commissioner Alcheck shared that in 2013 the PTC voted to start a process for designing the pedestrian and bike bridge. He was happy to see that the bridge was finally complete.

Adjournment

12:00 am

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Call to Order / Roll Call

Approximately 6:02 pm
Chair Hechtman: Thank you. Ms. Klicheva, please conduct the roll call?

Ms. Madina Klicheva, Administrative Assistant: Chair Hechtman?
Chair Hechtman: Present.
Ms. Klicheva: Vice-Chair Roohparvar?
Vice-Chair Roohparvar: Present.
Ms. Klicheva: Commissioner Alcheck?
Commissioner Alcheck: Present.
Commissioner Alcheck: Commissioner Chang?
Commissioner Chang: Present.
Ms. Klicheva: Commissioner Lauing?
Commissioner Lauing: Present.
Ms. Klicheva: Commissioner Summa?
Commissioner Summa: Present.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Ms. Klicheva: Commissioner Templeton?

Commissioner Templeton: Present.

Ms. Klicheva: Thank you. We have a quorum.

Chair Hechtman: Thank you.

1. Adoption of a Resolution Authorizing Use of Teleconferencing for Planning and Transportation Commission Meetings During Covid-19 State of Emergency

MOTION

Chair Hechtman: Item Number One tonight is... on our agenda is adoption of a resolution authorizing use of teleconferencing for Planning and Transportation Commission meetings during COVID-19 State of Emergency. This is a resolution we will need to adopt monthly until we no longer need to adopt it. So, I move adoption of the resolution.

SECOND

Vice-Chair Roohparvar: I’ll second.

VOTE

Chair Hechtman: Second from the Vice-Chair. Any discussion from Commissioners on this item? Seeing none, may we have a roll call vote?

Ms. Madina Klicheva, Administrative Assistant: Yes. Commissioner Alcheck?

Commissioner Alcheck: Aye.

Ms. Klicheva: Commissioner Chang?

Commissioner Chang: Yes.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Ms. Klicheva: Chair Hechtman?
Chair Hechtman: Yes.

Ms. Klicheva: Commissioner Lauing?
Chair Hechtman: Muted. Commissioner Lauing you’re muted still.
Commissioner Lauing: Sorry. Yes.

Ms. Klicheva: Thank you. Vice-Chair Roohparvar?
Vice-Chair Roohparvar: Yes.

Ms. Klicheva: Commissioner Summa?
Commissioner Summa: Yes.

Ms. Klicheva: Commissioner Templeton?
Ms. Rachael Tanner, Assistant Director: She’s present but I don’t know if she can unmute at the moment. There we go.
Commissioner Templeton: Sorry, Zoom pick a fun time to restart. I support this resolution, thank you.
Ms. Klicheva: Thank you. The motion carries 7-0.
MOTION PASSED 7-0 (Ayes: Alcheck, Chang, Lauing, Hechtman, Roohparvar, Summa, Templeton)

Chair Hechtman: Thank you. We will now move to oral communications.
**Commission Action:** Motion by Hechtman, seconded by Roohparvar. Pass 7-0.

**Oral Communications**

The public may speak to any item not on the agenda. Three (3) minutes per speaker.¹

Chair Hechtman: So, this section is for the public to speak on items not on tonight’s agenda. So, for example, if you’d like to speak on the Castilleja item, we’d love to hear from you, but please don’t raise your hand yet. Wait for that item to be called. If you do wish to speak during this oral communication section, please raise your hand. On the Zoom App, there’s a raise hand button on the bottom of your screen. If you’re dialing in from a phone, please press *9. Do we have any public speakers for oral communication?

Ms. Madina Klicheva, Administrative Assistant: No, I don’t see any raised hands.

**Agenda Changes, Additions and Deletions**

The Chair or Commission majority may modify the agenda order to improve meeting management.

Chair Hechtman: Well, then we will move next to agenda changes, additions, and deletions. I have none. Fellow Commissioners, do any of you have any, or Staff, that you’d like to bring up? Very well (interrupted)

Ms. Rachael Tanner, Assistant Planner: There are no changes from Staff.

Chair Hechtman: Thank you, Ms. Tanner. Let’s move… let’s stay with Ms. Tanner and move to City official reports.

**City Official Reports**

2. Directors Report, Meeting Schedule and Assignments

Ms. Rachael Tanner, Assistant Director: Thank you very much. Good evening Commissioners. Good to see you all today or this evening rather. Just a few updates for you.

This last Monday at the City Council meeting, the City did adopt an Interim Urgency Ordinance to integrate Senate Bill 9 into our local Municipal Code. And then they also took action to make a Motion of Intent in some ways to adopt an Interim Ordinance that has the same content but has additional updates to integrate SB 478; which adjusts FAR requirements for developments with 3- to 10-unites to certain FAR requirements. And also, to adjust a little bit of your back… a

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
couple years ago we had adjusted part of our code related to deconstruction to move from
demolition to deconstruction as part of our waste reduction efforts. That part or that change,
which is not in the Planning Code, inadvertently invalidated part of the Planning Code because
we had both demolition and deconstruction. And deconstruction use to be something that was
incentivized, now it’s mandated, and so there’s no more demolition technically. Everything is
deconstruction and so we wanted to make sure that we were aligning ourselves with that and
also relates to our no net loss provision.

It probably sounds a little complicated but I’m saying all this to you because they were both
adopted on the interim basis which means they’re going to be coming back to your next year.
Both to look at SB 9 perhaps a little bit more slowly as you know it passed and was signed by
the Governor in September I believe. And so, we had just a few months to try to figure out how
we would adopt that locally and integrate that into our local planning processes and code.

So, next year we’ll be working with the PTC, but also the ARB, on Objective Design Standards,
lot split standards, and other kind of policy questions regarding that what is now the Interim Urgency and Interim Ordinances. So, we will expect to start that work early next year in 2022
and we also will likely be involving the HRB as well pending Council... further Council discussion
of how to treat our historic resources and possibly working to have more of our historic resources that have been identified become listed locally or at the state register of historic places. So, more to come on that but definitely a very good robust discussion at Council and we expect the same will happen here at the PTC.

We also look forward next week, the Council will be appointing members to this body and so
we will let you know as soon as we do what their decisions are members of the PTC. And then
our next members would be joining us in 2022. So, that will be something to look forward to.

Also, Council at the end of November, but we haven’t met since then, will also be... also took up
the Tenant Protection Item. I think you may remember, they took this up three times. We had
one night with a presentation, it was continued. One night with a little bit of discussion and
then continued and finally on the third night were able to finish the discussion. Council did
direct Staff to I think really work on probably I think all of the topics that we had recommended
and that the PTC had recommended for the most part. A little bit of difference between the PTC
and HRC recommendations and further refinements at Council. But I think the headline would

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
probably be that they’re advancing most of the protections to varying degrees. Some will be more immediate. We’ll be coming back to you all with ordinances in the next year. So, for example, the tenant relocation assistance, Council directed us to draft an ordinance that would reduce that to the 10-units being the threshold when that would kick in. And so, we’ll bring that to the PTC we expect in January at your second meeting. Some of the other items like the rental survey and others were directed to go to P&S, Policy and Services Committee, for further refinement at that Council body. So, more work to come and likely will come to you at some point but expect a couple of those ordinances to come to your next year.

And then lastly, as we just voted on, and you all passed, the resolution to continue to meet remotely for meetings in December. We have today and we have next week. We’ll also be taking that up in January and just for information. Council is still trying to consider when to have Boards and Commissions come back. That could be in January, it could be in February, but we will certainly keep you aware and if we are meeting in person whenever that happens. We’ll certainly work to give you as much notice as possible so you can arrange yourselves and be prepared. And if you have questions in the lead up to that once we do know the date, please don’t hesitate to reach out and ask me; or other Staff can get you the answers to the questions just regarding how to meet together safely and what it will be like to be back together. I will say I’ve watched at least via... watched and participated myself in a couple hybrid Council meetings. And at least from my perspective it’s gone fairly smoothly and haven’t had any issues being heard by Council Members and members of the public as well. So, I think that when we do reconvene in person, I think for ourselves and for members of the public hopefully will be a pretty smooth process. At least it looks like it from again from my little window into the meeting.

So, with that, I have one more announcement which is tomorrow the Sustainability and Climate Action Planning, S/CAP, ad hoc committee, which is Council Member Cormack and Vice Mayor Burt, will be convening at 9:00 am to 11:30. The topic is going to be land use and transportation, so very relevant to our work, and we’ll be talking a little bit about how land use and transportation can be avenues to reduce our greenhouse gas emissions. You’ll probably recall that the goal for the S/CAP is to reduce our emissions by 2030 to 80 percent of what they were in 20... 80 by 30. I think it’s to 2000. Sylvia, what year is it that the S/CAP? See I was trying to be slick and then I realized I forgot one of the numbers.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Sylvia Star-Lack, Transportation Manager: 1990 level.

Ms. Tanner: 1990.

Ms. Star-Lack: 80 percent of 1990 level.

Ms. Tanner: 80 percent of 1990 level. I was like 80 of what is it? Okay, 1990. That’s how we can remember it, 80, 90, 30. So, we’ll be participating in that myself and Ms. Star-Lack will be giving a presentation and having a discussion with the Council Members. And also, any members of the public who chose to tune in and ask questions. So, with that, I am available for questions if there are any from the Commissioners.

Chair Hechtman: Thank you, Ms. Tanner. I see Commissioner Summa’s hand.

Commissioner Summa: Thank you very much. I actually meant to bring this up under agenda changes but I lost my picture for a minute. I don’t know what happened but I got back on. I just wanted to remind everyone that action items at the... are 5-minutes which can be reduced to 3-minutes, not 3-minutes. It’s only oral communications that are 3-minutes and this keeps popping up as a boo-boo on our agendas. So, at the bottom of the first page of our agenda under action item that’s incorrect. So (interrupted)

Ms. Tanner: Thank you for that note and I will note that and see if (interrupted)

Commissioner Summa: I think it’s a [unintelligible](interrupted)

Ms. Tanner: [unintelligible] the template.

Commissioner Summa: Yeah, a cut and paste problem or something.

Ms. Tanner: Yeah.

Commissioner Summa: That’s all, thank you.

Ms. Tanner: Thank you.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.

2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a large number of speakers.

Chair Hechtman: Vice-Chair Roohparvar.

Vice-Chair Roohparvar: Thank you. Ms. Tanner, I had a quick question. How do our ‘90s goals compare to right now in terms of greenhouse gases?

Ms. Tanner: I would have to say (interrupted)

Vice-Chair Roohparvar: Because I know we (interrupted)

Ms. Tanner: I don’t know. Ms. Star-Lack, if you know off the top of your head how much [unintelligible](interrupted)

Vice-Chair Roohparvar: Not specific [unintelligible]. I would think we are less or are we (interrupted)

Ms. Star-Lack: We’re at less. Yes, we’re at less and a lot of that has to do with the fact that our utility went with green cleaning power at a certain point. So, that leaves transportation as the largest source of greenhouse gas emissions.

Vice-Chair Roohparvar: Got it. That’s helpful, thank you.

Chair Hechtman: Alright, any further questions of Staff? Seeing none, we will move into our action items and we will start with Item number 3.

Action Items

Public Comment is Permitted. Applicants/Appellant Teams: Fifteen (15) minutes, plus three (3) minutes rebuttal. All others: Five (5) minutes per speaker.\(^2\),\(^3\)

3. Review Programs of the Implementation Chapter of the Comprehensive Plan and Recommend Modifications or Additions

Chair Hechtman: Review program of the Implementation Chapter of the Comprehensive Plan and recommend modifications or additions. May we have a Staff report, please?
Ms. Rachael Tanner, Assistant Director: Great, thank you. So, I’m going to hand this over to Clare Campbell and to Chitra Moitra who will be doing the presentation this evening.

Ms. Clare Campbell, Long Range Planning Manager: Yes, thank you. So, I’m going to run the presentation. I’m sorry, I couldn't find my button for the video. There it is. Good evening, everyone, and I will turn over the presentation to Chitra to do that overview for everyone this evening. Thank you so much.

Ms. Chitra Moitra, Planner: Good Evening, Commissioners. I am Chitra, Chitra Moitra, Planning... long-range planning section. Tonight, we are meeting... and next slide, please. So, tonight we have two meeting goals. First one is to... for the Commissioners to review the status of the individual Comprehensive Plan Implementation Programs and second is to suggest any additional changes or anything which they feel might be missing or any modifications they might consider and make these necessary additions to for Council consideration. Next slide.

So, these two... this report is required by the Government Code Section 65400 which makes every jurisdiction report on the achievement of the Comp Plan Implementation Programs. In April 1st of every year, we have to do the reporting to Office of Planning and Research which is OPR, and to HCD also for the Housing Element programs. So, by 1st of April of this year we have to do the reporting and we go through the PTC in February and in March we go to the Planning or we go to the City Council. And the other requirement... there’s also another requirement, the Palo Alto Municipal Code 19.04.30...030 requires the Planning Commission to review the implementation program yearly. And again, suggest any changes or any additions required to the Implementation Programs. Next slide.

So, this year, as you can see, we have changed a little bit in the review process, and we have introduced a meeting in fall of this year which would be mainly in October/November this year. This time it got pushed back, but anyway it would be in October/November. And this additional meeting gives the Commissioners another chance to look into the programs and review the statute and see if there is any additional required or if anything is missing. So, this gives one more chance and the rest of the process remains the same. We come to you again in February and then to Council in March and do the reporting to HCD and OPR in April. So, I should

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
mention one thing, that you will review the Housing Element policy and programs in your February review and for this, along with the Comp Plan policies and programs. Next slide.

So, the next slide shows the distribution of the Implementation Program by Comprehensive Plan Elements, and as we can see that the Natural Environment Element has the highest number of implemented programs. In total, we have 410 programs. Okay, next slide.

So, if you open up the Implementation Chapter you will see that the chapter contains... it’s a matrix, it’s a table, and it contains the actual program language, what element it comes from and then, in addition, it tells you which is the lead departmental agency; which is who is responsible for conducting the program or implementing the program. The time it will take to finish the program. It might be long-term or short-term. There might be some routine programs and then the other field is the anticipated level of effort required for each of these programs. And this includes the magnitude of the complexity of the programs and sometimes we also consider the anticipatory cost for the... required for the programs. So, that’s how you see those stars in your program... I’m sorry the dollar signs in your programs. And the last field which you see in your... in the report is the last field is called the status of the programs. Staff has added this field and it’s basically telling you the status of each program, whether it is complete or whether it is partially complete. It’s an ongoing program or it has... it’s pending. Next slide.

So, as you can see, this is the snapshot for 2021 and we can see that there are eight programs which are completed. Partially completed at 31 programs, ongoing which is the bulk is 276 programs, and pending is 95 programs. Next slide.

So, over the years I have had this question from Commissioners that can I give full picture? Meaning how many programs have been completed since we are doing this process? So, we started this process in 2018 and I have complied all the completed programs reported to you in all these years. And as we can see that there are 72 programs which we have completed in all, but... and it is about 18 percent of the... of all the programs and in 4-years we have done that. But as I can say that as I have seen that a lot of the reported completed programs in previous years have transitioned into ongoing programs. So, you know, when I... when you... I am planning to develop a matrix which will show you yearly how we have done or which programs were completed and which is the next year. What that program has transitioned into and you’ll

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
get that information next in February meeting but this is the status right now; 72 programs
completed out of 410.

So, and this is... well, I talk about the next steps again. That we come to you with all the changes
you are recommending tonight and we come to you on February... we take that information to
the City Staff. We work with them and then we... if there are changes we will bring it to you in
February and in March we’ll have the City Council review. And then again, the submission to
OPR by... and HCD by April 1st. So, this would be the next step. So, I think this is the... yeah, this
is the end of the presentation and now I’ll be happy to answer any questions you have. Thank
you.

Chair Hechtman: Thank you for the presentation, Ms. Moitra. Before we go to public comment,
are there any questions of Staff by the Commissioners? Alright, seeing none... oh,
Commissioner Lauing. Thank you and Commissioner Chang following.

Commissioner Lauing: I just wanted to ask Ms. Moitra, how do we feel in terms of the
[unintelligible].

Ms. Moitra: Judging for the last 2-years that a lot of ongoing programs turned into pending
because of the COVID and its effects. So, I mean I would say it’s okay, close to 20 percent in 4-
years, and the life of Comp Plan is till 2030. So, it’s a modest progress.

Commissioner Lauing: That’s all, thanks.

Chair Hechtman: Sorry Commissioner Lauing to cut you off. Commissioner Chang.

Commissioner Chang: I had a similar question but a little bit more specific. So, I read that the
short-term programs are intended to done approximately in the first 5-years. And so, we’re 4-
years in and I was wondering out of the 100 programs that are designated as short terms since
the start of this process. How many of those have been done, do you know?

Ms. Moitra: Not off the... no, not right now. I don’t know but I think most of... I mean the
completion distribution... the program completed didn’t follow that short-term, medium-term
because it’s... I think it’s the program and the intensity of the project and the timing. That was
the main attention Staff gave to when completing or implementation program.

**Commissioner Chang:** Thank you for that because that was my second question which is why is
it that some medium-term projects are done before short-term projects? When I thought that
the prioritization was supposed to be short-term is supposed to be higher priority essentially.

**Ms. Moitra:** Yes, I don’t have a good answer for that because most of the time what we see is
projects which have funding goes forward. Projects which are needed more goes forward so if
something was designated as a short-term project might not have been started on time. So, or
City departments are thinking that maybe that project should be done later or something like
that so.

**Commissioner Chang:** Alright, thank you.

**Ms. Campbell:** To offer, if there are any specific questions that you have about a certain
program. You can certainly share with us what those ones might be and we can follow up with
the different department Staff to get a better understanding of why things happened when
they happened. If that’s something that you’re interested in knowing.

**Commissioner Chang:** I actually do have a specific one regarding planning only because it came
before the Commission and so I was like oh, I know that one. So, it was the renter protection
which is a long... you know it takes a long time. So, I understand why we needed to start but
then there’s other short-term ones also assigned to planning that we haven’t started as much.
And so, I was wondering was that a funding issue for renter protection? Is that why that one
was able to get so much more traction than say retail strategy?

**Ms. Campbell:** I think specifically for the Renter Protection Program, we did get a Fellow to help
Staff. So, that was definitely a critical piece for our success of moving something forward. So, we
actually were given a resource to help Staff move something ahead and she’s with us for
approximately 2-years. It will end in February but because we’ve had that additional resource
available to us. We’ve been able to really get some focus and traction going in getting the
renter protections moved forward. So, that was a great benefit for us.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Commissioner Chang: Makes sense and I don’t think I understood. How is she funded? Is it a grant.

Ms. Campbell: It’s a grant.

Commissioner Chang: Fantastic, so it is funding-related then in a sense.

Ms. Campbell: Yeah.

Commissioner Chang: Okay, thank you.

Ms. Campbell: Thanks.

Chair Hechtman: Commissioner Alcheck.

Commissioner Alcheck: So, I… let me ask this question because maybe this is obvious, but is the spreadsheet that’s attached. Is that the sort of what gets created to provide the status?

Ms. Moitra: Yes, yes, the status column is updated every year. So, what you see was the accomplishments for 2021.

Commissioner Alcheck: On the bottom page of Packet Page 13, the very last sentence says the status should include progress in meeting its share of regional housing needs and local efforts to remove governmental constraints. What does that mean?

Ms. Moitra: It’s… I’m just trying to open up the Packet.

Commissioner Alcheck: Is that like a cheeky reference that the local government is the constraint to meeting our regional housing allocation?

Ms. Moitra: Let me check, which page did you say?

1. **Ms. Moitra:** I think it’s a leftover from last year’s comments I guess.

2. **Commissioner Alcheck:** So, does the… does this review include a discussion of progress in meeting the regional housing needs?

3. **Ms. Moitra:** Those are the… those housing programs will come to you in February. So, housing programs are not included in this. So, review of housing programs are not included.

4. **Ms. Campbell:** In this report. Yeah, it will come back in February.

5. **Commissioner Alcheck:** As its own separate report?

6. **Ms. Moitra:** Yes.

7. **Ms. Campbell:** It will be incorporated into the full annual reporting. We just didn’t include it with this particular Packet because as everyone knows. We’re underway with our Housing Element Update and there are things happening there. So, we are saving it for the February meeting to give you that update on the programs.

8. **Ms. Moitra:** Yes.

9. **Commissioner Alcheck:** So, let me ask just a 40,000-foot question which is does Staff sort of approach this report making as an opportunity to give Palo Alto leadership a report card on how it’s meeting its stated goals? Or is this sort of a public relations effort to keep the community aware of the status of the City’s progress in meeting what the Palo Alto leadership has envisioned for them? So, it’s sort of two different things, is this an opportunity for Staff to say here is why we haven’t reached these… achieved these goals? Or is it here’s where we are in the merit of programs that we’re supposed to be implementing?

10. **Ms. Moitra:** I think it’s kind of both because it is a status report on what we have achieved in terms of the Implementation Programs and it does show the leadership that this has been accomplished so.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Campbell: So, the primary purpose of the report is to facilitate the annual reporting that we have to do in April. But certainly, the information that we provide in the reports definitely could be viewed as how are we progressing and how are we doing with our accomplishments? So, it can be used for both purposes. That’s certainly not Staff’s intent. Right now, we’re focused on meeting our requirements for our submittal.

Ms. Moitra: And the reason for adding this meeting, the six... another meeting for in this process is giving the Commission an opportunity to say or review and find out if something is missing or they need something. Some changes if they wish to make in the existing Implementation Program languages or anything.

Commissioner Alcheck: I mean I guess what I would say is that I think when you review the status of 410 Implementation Programs broadly. It’s easy to get caught in the details of each and every program and how they’re succeeding. Like, take... I’ll... let’s just... well, let me just pick one out of... there’s a program with... let’s see, Chamber of Commerce related to vibrance in our retail and commercial zone. So, I guess what I’m trying to say is in a perfect world, this is an opportunity for radical candor with Palo Alto leadership, and so I guess specifically with respect to regional housing needs. Right so I know we’ve spent a great deal of money. I know the Planning Department has been part of the process in for example appealing the Regional Housing Needs Allocation and whatnot. I think there’s an opportunity in this report for... I think one of the things that people struggle with a lot is what is the gap between the Comprehensive Plan statement and the action that really has to happen at the City Council level to maybe sometimes empower items to occur. And so, I know there’s 410 Implementation Programs and that the Housing Programs will come in a different Packet, but they’re... it’s broader than that. The concepts are more vague and it’s opaque. You know, we talk about achieving a goal but we don’t really frequently get an opportunity to have our executives, which I would say is the City Hall Staff. Planning Department etc., the opportunity to tell us what’s standing in the way. And so, when I read that last sentence on Page 13, I thought it would be really interesting to hear from the Staff of the City what local efforts would be required to removed governmental constraints in meeting the regional housing needs and maybe that also applies to other topics that are covered in this program.

And so, my feedback to the Staff would be that there might be opportunities to put pen to paper outside of this... the format of the spread sheet that help connect the dots between what

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
the... what PTC or what City Council can do to achieve a faster success or realization of some of the programs. And it’s more than that because when we design this some of the programs (interrupted)

Chair Hechtman: Commissioner Alcheck?

Commissioner Alcheck: Maybe... yeah?

Chair Hechtman: Sorry to interrupt but it feels like you’ve got really excellent points for the discussion phase of this item.

Commissioner Alcheck: Yeah, you’re right, you’re right.

Chair Hechtman: Rather than... and I know you started with a question but then it’s kind of rolled into discussion.

Commissioner Alcheck: Yeah, you’re right, you’re right, my apologies.

Chair Hechtman: So, I’d like to... no problem but I’d like to see if there any other Commissioner questions. Then go through public comment and (interrupted)

Commissioner Alcheck: I forgot that there’s a whole process here.

Chair Hechtman: Yeah, okay, so thank you. Commissioner Summa, I see your hand.

Commissioner Summa: Thank you. I have a question about the Comp Plan when there’s program or goal... a program that is no longer consistent with how we want to proceed. I don’t think we change the Comp Plan at all until the next Comp Plan is made and but is there any way to... and an example of this would be L-2.4.1. Which is amend the Housing Element to eliminate housing sites of along San Antonio and increase downtown and Cal Ave. Which of course, we don’t anymore... any longer want to eliminate housing sites on San Antonio. In the very short time since that was when I was on the Comp Plan group and that was written we realized we are increasing housing sites on San Antonio. But we don’t change the Comp Plan, right?

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Campbell: You can definitely make Comp Plan amendments as needed. So, you know, I think that’s something (interrupted)

Mr. Albert Yang, Assistant City Attorney: [unintelligible]

Ms. Campbell: Oh, I’m sorry Albert, sorry.

Mr. Yang: I was just going to say, we actually did amend that policy and it’s just not reflected in this table.

Commissioner Summa: Oh, okay.

Mr. Yang: So, this table... that part of the table is outdated but the Comp Plan was updated to say encourage housing sites along San Antonio.

Commissioner Summa: Okay, great. I wasn’t sure how that was handled. And I have another question that might be related and that is underground City utilities. I thought we had abandoned that program because of the expense and that would be L-9.10.1 or we’re... maybe I just am wrong about that.

Ms. Campbell: I don’t know if planning Staff has an update on that. Chitra, do you happen to know any of that detail?

Ms. Moitra: No, no, but I can get back to you. I can find out.

Commissioner Summa: Alright, thank you.

Chair Hechtman: Let’s move then to public comment on this item. We’re going to open the floor for that purpose. Please raise your hand if you wish to speak on this item. On the Zoom App, there’s a raise hand button on the bottom of your screen. If you’re dialing in from a phone, please press *9. Are there any public speakers for this item?

Ms. Madina Klicheva, Administrative Assistant: I see one raised hand from Beth Rosenthal. Beth, we can... we should be able to hear you know.
Mr. [note – male speaker, no first name] Rosenthal: That's an error. I'll sign up for another conversation.

Ms. Klicheva: Thank you.

Chair Hechtman: Alright, so we have no speakers for this item?

Ms. Klicheva: We do not.

Chair Hechtman: Alright.

Mr. Klicheva: I... sorry, one... I see one raised hand right now at the moment. Cindy Chan, from Cindy Chan. Ms. Chan, you can unmute yourself and you have 3-minutes.

Ms. Cindy Chan: Thank you so much. Thank you, Commissioners, for this opportunity to speak. I live on Emerson Street very close to the Castilleja campus and I want to express my appreciation for the garage options presented to you this evening.

Chair Hechtman: Ms. Chan, excuse me? It sounds like you are wanting to speak about Castilleja rather than the Comprehensive Plan review. If I have that right then you're just a little early. That's our next agenda item.

Ms. Chan: Great. I lowered my hand barely... it didn’t come off your list. Sorry about that.

Chair Hechtman: No problem. Make sure you raise your hand when we call for the public comment on the Castilleja item. Thank you. Alright, another members of the public want to speak to us on this Comprehensive Plan item? I expect many of you are here for the Castilleja item which is coming up next and will want to speak then. So, I'm not seeing any other hands from members of the public. So, let me conclude the public comment opportunity and bring it back to the Commission for discussion. So, I see hands from Commissioner Alcheck and Commissioner Summa. Commissioner Summa’s hand is down. Commissioner Alcheck, is that a ghost hand?

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers. 
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson's presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually. 
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Commissioner Alcheck: Yeah, I can just finish my thought quickly which was I think that some of the... first, I’ll give you a perfect example. We have this program to encourage contact with the Chamber of Commerce to better understand needs for increasing vibrancy in our commercial retail sector. And it would be interesting to understand whether there was an action the City could take to empower the Staff to be able to succeed at that Implementation Program further. That may be a bad example but maybe it’s like if this is a high enough priority and Staff is struggling to really succeed here. We could really use resources to... maybe a specific authorization for X, right?

So, I guess I’m using that example in place of housing but I do think that it would be... I think because housing sort of rises to such a high priority in our community consistently. I think this is an opportunity to say okay, here are the governmental constraints that are really impacting us and to give us the feedback. Because I think we do a lot of work on getting these programs drafted and then it’s really unclear whether the Staff is really equipped or I guess better word to use would be armed to achieve success. And it would be interesting to understand that perspective so that’s all I have to say on the topic.

Chair Hechtman: Commissioner Chang.

Commissioner Chang: Thank you. So, I echo some of Commissioner Alcheck’s thoughts but as I was looking through this. I was thinking about the sort of self-imposed deadline that we have to attempt to approximately finish some of the short-term items in 5-years. And so, I scanned the spreadsheet and said what are we doing or what have we not started that doesn’t have a reason for not starting right because some of them are obvious. For example, the pandemics of... if needs to be a pending item and so it was hard to do that and hard to... so I guess the first comment is that it was hard to get a sense of the big picture status of where we are and are we on track. Which is why I think Commissioner Lauing and I asked that question because as presented. I had to do a bunch of digestion to kind of zero but then the reason I wanted to understand that is to figure out where the gaps are and to say oh, is that an intentional? Make some comment on is that an intentional reprioritization, either high or lower priority, or not? And so, because it was hard to see the status and the gaps. I’m not sure I’m giving the best comments that I could.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
One of the thoughts I did have was as I looked at some of the short-term things where we haven’t started or we’ve just started. A lot of them did center around retail strategy and I thought that I would just put my two cents in for saying that that’s actually I think something that might deserve to have a little increased priority. Primarily because of the situation that we find ourselves in because of the pandemic. So, some of the work that we have done thus far is around uplift local, but that was kind of reactionary, right? That was done because of the situation and yet we know when applicants have come before the PTC for example. That it’s been hard for the PTC to respond or hard for the City to respond because we don’t have an overall retail strategy. And I know that’s something that the City has talked about wanting. Now, maybe the funds to do that aren’t there yet but I would say that in that case, we need to tell City Council like if this is… if this really does remain a high priority for you. Then you’ve got to put something towards it because we simply don’t have that expertise in the City based on some of the discussion that we had when an applicant came before us. And I think that again, it is particularly timely because of the dramatic change that has happened. That it is an opportunity, so that’s my two cents. Thank you.

Chair Hechtman: Vice-Chair Roohparvar.

Vice-Chair Roohparvar: I just had just a basic question to understand processes and it’s for City Staff. Is there... do you guys engage in resource planning upfront and regular check-ins with City Council to let them know and prioritization like you would see in a corporate environment? I mean how does that work I guess behind the scenes? I mean I know we do the budget but do you have opportunities to... does my question make sense? Ms. Moitra or?

Ms. Campbell: So, I think for every... so every department has its own set of programs and policies and projects. So, I think it’s going to... I couldn’t speak for every department. So, based on each department’s priorities and budgets. They’re going to work to see what can be adjusted and reprioritize different goals and purposes. So, I don’t believe... I mean and we’ve got mid-year budget process, we’ve got the annual budget process. But I think primarily those are the things that we... that’s the process we use to find the money and reprioritize things as needs change with each department and our projects.

Ms. Moitra: [unintelligible](interrupted)
Vice-Chair Roohparvar: And [unintelligible]... sorry go ahead.

Ms. Moitra: And I can add that when the different departments decide on the different CIPs. That’s taken into consideration. The budget, the resources, the timing, etc.

Vice-Chair Roohparvar: And then do you guys have opportunities to give feedback to City Council so that your... you know if something hits or so you can be agile or is it only through these formal processes? I’m not... I’m just curious as to how it... how much dialog is there and how much feedback and efficiencies and adapting exist?

Ms. Tanner: So, maybe I could just add, I mean I think... it may be not what you’re asking but if we don’t have Council authority to do something. We can’t do it. Now that authority could rest in the Comp Plan that’s adopted by the Council and is set as policy. But also, if we don’t budget, we can’t do something so it kind of depends. If it’s... you know some times things require existing Staff resources and so, for example, let’s take tenant protections since we’re talking about it. If we had had Staff available, maybe we could have looked at our work plan and said okay. We have this year we have some Staff available to do that. Let’s assign it but we didn’t have that until we got the grant that was specifically for that. And then we say well we’ve got both Colleagues Memoranda and we’ve got Comp Plan saying that we should work on this. Let’s... and we’ve got this opportunity to for funding, everything aligned, but even again there with those grants. We do need Council approval to get the grant to go pursue the money to receive the money.

So, I think it is flexible to some degree but what... we cannot act unilaterally unless there is direction from Council to carry out a project. And that authority can rest in different documents and can come through different channels depending on what the project is and what level of authority would be needed to carry that out.

Vice-Chair Roohparvar: Yeah, I know, completely, and then it depends on whether you get funding and whether you have resources. And then prioritization changes based on is the funding... is the Staff time available and then you know that’s a go or not.

Ms. Tanner: And then of course things like pandemic and other things that over take all of our plans come to the floor and may be something that needs to get addressed more immediately.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson's presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Even if perhaps to Commissioner Chang’s point, something in 2017 when the Comp Plan adopted seemed like it was the thing to address immediately. As time goes by, other things may rise to the forefront of the Council’s agenda and then thus to the forefront of our agenda.

Vice-Chair Roohparvar: o they drive the decision on prioritization or does Staff have ability to operate and act depending upon (interrupted)

Ms. Tanner: Well, I think if we’re talking about specifically about the Comprehensive Plan. You know, we’re really taking it from that Comp Plan and so certainly, Council may take the Comp Plan to inform their budgeting and priority decision. But each year they also do their own prioritization of their top four priorities and so I don’t know if that’s a specific answer to your question but.

Vice-Chair Roohparvar: No, that’s makes sense. They set the overarching and you guys do the details. Okay, thank you so much.

Chair Hechtman: Let’s see, Commissioner Alcheck can I have lower… have you lower your hand if you’re not wanting to speak again. Then let me call on Commissioner Summa.

Commissioner Summa: Thank you very much. So, I’ll preface my comments with saying I’m sure we would all like to do all of this, or we have but understanding that it can’t all be done and can’t all be done at once and it depends on funding and resources. But I thought there were a few things in here that hadn’t been started that would be interesting to look at with regards to housing issues that we’re working on. And a lot of housing-related items in the Staff comments have been incorporated into the Housing Element discussion. But L-2 4.6, which is explore changing the transfer of development rights for… so they can only be used for residential capacity was something that would be interesting for the Housing Element to discuss in the pursuit of more housing in downtown.

And there also seemed like a tri sort of, of parks, dedicating parks, and finding more money for parks and… by In-Lieu Fees. And basically, under Community-4 that I think are also very related to housing and development issues since we already are under-served by parks. And that was such a big topic that everyone really agreed upon in the NVCAP and a couple other specific ones I wanted to mention.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
There is L-6 3.1 which is bird guidelines for design-friendly building. I mean bird-friendly building design and I thought that one, which is slated to begin in 3-years. I thought that one might be a relatively quick one because I know that a lot of standards and best practices for that already exists. So, that could be one I thought could be knocked off quickly, and then another one that I think is important and should be done in a more timely fashion would be L-7 1.2 which is reassess Historic Preservation Ordinance, etc. That has not commenced and I know that is long overdue. And I also think that has a lot to do with some of the development that we’re going to be seeing in downtown in terms of identifying buildings that the... that are historic assets.

So, but I know that we can’t do everything we want to do but those were my general observations unless we’re going to be going through this page by page, the matrix. Thank you.

Chair Hechtman: Commissioner Lauing.

Commissioner Lauing: I just had one quick thing to add. There’s overlap between a couple of the other Commissioners. I [unintelligible] 2.2 talked about evaluating [unintelligible] (interrupted)

Chair Hechtman: Commissioner Lauing, sorry, when you turn away we have a hard time hearing on your microphone.

Commissioner Lauing: So, L4 2.2, which is (interrupted)

Chair Hechtman: Did you say 2-2? L4 2-2? Can’t hear you.

Vice-Chair Roohparvar: Yeah, it’s cutting out for me too.

Commissioner Lauing: L4 2.2.

Chair Hechtman: Okay, L4 2.2.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Commissioner Lauing: Yeah. The only thing I wanted to mention is that the comment section says the Office of Transportation continues to assess parking in the California Avenue District. Which I don’t know how that relates to formula retail so I just thought you ought to check that out Chitra.

Ms. Moitra: Okay, I will do.

Chair Hechtman: That’s all, thank you.

Chair Hechtman: Other Commissioners? Thank you, Commissioner Lauing. I have a few questions. The first one, of the 410, are any of them new for 2021?

Ms. Moitra: Yes, few are... some are... eight of them are new. The completed programs you are asking?

Chair Hechtman: No, new. In other words, that last year when or in February we saw a list like this and I’m asking now here we are in December, are there items on that list that weren’t there in earlier in the year?

Ms. Campbell: No, the 410 programs haven’t changes. So, they’re the same programs that were in the original adoption of the Comprehensive Plan.

Chair Hechtman: Okay, right, and then this is more of I guess a comment than a question. I find the relationship between ongoing and completed confusing because it seems like some of these programs you get them started, and so, they’re I think on-going or maybe they’re partially completed, but it’s after they’re completed then they’re... they don’t just stay completed. Some of them become ongoing and I’m wondering if they’re... is that nomenclature somewhere required or is that our choice and can we do better to help people understand where things are in this arc?

Ms. Campbell: I’ll try and respond to that. I think Chitra might have had some technical difficulties. So, you’re absolutely right, I think we struggle because one day it’s complete and then it turns into ongoing but wait a minute, it should be complete. And so, we’ve kind of

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
struggled with this too and I think as we’re... with each year of doing these reports we’re learning more and more about how to better report out on things.

So, I think one of the things that we need to do is we need to have a better understanding of what each of these statuses mean and to make sure all of the different departments involved are consistently using the same approach. Because we’ve noticed... Chitra’s noticed this that different departments are calling it one thing when... and they don’t quite get it. So, I think that’s something that we’re working on as we refine this process. So, I totally understand why it can be confusing how we change it from pending, to complete, and then it becomes ongoing or then it’s partially complete.

I think one of the situations that Chitra mentioned for one of these programs is that its funding had changed for a program. So, initially, it was ongoing but then it became pending because the department... you know they had budget issues and they put it on hold. So, I think that’s... these are the nuances that make it pretty tricky for us to report out with absolute clarity. Like this is the status of each program and it’s basically going to keep changing every year. So, you just have to kind of... and we call it a snap shot and that’s how I think we’re going to look at it for each year that we do something to show what’s happening currently. I hope that explains it a little bit.

Chair Hechtman: Yeah, thank you, thank you.

Ms. Moitra: Sorry, I was disconnected.

Chair Hechtman: Did you want to add something? Did you hear the question? Do you want to add something?

Ms. Moitra: No, I didn’t hear the question. I was (interrupted)

Ms. Campbell: I think I got it.

Ms. Moitra: Okay, Okay.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Chair Hechtman: Yeah, I think we got a good answer from Ms. Campbell and I appreciate that you’re sensitized to this. It is a newish and evolving process and so (interrupted)

Ms. Moitra: Yes.

Chair Hechtman: It sounds like you’ll keep working to refine the language as we move forward.

Ms. Moitra: Yes.

Chair Hechtman: Alright, the next question I have is this is now a semi-annual process. You’re going to bring it to us twice a year rather than annual process and I was curious why is that so? Why have we made that change? Who’s idea was it? Was it PTC? I didn’t remember it but it might have been.

Ms. Campbell: So, I think I’ll speak to that. So, it is meant to be an annual process and what we’ve done is we’ve just added an additional step in that process. And this was based on a request that was made early on by the Planning Commission. I don’t know which specific year it was but there was a request made by the Planning Commission to say that hey, we want to have a better opportunity to take a look at these policies and be able to provide more impact. I mean not impact, more feedback on these different programs because when you do it in February and you go to Council in March. There’s no opportunity really for us to do anything with that and we have to meet our April deadline. So, the idea this year is we took the time to incorporate this additional kind of meeting... pre-meeting we’re going to maybe call it or something like that where we can get your feedback. Take your feedback, talk to the different departments to see what we can do to address those comments, come back in February to see what we’ve changed, and then carry that forward into the Council meeting. So, that the overall reasoning behind why we changed it or why we added this additional step.

Ms. Moitra: And we do understand it’s a huge volume of information and one session is not enough to go through that so.

Chair Hechtman: Thank you for the explanation. So, and I suspect the... and maybe one of the Commissioners who's been here on the PTC longer than me might remember the origin of this. But I guess I find myself questioning the efficiency of dealing with this twice a year. I definitely

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
appreciate the problem of bringing it to us in February and Staff not really having time to react before it has to go to Council and get approved. One possible... an alternate way to handle that is to basically back us up. Instead of bringing it to the PTC in February, bring it earlier, December or so. Whatever but what strikes me is first of all, because there’s not really a lot of action here for the PTC. There’s not a lot we can do and... but it takes a lot of time for the Staff to put this presentation together, the public who’s listening to it, and of course, you’ve got seven Commissioners who are reading or studying 410 items. And we’re doing it twice and so I’m interested if any of my fellow Commissioners have any thoughts about whether we should... again, this is an evolving process. whether we should try this twice a year for a couple years or maybe do something different. Just back off the February by a month or two.

Ms. Moitra: The only issue is this is a yearly snap shot, so it’s from January to December. Mostly the snapshot so if we go in earlier than February, we might not capture the whole year’s accomplishment.

Chair Hechtman: So, what snapshot have you given us now? Is this from last January?

Ms. Moitra: No, no, no. This is... Staff worked on it in November... October and November. This is what you are seeing in the attachment.

Ms. Campbell: And it is from January.

Ms. Moitra: Yes.

Ms. Campbell: It is from January to like October/November and so we would need to just do our finalization of the status for the next report. And we’re not really anticipating it to really change because it’s probably not going to.

Chair Hechtman: Again, I’m just curious if there’s any Commission feedback on whether they like the twice a year or we should look at something different. Commissioner Summa.

Commissioner Summa: Well, I guess I don’t mind trying it twice a year because that’s not the way we’ve done it in the past and I don’t recall which Commissioner it was or which... how many Commissioners. But I do sort of remember that we felt like we were rubber-stamping
The Chair may limit Oral Communications to 30 minutes for all combined speakers.

Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Chair Hechtman: Commissioner Lauing.

Commissioner Lauing: That’s actually correct. It was requested by a Commissioner, I can’t recall which one either. I think your plan could work fine Chair Hechtman, in the December timeframe as we’re getting it right now, so I’d be down with that too.

Chair Hechtman: Any other Commission comments on that particular idea? Commissioner Chang.

Commissioner Chang: I would say that if the information present to us stays in this format. Then because it is so difficult to digest all those items. It's fine... I think that your proposal Chair Hechtman is fine. If the goal was to have us look at it earlier so that we could assist with any reprioritization. I don’t know... I think I need the data digested one step further or something. You know like may by department, this is the status or by sort of my initial question for the short-term ones. How many have we done in combination with kind of some Staff commentary about these are the buckets of things that have been reprioritized. These are the buckets of things that or these are the things that have not actively been deprioritized but we haven’t been able to do because of X, Y, Z. So, that then we could say well that’s bad. We need to raise that to City Council right now and get you some funding or something like that. But as… which I recognize would be significantly more work.

So, unless we’re given something a little bit more information about whoa, this is where we need to help or this is where we see things going off the rails. It’s hard for us to react to it.

Ms. Tanner: I would just offer that I don’t think that this is where Staff are going to be… and I mean Staff as in the entire City Staff are not using this document to raise flags to the PTC or to Council about priorities. So, really this is question if you, as Commissioners, have questions or want to know more about specific programs. You’ll have to direct us, we can get that information to you at the next hearing. There’s not possible for us to look at 400 plus programs and do analysis on all of them. So, really, I think to Commissioner Summa’s point, the reason we broke this up is because before it was essentially was kind of a rubber stamp hearing. There was

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
not an opportunity for question, there’s no second bite at the apple, we’re under a deadline. We just got to approve it and that didn’t feel fair or really robust. So, if from today, like you made some suggestion Commissioner Chang about suggesting that Council prioritize the retail items. That’s something and then other Commissioners made comments. That’s something we both include in our Staff report that we bring back to you to reflect what your fellow Commissioners heard. So, you can think about oh yeah, I want to support what Commissioner Chang said and then that would go forward to City Council further in the report to them. So, we’d report on here’s the spread sheet and also the PTC would recommend that Council prioritize these retail items in the coming year. Prioritize some of these other items in the coming year or likewise, at that second hearing that we have in February. If there are some items that you want to dig a little deeper in with the Staff of those departments. We can have them here, but we could also take the questions today or after. You could write them in an email to us and have those questions answered in that Staff report.

So, that’s kind of why we wanted to bring it here to get that generated, so that when we come again. It doesn’t feel like just well, oh well we got to say yes to it and feel not so kind of robust as we would want the discussion to be. Hopefully, that’s helpful.

Chair Hechtman: Commissioner Chang, do you have more? Okay, thank you Ms. Tanner for responding to that. Commissioner Alcheck?

Commissioner Alcheck: I would add that I think... so my view is that it’s never a bad thing for the Planning Commission to interact with the with Comprehensive Plan topics. And I think, especially now that the PTC isn’t as involved in the drafting of the Comprehensive Plan. I think because it was... it’s being taken on by Committees as opposed to the first time that I joined this Commission. We broke into pairs of two and we all worked with Staff to draft the... Chitra remembers that. So, we drafted... we... I should say we... we edited really the drafts of the Comprehensive Plan and I think that when we use to do this and it would come before us. For some people, it was like the first time they really appreciated the merit of programs that where intended to be implemented and I think we realized two things. That number one, the nature of the PTC is to be really a close advising body to the City Council. And so, to the extent that there are programs that you can spend a little more time understanding and looking into and asking questions about, and then that might inform how you communicate with the City Council I think helps.
So, I concur here with Commissioner Summa here that I think that if we had done the inverse. If we had met in April or February, whatnot, and there’s just been this whole thing and we were asked to indicate our satisfaction with the report. I think a number of you would have been like well what... we don’t even know what... I mean how does this work? And so maybe when this... maybe the appropriate setup here is... and this is what I said in the beginning which is I really think that there’s an opportunity here for Staff to indicate to the Commission where they think things are not just we are 40 percent complete on this program. But where they think the program is working or not working to the extent that they are empowered to achieve the result that was desired in the vision; sort of a different concept. It’s not... maybe the program is being executed as intended but it doesn’t serve the vision as it has evolved maybe. And then PTC Member can say okay that’s really interesting. Can you give us more of this or that and then when the meeting comes back the follow-up meeting. PTC could say you know I would encourage City Council to consider how to better achieve this vision goal etc. because maybe this program really isn’t the best tool. And that way it’s not like a document that really doesn’t adapt over time but it becomes more evolutionary. Anyways, that’s the thought.

Chair Hechtman: Thank you, Commissioner Alcheck. So, this... again, this is a... Staff is trying sometime... oh, let me finish the comment and then I’ll go to you, Commissioner Summa. So, Staff’s trying something new in response to one or more prior Commissioners suggesting it and so I think we’ve had some good feedback here. I don’t think we have to, as a Commission, make a decision. I think what we’re doing is helping Staff, in the long run, develop the best process.

So, I wasn’t really wanting a prolonged conversation on this. I don’t want this to hijack the meeting so Commissioners, you’re welcome to add more on this topic but what I was trying to achieve, get some thoughts going to Staff, I’m really happy with. So, Commissioner Alcheck, if you can put your hand down if you’re done and I’ll call on Commissioner Summa.

Commissioner Summa: Quick question for Staff and I think it was our attorney who answered my question about housing sites on San Antonio saying oh, that’s already been amended. Do those amendments... when those amendments occur in between big cycles of the Comprehensive Plan. Do they come to the Planning Commission?

Mr. Yang: Yes, they do.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Commissioner Summa: They do, okay. So, I should of known that then I guess but thanks. I was just want to check on that.

Chair Hechtman: Vice-Chair Roohparvar.

Vice-Chair Roohparvar: Super quick and I don’t think you were here Commissioner Hechtman [note – Chair Hechtman] but I recall when it only came before us once. It really did feel like a rubber stamp and Commissioners raised questions and they were basically told by Staff like thanks, that’s great context. We can’t do this so I... because of that I think it makes sense or if we could pull it forward and have one meeting or if it’s practical to do that. That way we can give input and with respect to what Commissioner Alcheck said about Staff being empowered to comment on the specific projects and prioritization. Well, it sounded like Ms. Tanner was saying they’re not resourced to be able to do that in this process but maybe a compromise could be overarching like two or three couple bold points like by the way, guys. I know that climate change was a priority for you but we’re kind of off track here. You might want to think about that if possible and if there are major alarming overarching issues to flag to solve the resource issue Ms. Tanner raised as well as the issues both Commissioner Alcheck and Commissioner Chang raised. That’s it, thank you.

Chair Hechtman: Thank you, Vice-Chair, and then I have one other request of Staff when you do bring this back to us in February and then thereafter whether it’s annually or something else. It would be really useful to me if I could see in this long spread sheet what’s changed from the last time we looked at it. Because then I can really... at least that can be one of my focuses is to understand just what’s different from the last time we studied this. So, I don’t know how easy or difficult that is and I’m not looking for anything elaborate. But just some way to help us see because to me that... what’s changes is I’m hoping will show me what’s progressed and that would be useful information.

Ms. Campbell: So, Chair, could I just get a little bit of clarity on that. So, you’re saying maybe regards to the status like what’s changed and why or something like that?

Chair Hechtman: Yeah, yeah, that simple because what I’m not looking for is a progress report on all whichever of the 410 are ongoing, and here’s what we did this year. I’m not looking for...
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Chair Hechtman: Alright, anything further from the Commission or Staff on this item? If not then I’m going to thank Ms. Moitra and Ms. Campbell for a thorough report and for a lot of effort to maintain this list and update it. And to my fellow Commissioners for a robust discussion of it and I am going to... so that’s going to concluded Agenda Item Three. We will now move to Agenda Item Four which is a public hearing/quasi-judicial/legislative review of the Castilleja School’s conditional use permit and variance per council direction March 29, 2021, and review of a draft ordinance per council direction amending Section 18.04.030 regarding definition of gross floor area in the R1 zone for below-grade garages. The Zone District: R-1(10,000). Environmental Review: the Final Environmental Impact Report (EIR) was published July 30, 2020, and the draft EIR was published July 15, 2019.

Commission Action: Motion by Summa, seconded by Templeton. Pass 7-0

Commission Action: Motion by Lauing, seconded by Summa. Pass 7-0

Commission Action: Motion by Chang, seconded by Summa. Pass 4-3 (Noes: Alcheck, Hechtman, Roohparvar)

Commission Action: Motion by Lauing, seconded by Chang. Pass 7-0

4. PUBLIC HEARING/QUASI JUDICIAL/LEGISLATIVE: Review of the Castilleja School's Requested Conditional Use Permit and Variance per Council Direction March 29, 2021, and Review of a Draft Ordinance per Council Direction Amending Section 18.04.030 Regarding Definition of Gross Floor Area in the R1 Zone for Below Grade Garages. Zone District: R-1(10,000). Environmental Review: The Final Environmental Impact Report (EIR) was Published July 30, 2020 and the Draft EIR was Published July 15, 2019
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Chair Hechtman: Commissioner Chang.

Commissioner Chang: Yes, I also received the binder from PNQL but in addition, a group of concerned neighbors met with me.

Chair Hechtman: Commissioner Lauing.

Commissioner Lauing: I received that binder on my doorstep but didn’t have any meetings.

Chair Hechtman: And Commissioner Alcheck.

Commissioner Alcheck: Just for the sake of clarity, I did not receive a binder on my doorstep or otherwise. So, in case the impression is that all of us got it I am really unaffected.

Chair Hechtman: Thank you, Commissioner Alcheck. I had a Zoom meeting with the attorneys... two attorneys for the applicant during which we... they reviewed with me elements of the documents that had been presented to the City. The parking garage plan and the TDM program. So, they didn’t provide any information to me during that meeting outside the scope of the information that they have presented now or in the past to the City. Any other disclosures? Did we hear from all Commissioners?

Ms. French if I forget, I do believe that Ms.... Commissioner Templeton will join us in progress sometime after 8:00. And so, it would help if I do forget to ask her for her disclosure somebody please remind me.

Alright, with that let us move into your Staff report, Ms. French.

Ms. French: I’m going to share my screen. Give me a moment. Is everyone seeing this? Could I get a confirmation?

Vice-Chair Roohparvar: Yes.

Ms. Tanner: Yes.
Ms. French: Okay, thank you.

Commissioner Lauing: Yes.

Ms. French: I want to avoid technical difficulties. So, it’s December 8th, we’re back. Most of you were here back in 2020. I think we have one new member, Commissioner Chang. So, tonight’s presentation looks like this. We will do an overview of what the Planning and Transportation Commission did in 2020, what the Council moved and directed in March of 2021, and we’ll cover a few of the discussion topics in the report. We’ll get a little update about last week’s ARB meeting and overview of a couple of these parking options, two among the five, and talk a little bit about Gross Floor Area and the temporary campus alternatives. The applicant will be presenting and include focused comments on the Transportation Demand Management Plan and the community of course will have the opportunity to give testimony. We’ll ask the Commission to provide input and then we’ll get a continuance to a date uncertain.

So now for an overview of 2020. These are the Planning and Transportation Commission’s recommendations on the Conditional Use Permit and Variance. There were the findings were split on Finding Two and a majority vote on Finding One for the Conditional Use Permit. The Variance did receive four members recommendation for approval of the Variance. There were discussions with both of those regarding the subterranean parking facility or garage and discussion about the interpretation relating to that.

Then in March the City Council met and provided motions at two of their meetings. One on March 15th and another set on the 29th. On March 15th, there were three motions, A through C. On March 29th, A through I and these were noted in the Staff reports to the Planning Commission and ARB. The ARB really was addressing Item E which was adjustment to the building as well as some other items, B through E, that have ARB oversight. And then the Council did initiate a Text Amendment regarding the concept of counting below-grade parking facility as Gross Floor Area towards the Gross Floor Area for a project in the R-1 Zone that is non-residential on a large parcel such as this. So, and also, to count parking garages that provide more than 50 percent of the Gross Floor Area. And then there are some other items, A, B, and H that were directed to the Planning Commission and we’ll talk about these in the coming slides.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
So, Item A was about enrollment and basically, the increase would start at 450 students and move up from there and just noting that the 2020 school year, the enrollment was 426 students as verified. The Planning and Transportation Commission is asked to identify a procedure to allow Castilleja to further increase enrollment up to the requested 540 students in phases. So, there’s some items here that relate to the Mitigation Measure 7a from the Environmental Impact Report and based on the Transportation Demand Management Plan. So, there is some... the key thing is no new... net new trips. That’s a Condition of Approval and something that Planning and Transportation Commission initiated in its review.

So, these are some of the other items. The related items to Motion A regarding TDM, regarding reviewing the increases as a percentage, regarding evaluating forming a TDM Oversight Committee, and the fourth one about the reduction of required parking based on a robust TDM.

So, the Item B about parking reduction was to direct the Staff and the Planning and Transportation Commission to review an underground facility that allows a maximum of 50 percent of the required onsite parking to be below grade without counting against the project’s Gross Floor Area. And then a further motion to not have more than 50 percent of the required parking below grade. So, in the case of Castilleja with 104 spaces required per code based on the number of classrooms, 52 is the 50 percent number that would be allowed below grade per Council’s motion. So, the applicant did respond to this with five parking options and as well a parking adjustment request. The two options ARB looked at last week and found favor with where Parking Option E which has tree preservation advantages and that comes with it a 14.4 percent parking adjustment. And then Parking Option D, which is the applicant’s preference, would include 69 spaces below grade and then adjust parking by 9 percent.

Here’s another motion, the rest of Item B, which again relates to Item B but is about a potential for Residential Parking Program or alternative parking strategies and enforcing the parking restrictions.

Then Item H was about events. Again, the Planning and Transportation Commission recommended the 74 events I believe and this is to look hard at those and see if there’s a way to reduce those to between 50 and 70 events. And then with no Sunday events which is already part of the project and the five major events stay.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
So, this is just briefly what the ARB purview included was again the building modifications. They looked at the two parking schemes or they looked at five parking schemes and ended up supporting two of those. And they also looked at the additional tree protection measures the applicant responded with. Urban Forestry became quite involved and we got a third-party arborist that the City retained to study and work on this trees. Then also the construction phasing was a motion that the applicant responded with alternatives to the placement of the temporary campus on Spieker Field.

So, the Text Amendment, the Text Amendment is the Attachment A to your Staff report and it responds to the motion by excluding the portion of the garage... a garage with 50 percent of the Code required parking spaces. And then if the garage were to have more than 50 percent of the spaces then the entire garage would count. That’s how the ordinance is set up currently and then it’s... and then specific to 50 percent below-grade parking. It was narrowly drafted so it only applies to two properties. The other property is a large property on Cowper that... I should say the other R-1 property that is 6-acres or more is along Cowper Street and contains a church and a school and a non-profit. So, it would affect that property as well except for the drafting of this which talks about a historic resource and that other property does not have a historic resource. So, the PTC could further refine or look at the wording of that ordinance.

So, then we come to our second discussion topic enrollment and when we went to the City Council we had a package that said 490 students could be enrolled at the completion of the garage. And then going up from there by 25 student increments until the... all of the buildings area constructed, the temporary buildings are removed, and then still going by 25 students a year until 540 students. Noted here is what the Planning and Transportation Commission recommended. This was this 4.e Condition that talked about no enrollment increase until the Performance Standards of Condition 22 are met and three prior reporting periods so and it gave an example about how that could happen. So, this is a very dense slide, I apologize, but tried to capture here the Condition 22 with its reporting periods that precede the year and what that would mean if the applicant was successful in meeting the criteria; which is no new net trips for the am peak, 440, and no exceeding the average daily trip totals of 1,294. So, really with this one, the Council motion said to make the first increase to 450 students and it wasn’t tied to the parking garage construction. So, then the question asked is, is this reporting structure appropriate? The Planning and Transportation Commission had discussed mechanisms, phased enrollment increases, and these were tied to the milestones of construction. And there were...
the Mitigation Measure from the... 7a from the EIR had some measurements there, Performance Standards, and had quite a list of TDM measures that would be placed if the trips were not met. And there were other conditions such as public hearings required for persistent violations and then reducing enrollment of course as a hammer there. So, Council didn’t seem satisfied with these approaches and asked us to continue to sort out this system. I think the concern was that it was just once it was found that there were some violations or infractions. It would be too late to reduce enrollment because students are given a heads-up about their enrollment for the coming school year. So, the concern is that the City would not be able to cure the whole year and reduce the number of students. So, this is a topic we can return at the end.

Moving on, the TDM plan, we had quite a number of measures. We had the Condition 22 again and there were a number of elements of the TDM Plan and then we also received an updated TDM Plan with the applicant addressing the Office of Transportation’s comments and questions. And also, the applicant submitted this parking supply and demand study that didn’t consider the reduction from the TDM Plan implementation. So, this is just a chart from that. So, the TDM Plan did include all elements of the current plan at the school. And then included the mitigation measures, the 7a, as appropriate, and then other enhanced programs to achieve no new net trips. This is a lot to read, I’ll let it linger here. We can come back to this if anyone would like.

The next piece of it was motions regarding the Residential Permit Parking and how the applicant might provide the public art via on-site and funds. There’s really no need to give feedback at this point or a recommendation. Especially not on the public art, the applicant has addressed willingness to do that half and half for the art.

Then the next item was special events. Again, I covered that at the beginning. We’re at five events for major, here they are. There are no Sunday events. This reconsideration of 50 to 70 events, Castilleja did submit a list of events that they were looking hard at, considering. Could they be eliminated? This kind of thing but they note that it’s going to be impactful to academics, social and programing needs. The applicant also provided a list of comparison schools. We don’t really have time to get into that tonight but that was looking exhaustedly at conditions and hours of operations etc. The Staff recommendation is based on Staff’s earlier analysis that 70 events along with the five major events and no Sundays. So, we’re looking to

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
try to draft Conditions that are responsive to Council and minimize the event-related impacts to the neighborhood but also balance Castilleja’s interest. So, these just briefly were the I think 10 here events that Castilleja consider for elimination. As you can see they’re pretty seemingly important to the program. The applicant can speak better to this and they have in their submittal.

Then just briefly to cover the ARB. We do have Chair Thompson here. I’ll just briefly go over this as she might want to elaborate further or if you have questions for her she’s attending the meeting. So, this was last week the ARB was directed by Council to review an academic building that reduced by 4,000 and change square feet and reconsider the massing and compatibility of the design with the neighborhood. And so, the ARB did review the changes that were made. There were changes to improve the tree protections as well as the Parking Option E and the applicant’s preferred Option D for the parking alternatives. So, quite a few things were done. It was a successful meeting as far as, you know, we did receive feedback from the public and the ARB had their chance to weigh in at their first meeting on this. There were three out of two members supported making further modifications as the Council has asked for that effort on the Kellogg side.

So, and briefly the ARB discussed the construction phasing. There was an alternative to put a temporary campus on the circle instead but that was a much longer 58-month schedule opposed to the 34 months by using Spieker Field. As far as an offsite alternative, there was no offsite location proposed or studied. Just an idea but that’s up to the applicant to if that’s to be explored further.

Briefly again, we have this consultant report. We had a third party to laser count all of the existing buildings on the campus and it came out that the existing campus is larger based on the... primarily on the volumetric space which is second and third-floor equivalent space. And this is present in the fine arts building and the gym. So, when the fine arts building is removed and the new building would be constructed. The... it turns out that the result is less than the square footage on... to be removed.

So, then again, the parking options I was talking about earlier. This is Option D that shows the 69 spaces below grade and the same number as in the original or in the Project Alternative Four which is 26 at the surface. That comes with a 9 percent parking adjustment and then this is the

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Option E where there are 11 added spaces at the surface to the 26 that were previously proposed. And then meeting the Council’s directive to only place half below grade and that comes with a 14 percent parking adjustment.

This is just basically shows why tree... why Option E is on the table. In addition to these 11 spaces, there’s the saving of this tree, 155, that’s in a planter, and some other trees improving on their tree protection zones.

So, this was the final bit which was again, this is the Spiker Field temporary campus. The ARB’s purview is to look at phasing of construction. The Conditional Use Permit relates to the project as a whole so this is within both purview of the Planning Commission and ARB.

Here is a slide that provides the areas that we, Staff, would suggest that Planning Commission focus. So, again we have the draft ordinance and we’ve taken an approach, and there are other approaches. As far as the enrollment, guide us, any guidance how to go from 450 to 550. We don’t have increases tied to construction milestones. Is all about meeting the trip limits but is there anything else possible that we’re not thinking of? The TDM Plan measures, are there additional measures that aren’t in the updated TDM Plan that we should be thinking about? How about the RPP, if there’s thoughts about that versus the time of day restrictions? The special events, again it’s going to be Council’s call. Is there anything the Planning Commission wishes to add there and same goes for other items if you have other items? So, I can bring this back up at some point. I am concluding however and I would like to stop sharing my screen. Was I successful?

Chair Hechtman: Alright (interrupted)

Ms. Tanner: Yes, thank you, Amy. I think now we’ll hand it back to the Chair and he may call up the applicant I believe.

Chair Hechtman: Actually, I was going to first ask the Chair of the ARB, Ms. Thompson, who’s here, if she has anything that she would like to add in augmentation of the Staff report. You don’t have to but you’re welcome to. Now would be a good time for that if you’d like to.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Osma Thompson, Chair of the ARB: Sure. I thought Amy’s was pretty comprehensive. The only thing that I want to add was while we all did support Option E for the garage. I have in my notes that each member had some concern about the long fence that comes with Option E. So, we’d like to look at that façade again as well as garage truck maneuvering over there. So, that’s the only thing I’ll add. We were in support of the option general, just that there were some details that we’d like to review once that option is more fleshed out. Yeah, that was the only thing I believe I wanted to add.

Chair Hechtman: Thank you and our appreciation to the ARB to do the heavy lifting on a lot of architectural issues that are associated with this redesigned campus. So, what I’d like to do next is actually questions of Staff before we hear from the applicant and then move to public comment. So, and I do want us to focus on questions... clarifying questions of Staff. We’ll have ample opportunity for discussion as this item progresses. So, let me start with Vice-Chair Roohparvar.

Vice-Chair Roohparvar: Thank you. I have a number of questions. So, first going to the amendment... the ordinance, two kinds of issues I wanted to ask you about. Where it says base... 50 percent of the base required on-site vehicle parking shall be excluded etc. I think your intention is for that to mean that it... base being calculated pre reductions, is that correct? And if that’s the case I would either define that because I think base is a little bit vague unless it’s already defined somewhere in the Code. I don’t know, I just wanted to flag that, and I don’t know if you have comments on that if I’m mistaken or misinterpreting, but that.

And then the second question that I had that was confusing for me with respect to the ordinance was in your Staff report it says that City Council directed that the garage either be fully or partially excluded from the Gross Floor Area calculation and it says it multiple times. And what I’m struggling with is what do they mean by partial because if it’s under 50 percent then it’s completely excluded. So, and anything under 50 percent of the total parking requirements is always going to be fully excluded. So, what is meant by partial? Did that mean... And I mean I can’t imagine they were thinking more than 50 percent. If you can have 64 and you’re at 70, the 64 gets excluded but the extra six get included because they say no more than 50 percent. That 50 percent is your max so there’s a disconnect for me from... and it’s directly like Council said exclude fully or partially. And then subsequently on Packet Page, it’s 107 and

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.

2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

108 it says the same thing. Do you have any thoughts on that? Why are they saying full and partial when it clearly just means you can’t interpret it except full?

Mr. Albert Yang, Assistant City Attorney: Right so it’s a good suggestion on the... on defining base parking requirements. We’ll make sure that’s clear and then on the Council’s motion. I think you’re encountering some confusion created by the fact that Council made motions over two nights on this. And the first night, March 8, 2021, is when they made the motions directing Staff to put together an ordinance dealing with Gross Floor Area for underground garages. And they told us to do an ordinance where everything counts, where nothing counts, and where some of it counts. And then on March 21st. I believe it was their second meeting where they made a motion on this issue they gave more specificity and that’s where the 50 percent came from. So, that’s what we drafted based on the more specific motion. If Council or if the Commission wants to see an example of what it would look like for all of it to count or none of it to count. That’s fairly simple to put together.

Vice-Chair Roohparvar: No, that’s fine. I was just confused but your explanation just cleared it up for me. I had another question for you.

Ms. Madina Klicheva, Administrative Assistant: Hi, I apologize to bother you.

Chair Hechtman: Ms. Klicheva, are we okay to continue?

Vice-Chair Roohparvar: Can we continue?

Ms. Tanner: Madina, is there something you need to tell us?

Ms. Klicheva: Oh, sorry, sorry, no, I apologize, I have a problem with the laptop. So, I wanted to see if right now Dean can help me out and substitute me for a short amount of time while I restart.

Ms. Tanner: Okay, well I’ll chat with you to handle that.

Ms. Madina: I apologize, I didn’t want to unmute myself. It’s just my laptop right now is acting up.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Ms. Tanner: Okay, thanks.
Ms. Madina: Thank you, sorry.
Vice-Chair Roohparvar: Yeah, no problem. Okay and then when we did the... and I don't know if Staff knows this but the phasing of 25 students. Is 25 students a class size at Castilleja?
Ms. French: It varies depending on the class. I'm sure the applicant can provide more color to that but with the Environmental Impact Report, I believe we were looking at 25 or 27 and it came down to a condition and we said 25. So, that was the increment of additional enrollment increase that we were all working from over the past several years.
Vice-Chair Roohparvar: Got it and then so with respect to the find parking options where it's between 9 to 20 percent potential reduction. Is that going to change our analysis of a number of trips? It would, right? If we’re having less or am I off on that?
Ms. French: No, I mean the number of trips is set by the motion.
Vice-Chair Roohparvar: Oh, and then they can't (interrupted)
Ms. French: [unintelligible] no new net trips. They can't exceed and then there's consequences if they do.
Vice-Chair Roohparvar: Okay, that's... so that makes sense and then so another question I had is on that slide you had regarding Gross Floor Area. The comparing it, the 130, 140. What do you mean by volumetric? I'm a little bit... can you explain that to me? Yeah, I just... are we going to have... is it going to be a smaller campus? Is it's because it’s two stories?
Ms. French: No.
Vice-Chair Roohparvar: Can you flesh that out a bit more for me and explain that?
Ms. French: Sure. So, volumetric floor area is a fancy way of saying our Code includes in the calculation of Gross Floor Area volumes of a building that exceed 17-feet above grade. That represents a first floor, so when you have from the first floor up to a roof height above 17-feet. That’s one space like that, it counts twice towards Gross Floor Area. A portion of the gym, the lobby of the gym, is 17 ½-feet tall as we learned in the measurement this the laser counter and so that portion actually counts twice. And then the gym itself, that is a very tall basketball court and that counts three times because it exceeds 26-feet from first floor from the basketball court up to the roof, not the ceiling. And so those kind of inflate the numbers of the existing campus Gross Floor Area. The fine arts center also was found to have taller than 17-feet between the floor and the roof above. And so that is being demolished as part of this proposal and so what that means is there’s more being removed based on removing that building than is being put back. The applicant has always maintained they will not put back more than they’re removing and now it seems with this exercise with counting everything. They’re going to put back less than what’s existing because of that volumetric space.

Vice-Chair Roohparvar: Got it. That’s really helpful because I was like is this a stupid question? I’m just going to ask it because I have no idea. Okay and then there’s a line on Packet Page 112 that says the existing offsite parking facility used on Cowper. A month-to-month arrangement with First Presbyterian Church doesn’t count as satellite parking. Why? It sounds like it’s satellite on a non-residential street.

Ms. French: It’s a residential street. There is a church there but it’s in a residential neighborhood and that is a month-to-month situation. And the Council’s motion appears to suggest that the satellite parking would not be in a residential neighborhood. So, that would not be the right spot for any satellite parking.

Vice-Chair Roohparvar: Oh, so, okay, so non-residential neighborhood. I was thinking they’re going to use the church as parking lot so that’s not on a street. Okay, so that’s helpful and then I had a question regarding the penalties for missing the TDM. So, if Castilleja misses... when it goes over what they’re required and their penalty is... is their penalty that they miss the next phase so they have to wait an extra year? Or is it that the total of 540 students is now 525 because that’s a much harsher... what’s the impact?

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. French: I think we talked about in there... there’s not a sliding scale but an increasing penalties and increasing mitigation measures that would happen. And then the combination would be this idea of clawing back five students at a time. And the concern about how that would be put in place if the infractions were not corrected through these additional mitigation or sorry, TDM measures.

Vice-Chair Roohparvar: Got it, so a claw back, okay. And then one final question for you and it goes to thinking about the RPP program. Is there currently an issue with affiliated parking on the neighborhood streets, or is it currently a problem, and are you guys tracking that? Or is there any insight with respect to that or is the concern like once they go up to 540 they anticipate it to become a problem? Is it existing or is it anticipated?

Ms. French: It... well we... I think Philip is showing his camera and he can give us more detail about whether that’s supported in the neighborhood. I wanted to mention one more thing about that satellite parking though. That particular site is more than 500-feet from the Castilleja campus and typically a parking adjustment includes satellite parking it’s not farther than 500-feet from the location.

Vice-Chair Roohparvar: So, it has to be within 500-feet of Castilleja in order to count as satellite?

Ms. French: No, I think it could be. It’s just that normally what our Code says is no more than 500-feet away in any case. I’ll let Philip move with his (interrupted)

Mr. Philip Kamhi, Chief Transportation Official: Yeah, sorry, she’s restless (interrupted)

Ms. French: He’s busy.

Mr. Kamhi: Right now.

Vice-Chair Roohparvar: Ah, so cute.

Mr. Kamhi: Just to speak to the RPP as a possible solution. First, I just want to note that I don’t believe that there’s an impact immediately. That would be something that residents in the

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
neighborhood would need to say or tell us. I haven’t heard that there is. It’s not something that we... so typically what happens is what we do is we do counts. We do surveys to determine what the impacts of if we hear typically through a petition of residents and through a certain threshold that needs to be achieved through the residence. We would determine that a study needs to be determined to determine what the occupancy of parking is occurring on the streets. And that would inform us whether an RPP would be a possible remedy to the solution.

But just noting for schools there are other possible solutions and we do utilize other ones. And actually, that’s one of the things that’s required of us before creating an RPP is to look at other possible solutions. And around schools, one of those possibilities is just a time restriction in the middle of the day. That would make it very hard for somebody who’s parking at a school all day to not exceed, but might be less of an issue for somebody that as... if you’re a resident in an RPP program. You have to go through a permit process, you have to purchase a permit, you have to renew your permit, you have to deal with guests that come, and it can be quite a process. So just kind of giving you some of the input on that.

Finally, it’s not known whether it would really cause a parking impact that would require or constitute an RPP. Thank you, Lilla, I’m sorry.

Vice-Chair Roohparvar: So cute, she’s so cute. That’s it for questions.

Ms. French: Yeah mom.

Vice-Chair Roohparvar: Wait actually, Ms. French can I ask you one more question?

Ms. French: Yes.

Vice-Chair Roohparvar: On the satellite parking? So, if it needs to be within 500-feet and in a non-residential neighborhood. Is there a non-residential neighborhood within 500-feet of Castilleja?

Ms. French: Well, we haven’t done that analysis but Castilleja is a residential neighborhood and that stretches for quite some distance. I would say the closest non-residential neighborhood is when you get to Palo Alto High School and the Trader Joes over there the Town and Country.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.

2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Mr. Yang: Just to clarify, 500-feet is the limit in our code where we could accept satellite parking as something counting towards the parking requirement for the site. But the Council’s motion included direction to explore satellite parking in a non-residential neighborhood as a Condition of Approval. And understanding that it wouldn’t replace onsite parking but it would just be something additional to alleviate some... any parking issues.

Vice-Chair Roohparvar: Got it. Could that trigger an EIR and other environmental... CEQA or does any of that trigger CEQA or?

Mr. Yang: Depending on where it was, potentially it’s something that we would have to do some supplemental analysis.

Vice-Chair Roohparvar: Got it, okay. Thank you.

Chair Hechtman: Alright, I have three Commissioners wanting to ask questions of Staff before we move to the public... the applicant comments and it’s 8 o’clock. It’s 8:02 so before we have those additional Commission comments, we’re going to take a 10-minute break. Let’s see, yeah, so we’ll try to reconvene at 8:12 and when we do, Commissioner Templeton may be joining us.

[The Commission took a 10-minute break]

Chair Hechtman: We are back from our break and before we resume Commissioner questions of Staff. I’m going to ask Commissioner Templeton if she has any disclosures to make on this item for Castilleja.

Commissioner Templeton: No, I do not.

Chair Hechtman: Alright, thank you. We will start with Commissioner Summa and your questions of Staff.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson's presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Commissioner Summa: Thank you very much and to circle back to the question about satellite parking. I just wanted to get a little further clarification. I'm think that satellite parking is parking at a remote location that would ease traffic through the use of shuttling. And that it wouldn't be satellite parking... offsite parking for the building... for the project that was within 500-feet that would be used for parking. That would actually affect their parking requirement. Am I think about that correctly?

Ms. French: Sorry, I wasn't sure who you directed that to. Is that to Staff?

Commissioner Summa: Yes, yes. You or anyone on Staff.

Ms. French: So, sure, satellite parking could be farther away than 500-feet. It just would not be part of the TDM... it could be a part of a TDM program but as far as that parking adjustment goes. That's typically tied in with that 500-feet distance where people could walk easily to the location where the parking is not provided.

Commissioner Summa: Okay so (interrupted)

Ms. French: I think... oh, Jonathan is here to talk further about this. Hi Jon.

Commissioner Summa: Oh, thank you.

Mr. Jonathan Lait, Director of Planning: Well and I’m sorry. I think a few of us are doing double duty tonight with youngsters. But is the question about (interrupted)

Commissioner Summa: I’ll restate it.

Mr. Lait: Thank you.

Commissioner Summa: For the purposes of this project and others, I typically think of satellite parking as at a remote location. And specifically, in the discussions about Castilleja, there's been some talk about having parking at a remote location and shuttling people in. I think of that as satellite parking which has to do with traffic and TDMs. And I think of offsite parking...
within 500-feet, that that would be parking that would fulfill park of the parking requirement for the project. [unintelligible] (interrupted)

Mr. Lait: Yeah, I think that’s a (interrupted)

Commissioner Summa: I was thinking about that correctly.

Mr. Lait: Yeah, I think that’s about right. The Code provides that if you can’t put all your parking on site. That you can put it within 500-feet subject to certain criteria. That’s not what’s being contemplated here. Applicant is proposing to park the site... put all the required parking on site, except that now we have this Council direction with the garage and consideration of the reduced parking allowance. And so, they’re meeting their parking requirements through a reduced parking reduction and then the balance of that, if there’s a need for additional parking. That could be offsite and but it wouldn’t be required parking. It would be a Condition of Approval as I think Albert was intimating earlier.

Commissioner Summa: Okay and typically offsite parking is for commercial or multi-family zones, isn’t that right?

Mr. Lait: I’ll look to Amy maybe to help me out with the provisions that specifically relate to it but again, it’s not something that is precluded. As... through the CUP, you have the ability to impose that condition.

Commissioner Summa: Okay.

Ms. French: I would just add to that to answer. Commercial zones are the ones that have that language about parking 500-feet away to meet the parking requirements. Because we have a parking adjustment request filed by the applicant in response to the Council motion. We have the range of items that can be utilized. Including up to 20 percent with a robust TDM program to grant that parking adjustment or reduction request so.

Commissioner Summa: But we wouldn’t have in this case offsite parking that fulfilled the parking requirement.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Mr. Yang: So, that’s not being proposed in this cause, but it is technically an option if something existed [unintelligible]. It’s available in the Zoning Code but it’s not being proposed here.

Commissioner Summa: Okay and then another question is did the Council motion use the term base requirement or just parking requirement? Because there’s quite a difference between... potentially between base requirement... what was introduced as a base requirement. That’s where it starts but then after the reductions. I mean there’s quite a difference so I was wondering where... if there was a notion, I don’t know if the exact word baseline requirement was even used by Council, but I didn’t feel that there was... that was expressed in the Council motion. Could Staff clarify how that was expressed in the Council motion? It just said parking requirement which is the requirement is whatever you end with I would think.

Mr. Lait: Well, so, thank you for that question Commissioner. From our perspective, we’re taking that from the Code required parking that was required at the time that the Council saw the application and not from a reduced parking 50 percent threshold. So, that’s been our perspective based on the Council motion.

Commissioner Summa: So, that was based on the Council’s motion, okay.

Mr. Lait: That was... yeah again, based on our understanding of the Council motion is that is from the project code parking requirement, 50 percent from that threshold.

Commissioner Summa: Thank you and then second question is since the volumetric space existed, which we know wasn’t counted until recently. Since that will not be rebuilt, does that mean that they will... did all of the excess over what would be allowed there which is 81 and some change. Did that exist in the volumetric space and so they will... where is the other square footage because removing those buildings with the volumetric space wasn’t counted still doesn’t get us a project with no grandfathered square feet over the... what would be allowed. Is that... so could (interrupted)

Ms. French: I can try to answer that with by saying the gym is the by far the most grandfathered of grandfathered space. The counting three times and the counting two times, those are staying. The fine arts building that is being removed, that floor area that’s being removed times

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
two because of the second-floor equivalency. The applicant is not asking to put that back in the building. That is being removed and not being put back. I don’t know if that answers it.

Commissioner Summa: I guess... there’s been so much confusion about square footage and I guess I don’t understand... I understand that the volumetric counting was overlooked and... until recently. But I still don’t understand how they’re grandfathering... how they get to build so much more than was allowed... would have been allowed on a site? At what point did they build things that they didn’t have a permit for because you wouldn’t have let them build something over what was allowed on the site in terms of the FAR anyhow. So, I’m just struggling to understand how to reconcile all these numbers about what’s allowed, what they want to build, what was their... what was newly counted? It’s (interrupted)

Mr. Lait: Yeah, a lot of numbers, so maybe I can take a stab at this. So, a lot of this we kind of when over the first time and I appreciate that has been several months since we have been back before you on this topic. But again, it use to be based on our understanding of the past entitlements that have gone forward. The CUP process, Conditional Use Permit, was the vehicle that was used in the past to allow the site to exceed what otherwise would be the permitted floor area calculations in the R-1 Zone. And a more contemporary review of the code and looking at the plain reading got us to the moment in processing this application where we didn’t see that that was a path forward. And once we alerted the applicant to that effect, that’s where the Variance application was filed. So, that they can restore floor area that had previously been approved via CUP and then allow that to be demolished and rebuilt.

And then the floor area, there were some questions when we went to Council about floor area and that’s why... there were some errors that were made in assessing the existing floor area. And that’s why we had that really comprehensive analysis that was recently taken place. I’ll note that in our ARB Staff report which I think we linked to the PTC report. We have a much more expanded conversation about the ARB about the floor area to the ARB report. But, you know, I hope that provides some more information. I understand that it is over the FAR that would be allowed today but again, I believe that’s from the prior processing of previous CUPs.

Commissioner Summa: Okay, thank you.

Chair Hechtman: Commissioner Lauing.
Commissioner Lauing: Yes, thanks. I have a couple questions that I want to bunch together. On Packet Page 105, you articulate all the areas that PTC has some purview over. Conditional Use Permit, comprehensive review of TDM, the Variance, parking adjustment, etc. But we didn’t get a lot of those items in this Packet. We got nothing on the FAR Variance except that link or the CUP. So... and we’re going to already walking into this know we’re going to do a continued meeting. Is the continued meeting going to have different content that isn’t here tonight? Because we’re also... and the other on 107... sorry 105 and 6 [note – 106] articulate A, B, and H as the primary area for our focus. Which is fine but there are some other things that aren’t on there and as a foot note. It would be great for us to know, at least on an FYI basis, this G and I on Conditional Use Permits from other private schools and the legalities of having a maximum build-out. But it seems like we’re not, tonight at least, covering everything that’s in our full purview. So, I’m just wondering what the process issue was there?

Mr. Lait: Thank you. Maybe I’ll start and Amy you can help fill in any gaps that I leave out. So, thank you, I appreciate that question and you’re right. We don’t have all the information that has been detailed in that Council motion. One of those items that you mentioned was the CUP conditions from the other schools. We have some data on that but we’re not... we’re going to come back with that when we come back with the Conditions of Approval which is not included in your Packet.

But the reason for that is we know that there’s going to be a couple of meetings as we go through this and what we wanted to do was present to the Commission information that we had at this point. So, that we... because the direction that we get from the ARB and the direction that we get this evening, to the extent that we get any from the PTC, is going to help inform the next step of bringing you some more refined information and Conditions of Approval. We’ve not made any changes to the Conditions of Approval since it was presented to the City Council and we don’t want to draft something in advance of having this opportunity for the public to weigh in on the revised application materials and for the Commission to weigh in as well. So, we see this is a bit of an iterative process and if there is some information that you’re looking for that we haven’t included tonight. Certainly, flag that for us because we want to make sure that we bring that back to you when we come back.

Commissioner Lauing: Great, that answers my question. I appreciate that.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Mr. Lait: Thank you.

Commissioner Lauing: Could we just know at this point what we think the Variance would be asking for in terms of square footage or is that not really calculated yet? Whoever wants to answer that.

Mr. Lait: I’ll look to Amy for that.

Ms. French: Sure, and if it would help I could put that table up from the PowerPoint that shows if there’s more than a few of you (interrupted)

Commissioner Lauing: Just give us one number.

Ms. French: Sorry?

Commissioner Lauing: For efficiency, just give us one number. How much is the Variance right now?

Ms. French: Well, the Variance is not asking for more than it was asking before. It’s asking for to reduce what... I don’t have a number at my fingertips but I can get it if I upload that table.

Commissioner Lauing: Okay or we can address it later when you find the number.

Ms. French: I can (interrupted)

Commissioner Lauing: So, I just want to make sure we’re all clear on the fact that at this point, Council has not sort of approved anything that we sent them. And in fact, as I understand it, the only thing that they’ve actually approved is that they’re okay with 450 student enrollment. Everything else is back to us or ARB for consideration, is that correct basically?

Ms. French: There’s been no Certification of the EIR, there’s been no motions to approve the project. So, that’s (interrupted)
The Chair may limit Oral Communications to 30 minutes for all combined speakers.

Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Commissioner Lauing: Yeah, I just wanted to clarify that for the discussion here and amongst the public because the Councils only indicated a willingness to do 450. And that’s as close as I think they’ve come to an actual decision and they’re asking for more feedback from us and ARB and others. So, thank you, that’s what I needed to know, that’s all.

Chair Hechtman: Commissioner Summa your hand is still up. I’m going to go to Commissioner Chang.

Commissioner Chang: Thank you, Chair. Because I wasn’t here for some of... well, for all of the old meetings. I wanted some clarification because I went back and looked at minutes from March 29th and my understanding was that City Council asked PTC to consider a no underground garage option. And I wanted to... so I wanted to ask Staff was a no underground parking option ever presented in this round?

Ms. French: The... oh, I can answer that. In the Draft Environmental Impact Report, there were several alternatives to the project. The project started off with a larger garage than what the Council received. It was whittled down during that review process but yes, in the Environmental Impact Report there’s the no garage... no below-grade garage alternative. That’s part of the analysis. It’s a big document.

Commissioner Chang: Right but to clarify, that EIR or Draft EIR was done after March 29th correct?

Ms. French: No, the Draft EIR (interrupted)

Commissioner Chang: I mean sorry (interrupted)

Ms. French: Was prepared (interrupted)

Commissioner Chang: Before March 29th.

Ms. French: Yeah, prepared in 2019, and the Final EIR to address the comments received on the Draft EIR was prepared in July of 2020.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Commissioner Chang: Right, so it was done before the March 29th meeting. And so, I was reading through City Council minutes and there’s... a sentence I have here that says direct Staff and the PTC to review both a non-underground facility option and an underground parking facility alternative that allows a maximum of 50 percent, etc., etc., etc. But we didn’t receive a new non-underground parking option, right?

Ms. French: Correct, the March 15th motion that you’re talking about, I believe Mr. Yang was addressing earlier saying that that motion was further refined on March 29th. So, that’s the motion that we took to be the refined motion.

Commissioner Chang: Okay and I think either you or Mr. Yang had clarified this, but can you give me more explanation review of why we are looking at a parking reduction? In other words, what are the findings that are required or what’s the community benefit from... that’s provided that allows us to reduce the parking or what are the requirements for a parking reduction?

Ms. French: Well, the parking adjustment is typically a Director’s adjustment associated with the development project and there are a number of code statements about granting those. And basically, up to 20 percent reduction can be granted if it’s found that the parking spaces will not be needed because of a say robust TDM program or other aspects. So, that’s a finding that would have to be made to approve that parking adjustment.

Commissioner Chang: Okay, thank you. That’s it.

Chair Hechtman: Commissioner Alcheck, questions of Staff?

Commissioner Alcheck: So, it would help to have a little clarity here. Is Staff’s perspective is the floor area of the project greater, equal to, or less than what’s currently there?

Ms. French: The proposed floor area is less than what’s currently there because the demolition is going to remove more than is going to be put back above grade Gross Floor Area. The basement (unintelligible) (interrupted)

Commissioner Alcheck: No, I get it, I get it. So, this project is smaller above grade... I mean I don’t... when I... we don’t count below grade square footage anywhere in the R-1 in general. So,
if we’re excluding... if you include the garage, what is the distinction just so that I can appreciate it?

Ms. French: We haven’t done the calculation of the square footage of the five options for the... so, basically as long as the applicant proceeds with a 50 percent of the required. In other words, 52 space garage, we don’t... under our understanding of the motion, we wouldn’t be counting that garage.

Commissioner Alcheck: Right, okay, so (interrupted)

Ms. French: Once they go over 53 spaces (interrupted)

Commissioner Alcheck: That makes perfect sense.

Ms. French: Then we would count that.

Commissioner Alcheck: Why go through that process if it makes absolutely no difference because we are not counting below-grade floor area unless it exceeds this new framework that you’re... that’s under consideration.

Ms. French: Correct.

Commissioner Alcheck: Is... has this... has it come up at the Staff level... okay, let me provide context here. So, I understand how the concept of the garage came about in the first place because I was here back when and how it was even brought into the discussion and when the applicant decided to pursue that concept. It is... it was larger than it is today. Has it come up at the Staff level that the size of the garage getting smaller seems to be counterintuitive to minimizing... the size of the below-grade garage getting smaller sort of counterintuitively probably likely make impacts greater locally? Has that... I guess what I’m trying to say is it’s like I understand how we got from there wasn’t a garage below grade. It seemed like it was an interest on behalf of the community. The applicant met that interest. The community has apparently changed their opinion on. In the timeline here, does it seem to you like maybe this is going to bite us in the rear when we look at this project in the future and go why did we make a big deal out of this minor difference in underground parking?

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. French: Well just conceptually I’ll just address that as Gross Floor Area, the whole concept of that is bulk and mass above grade. So, from the get-go, something that’s below grade is not adding bulk and mass. So, that would be the first conceptual debate about whether below-grade parking is Gross Floor Area when there’s no walls above grade to count the Gross Floor Area too. So, that’s the first piece of it. The second piece really is, is this going to bite us, or is or down the road are we going to wish we had more parking spaces for people to not use the street parking for events or what have you. I mean I think we get into the TDM program then and how successful is that? Hopefully, it’s all... it all goes well and (interrupted)

Commissioner Alcheck: Okay, so maybe the better question is in your planning experience, have you ever heard of a garage where they were like oh we never wished we had more space. It seems to me like that the... I wonder if this effort is so... I guess what I’m trying to figure out is if Staff has come... has had... if there’s a conversation happening at the Staff level where it’s like this is what they want. So, we’re going to go with it but this doesn’t seem like a prudent way to cover our parking needs. I mean... okay, I won’t... okay let me ask you a different question. Is the... when you were talking about enrollment steps. I thought I heard sort of a suggestion... sort of subtle suggestion that you didn’t really... I guess my question is what was flawed about our approach to staggering enrollment? Let’s agree that we can resolve the connection... we can disconnect enrollment and construction phases. That’s fine. Was there, in your mind, something that didn’t work in terms of the staggering of the enrollment increases with the performance... the opportunities to evaluate performance metrics that didn’t create an opportunity to solve that issue about backtracking? I thought when we went through it last time we kind of created a timeline that put us in a position where you wouldn’t have to go oh well we didn’t properly evaluate this and you have five more kids than you’re supposed to have.

Mr. Lait: Maybe I’ll start on that one. Commissioner, is your question from the perspective of the Council’s feedback when they reviewed the project?

Commissioner Alcheck: Yeah, so in the presentation (interrupted)

Mr. Lait: Okay, now I understand. I see (interrupted)
**Commissioner Alcheck:** I got the impression that we were looking for a new solution and I don’t understand why the one that we came up with wasn’t good at that.

**Mr. Lait:** No, fair question. You know we heard all kinds of comments from the Council and I think the Commission put a lot of thought into the process that Amy went over in the presentation and that you recall from your previous review. The one area where I think the Council expressed some concern was the... related to enrollment increases, finding out about the applicant’s ability to meet the no net new trip requirements, and then the eventual consequence for that. There seemed to be an extended period of time and I think the Commission actually spoke about this too. Between the applicant gets enrollment but it could be a year or a year and a half down the line before the consequence of reducing the enrollment came into effect. And so, I think there’s... I think that’s one reason why the Council is saying let’s take a look at the phased enrollment increase. To have it align in some way with a more timely consequence or corrective action that can take place that’s not so distant in the future. And one way that we’ve attempted to do that with the revised TDM is to shift that responsibility of when you add new TDM measures. That’s now a decision, at least in the draft TDM Plan that’s being contemplated, that myself and Office of... the Chief Transportation Official Philip Kamhi would have a conversation about what addition TDM measures might be needed to ensure compliance with ADT, average daily trips, in the am peak. So, I think that’s the best we can give you at this time and I think we’re just looking for some options on that.

**Commissioner Alcheck:** So, if I could just get one more point of clarification. So, it’s your suggestion... so your impression was that our discussion didn’t address the lead time issue and that... I’m trying to understand if the concern on the part of City Council was legitimate or not. So, maybe they didn’t understand what we had set up, or is there an issue with we didn’t provide enough... because I was under the impression that we left that last meeting with you have to actually demonstrate that you had sustained a not net increase for the past increase before a new... I thought we staggered it with enough of a gap. And so, my impression of the City Council meeting was that they actually did not understand what we had recommended. And what I’m trying to understand is does the Staff feel like that issue is addressed by our previous concept or is the concern accurate and we need to go through the exercise of timelining this. So, that we can demonstrate exactly why the increases don’t get ahead of their deserving... you know their moment of proper allocation.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.

2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.

3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Tanner: I only wanted to add to something that you’re all aware of, it’s just the time and to just to suggest that at the Chair’s pleasure we might go to the applicant presentation soon just given the hour.

Chair Hechtman: Yep, thank you and I was getting ready to do that after I ask one what I think is a pretty simple question. So, the size of the campus, the Variance, isn’t really one of the issues that Staff is looking for input on tonight. If we read through the Staff report, there are a number of places where Staff is looking for direction but the Variance isn’t one of them. We will take that up again at a later time. What was a curiosity to me, last year when we addressed... dealt with the Variance, my memory is we were dealing with square footage? This is what the square footage would be under the Code if this were a new build. This is what they have, the Gross Floor Area today, and this is what they’re proposing. This is what it would be. It’s less than today but more than what a new build would allow and hence the need for the Variance. But I don’t remember from last year this concept of volumetric floor area and so I’m wondering when we see the Variance again, are... is the Variance going to be from the Gross Floor Area like we saw last time or from volumetric gross... volumetric floor area or both?

Mr. Yang: So, volumetric floor area is part of our definition of Gross Floor Area and it’s just something that we missed last time around. The Variance will include volumetric floor area but I think it will also, for clarity sake, include the floor area not... speak to both numbers, including and excluding volumetrics.

Chair Hechtman: Thank you for that. I’ll look forward to when we get to tackle that issue again. Alright, as Ms. Tanner recognized, the clock is ticking and we do want to hear from the applicant and the public tonight. And we will invite the applicant to speak and Ms. French, it’s my understanding that the applicant is requesting 15-minutes. Is that accurate?

Ms. French: Yes, that was a request, but I do... the presentation includes a Transportation Demand Management which is highly technical.

Chair Hechtman: Yeah, yeah, thank you. So, our... the Chair has discretion on this item and normally we allow an applicant 10-minutes. But here, the applicant was asked by the Council to prepare this robust TDM program, which they’ve done, and I think it’s 74 pages. I read through it and we’re going to... and it’s my understanding as part of their presentation we’re going to

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
hear from the applicant and maybe the consultant on the TDM program. So, I think in this particular instance, it’s really warranted to fulfill the Council’s desire to not only get a TDM program written but also have it explained to us well enough that we can make some informed decisions. So, let’s use the 15-minute timer tonight and Ms. French do you want to introduce the applicant? Whoever is going to speak first.

Ms. French: Sorry, yes, I don’t know who of the applicant team will speak first. I do... okay, I’m seeing now. I got the camera on you. Nanci Kauffman, are you unmuted though?

Ms. Nanci Kauffman: I think so. Can you hear me okay?

Ms. French: Yes.

Ms. Kauffman: Great, great. Thank you, Amy. Well, I do want to thank you Chair Hechtman for this time and all the Commissioners for the opportunity to discuss our project with you. We really look forward to gaining the benefit of your expertise but I do want to give a shout-out to the Staff because I do know how complicated this project is. And I know you have been so persistent in trying to make it clear to everyone so thank you.

Tonight, we’re going to use our time to provide the information that the PTC needs to respond to City Council’s request that you revisit certain elements of our project. The proposal you have before you is built on many years of compromise. Like the earlier version of our project that you approved last year, this version addresses the needs of neighbors, the City, and the school.

First, this project responds to calls from neighbors to improve their quality of life by reducing our footprint, capping our car trips, limiting our hours of operation, reducing the number of events, moving parking out of sight, saving and adding trees, and mitigating noise. And we achieve all of this for the neighborhood by... while also meeting our project objectives to build a modern and sustainable campus and to educate more girls.

A crucial element of our application is a request to increase enrollment. To highlight this imperative, I would like to offer some context that puts a spotlight on the importance of this project to Palo Alto’s educational landscape and to the empowerment of girls and young women. Since the onset of COVID, all of us have come to appreciate the unique role that

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
schools play in our communities. Even those of us that don’t have young children, see schools as the path to a better future. When schools thrive, we all thrive and it’s easier to believe we will pass through hard times when we can see children around us learning and growing together. Castilleja School plays a leadership role in that effort. In fact, educating more girls for a better and more equitable future is a vision that has been at the core of our mission since 1907 and it remains our top priority today.

Since March of 2020, as women have been forced out of the workplace at far greater rate than men. Decades of progress along gender equity lines have been washed away. That is why now more than ever we must meet the needs of girls for whom the single-sex environment Castilleja provides is critical to developing and strengthening their voices. With our application, we seek the City’s support to make it possible for more of those girls to thrive as students and future leaders. And we need your help to find a path forward so that Castilleja’s increased enrollment and new academic buildings become the foundation for a sustainable future.

We need your support to ensure that Castilleja’s place in Palo Alto is preserved in a sustainable way. Contributing to the prominence of our City as a community that has invested in what matters most about the future. The education of the next generation.

Through this iterative planning process, we have come to understand that increasing our enrollment hinges on our ability to minimize impact as measured in trips, events, and parking. That is why our plan proposes gradual enrollment increases contingent upon maintaining your clearly stated cap on trips and upon adhering to your specific set of guidelines on the number and type of events we can hold.

Tonight, we are relying on your expertise to provide the City Council with your guidance on parking in response to their motion. Critical to deciding our parking requirements at each enrollment level is a deeper understanding of the TDM program that we will present tonight. Through your analysis of how TDM serves to actually reduce the need for parking, you are in the best position to recommend to Council a workable parking solution that preserves our fields, parks our project, and allows us to enroll 540 students.

We were gratified that during our recent hearing with the ARB, a straw poll supported two garage options. Option D with 69 below-grade spaces and Option E with 52 below-grade

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
There is a pathway to responsibly grow our enrollment to 540 students. Tonight, we are eager to get your direction on that pathway so that we can move gradually and responsibly to an enrollment of 540. That’s 90 more girls who will benefit from a Castilleja education. Including the many who benefit from our tuition assistance program.

As I stated at the start, our plan now checks all the boxes. We take cars off the street. We save and add trees. We reduce our footprint. We exceed Palo Alto suitability goals and we educate more girls. In meeting with you again, we seek clear direction on actionable steps we can take to further improve our proposal and move toward approval. We appreciate the specific guidance we received from the ARB last week and we’ve already begun work to further reduce the massing along Kellogg. We look to you for similar guidance on our TDM and parking plans.

Now, I would like to introduce Adam Woltag of WRNS Studio, a member of our architecture team, to share the parking options for your consideration. He will be followed by our land use attorney Mindie Romanowsky who will discuss the proposed Text Amendment and our TDM expert Elizabeth Hughes who will talk about our TDM and its impact on traffic and parking.

Thank you all so much and on to you Adam.

Mr. Adam Woltag: Thank you, Nanci. I appreciate that and thank you Council Members and Commissioners for staying so late here. We appreciate your time and consideration. We’re going to be looking at these three items in this presentation.

Starting with the overview and an aerial view of the proposed campus design and a reminder that the design does incorporate a dispersed campus drop-off, pick-up approach that utilizes the full breadth of the campus opportunities. We’ve received great input from the ARB and from this Committee about these key spaces. How they balance the needs of the school and the neighborhood context. Like the second... like the screened porch with its tiled accents off the existing mid-block Kellogg Street driveway that also sponsors a break in the even and massing of the building. And at the driveway entry near Kellogg and Emerson intersection where the second-floor trellis setback softens the corner of the building and marks its entrance to campus. These are considered design highlights and we appreciate the comments and we feel they’ve made the project much better.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Now moving on to the tree protection and parking options A and E. The City Council has asked out team to reduce the garage footprint. An effort to reduce the number of below-grade parking space to 50 percent below the total required and to further reduce impacts of the garage on the surrounding trees. We have looked at several ways to do this and these are reflected in the Options A and E. All of these options pull back the garage footprint even further away from the trees located at the southwest corner of the playing fields. Option E builds off of this even further away from the trees located at the southwest corner of the playing fields. Option E builds off of this even further to save an additional tree. In our original design, the pool egress stair and transformer were partial located within the tree protection zone shown in the dashed red line. Option A through E propose redesigning the stair to fall outside of the protection zone and relocate the transform and switch gear shown in yellow to the landscaped area along the Emerson Street façade adjacent to the surface parking lot.

Now moving on to item three. At our most recent ARB meeting last week, members had a chance to review the revised parking options and voted in favor of either Option D or E. Both options further protect existing trees and reduce below-grade parking capacity. But there’s some key difference that need to be highlighted for this Committee’s review. Looking closely at Option D, below-grade pan on the left and the side plan on the right, highlights of the plan are the reduced below-grade parking structure with 60 spaces. Note, this is more than what the Council has asked but we still believe that it supports Council’s request by significantly reducing the extent of below-grade construction and protection of surrounding trees. Loading, deliveries, and trash program are located below grade and towards the center of campus and are accessed by a driveway off of Emerson. Here are the site and circulation plan of Option D. Key to note, this change does not affect our circulation approach that incorporates a distributed drop-off strategy as I mentioned earlier.

Upon further request from Staff to protect additional trees, we’ve developed Option E. Option E incorporated the same tree protection measures along the southwest corner of the athletic fields and tree 89 as Options A and D but takes further measures to save tree 155. A tree located on the campus interior and one not in the best shape according to our arborist report. In order to do that, we’ve had to revise our loading, trash, and delivery strategy which I’ll touch on in the following slides but first parking. Looking closely at Option, the plan highlights are reduced below-grade parking structure with 52 spaces and in order to meet the requirements. This option proposes surfaces parking shown in red on the right. Now, in order to achieve this

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
with the objective of Option E and protect tree 155. This design poses shifting below grade pool
20-feet to the east and relocates the below-grade program such as trash, recycling, loading, and
deliveries and the driveway that accesses them up to grade shown in the yellow hatched area.
In order to help reduce the impact of any noise, we would need to provide an acoustic wall
along Emerson that stretches west from Kellogg Street corner to the pool wall. Here’s a site
circulation plan showing Option E. Key to note, like D, this option does not affect our prior
circulation approach. Once again, deliveries, trash, and loading are now done at grade off the
Emerson driveway as you can see on the right portion of the slide.

On behalf of the entire time, I’d like to thank you for your prior critique and your vote of
support. State early, it made a better build, one that we believe will serve the Castilleja
community, the neighborhood, and the City of Palo Alto. With that, I’m going to hand this over
to our land use attorney Mindie Romanowsky.

Ms. Mindie Romanowsky: Good evening. I just wanted to... I was going to make some
comments about the proposed Text Amendment before you but in the interest of time, I will
save those. If there’s an opportunity for some rebuttal later after hear the comments on the
Text Amendment and let Elizabeth Hughes, a TDM specialist who drafted the TDM report, take
the rest of our time as I know it’s very important that hear from her and we appreciate the time
that you’ve given here. So, I will hand it over to her and check back in with you later.

Ms. Elizabeth Hughes: Well, thank you very much for the introduction. It is a pleasure to be
speaking to the Commission about TDM and how to make it a simplified presentation. So, I’m
going to try to be respectful of my time limit and just give you a brief overview of how TDM can
make the solution happen and how that works.

Castilleja School already has a really excellent TDM program and the planning work and manual
work and all of the additional measures that were presented actually make their TDM plan
superior and how do I know this? I’ll tell you straight up, I’ve been doing this work for more
than 20 years and I’m not just a planner of TDM but I actually implement the programs. I
manage the programs. They become commuter programs and that gives me really unique
perspective into what works. So, when I write a plan, I need for it to be successful because my
reputation. So, wanting to give a very brief two-slide overview of what happens with TDM. It’s
my favorite topic.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Can I understand if everyone can see the slides on screen which I can’t hear anyone?

Ms. Tanner: Ms. Hughes, we’re going to wait, we’re going to pause your time because your screen is not sharing.

Ms. Hughes: Ah.

Ms. Tanner: So, oh there it goes. Do you want to put it into... try it again. It just came up a little bit delayed I think.

Ms. Hughes: Okay.

Ms. Tanner: If you want to try that again and you have about 2-minutes. So (interrupted)

Ms. Hughes: Okay.

Ms. Tanner: I will probably cut you off before you’re done and the Commissioners can ask questions if they have any afterward.

Ms. Hughes: Oh, that sounds great. Alright, thanks so much. Alright, so TDM in a very simplified example is a synergistic grouping of elements. It isn’t just one element say carpool matching that makes the difference. It’s carpool matching with the incentives and with a carpool preferential spot and maybe with a parking permit. All of those things grouped together creates a TDM measure that gets significantly more enhanced. We do the same example with transit. If you offer employees transit subsidy, they’re going to be more interested in the option to take transit. If pre-tax benefits are a part of that, it just makes the enticement a little bit better. Providing a free Caltrain bus that gets them to and from the station further solidifies that option. Guarantee ride home and again, you can see in this slide, a TDM is that grouping of measures and that’s why when we put together the most recent manual. We looked all the existing measures, we looked at ways to enhance those existing measures, and then we added additional TDM measures to make this plan very, very robust. The TDM plan that was prepared really is serving a duel benefit and that is to maintain a no net new trips and parking shortfalls.
So, the Staff report did show a sample graphic that was not Option D or E and I just wanted to give the example. If we’re looking at Option D, when all is said and done, the peak parking demand shortfall at an enrollment of 540 students is about 19. And it’s really not a number that is super large but it’s actually a number that is taking into account all the other functions of TDM and the sustainable programs at Castilleja and the parking management programs.

Ms. Tanner: That’s the time, Chair. So, you need to stop the presentation and perhaps if we can have questions if they want to hear more from Ms. Hughes.

Ms. Hughes: Sure.

Chair Hechtman: Okay, I would just want to know if there’s a... if Ms. Hughes has sort of a wrap-up sentence and then we can see if there are questions of you.

Ms. Hughes: Sure, yeah, I would be happy too. Basically, we are looking at a successful program that has every advantage to perform and every element was reviewed. Bicycle, walking, transit, carpool, the outreach, the monitoring, and the penalty aspects. So, this plan is quite appropriate for the sustainability mobility not just for the school but for the City of Palo Alto.

Chair Hechtman: Thank you. Thank you and thank you for the applicant... to the applicant for the presentation of all of the presenters. Commissioners, here’s how I want to proceed. Often, we might ask for questions of the applicant at this point but it’s ten after 9:00. We have 75 members of the public, 36 of whom have already raised their hand and there could be more. And my desire... my intention is to be able to hear all of the public comment. The members of the public who want to speak, I want to give them the opportunity to do that tonight. So, what I intend to do in my discretion is we’re going to... I’d like to move to the public comment. We’re going to provide 2-minutes per speaker with per our normal procedure I think groups of five can collect and have one or more of that group present for 10-minutes. We’ll allow that. We’ll get through that and which I’m anticipating will take us close to 10:30, quarter to 11:00. I’d like to hear the applicant’s rebuttal and then see if there’s appetite or energy for Commission discussion tonight or we want to move that forward. It’s pretty clear to me unless we’re going to stay very, very late, we’re not going to get through Commission discussion tonight. So, that’s my intended plan and I do think that we will take a break around 10:00. Just a short break, maybe 5-minutes, at an appropriate breaking point between public speakers. So, that’s my plan.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
and I do see members of the public, additional members starting to raise their hand. So, here's what I'm going to do and this is something that I guess I learned from our Mayor. I'm going to ask anyone... members of the public who wants to speak to raise your hand by 9:30. I got 9:12 right now. At 9:30 we're going to cut off the list where ever it is at 9:30. So, that's 18-minutes to raise your hand. That's amply opportunity so I'd encourage you to do that if you want to speak tonight.

So, I think with that we can move to open the floor for public comment and raise your hand if you wish to speak. On the Zoom App, there's a raise hand button on the bottom of your screen. If you're dialing in from a phone, press *9. I know (interrupted)

Ms. Tanner: Sorry, if I may Chair, I want to just confirm we're doing 3-minutes per speaker? 2-minutes, okay.

Chair Hechtman: Okay, are we ready to start that process?

Ms. Klicheva: Yes, I am ready here. Okay, so our first speaker is Alan Cooper.

Mr. Alan Cooper: Good evening, Commissioners. I have lived across the street from Castilleja on Kellogg for 37-years. First, I want to thank you and City Staff for continuing to seek solutions in this complex project. That will get Castilleja part of what they ideally want which is 30 percent more students and will get neighbors part of what they ideally want which is a residential neighborhood without persistent and increased traffic, parking, and noise issues. This is a balance of compromises.

In my letter to Commissioners 2-day ago, I outlined seven troublesome issues that I see as needing to be resolved. I made a simply specific suggestion as to how each issue could be resolved as part of a compromise. I ask that you consider these suggestions seriously.

Three of my issues regard monitoring and regulating traffic flow and parking throughout the entire day in the greater neighborhood. There are still significant pedestrian and bicycle safety issues at times during due to uncontrolled traffic on Kellogg.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Two of my issues regard the CUP and how the number of onsite events could be significantly reduced to 50 or less and how the CUP mandates could be monitored and enforced in the future.

One issue relates to the duration of construction. I strongly commend Castilleja for suggesting the option that they move to a temporary campus for 21-months. So, the construction could be reduced to... by more than 1-year. This would be a major gift to the community and to the safety and health of their students.

A final issue relates to the ARB that suggests that the education be made... building be made 3-feet higher. This would yield an even more massive building. It’s seem untenable. I was okay with the prior design but cannot support the new design. Thank you for helping the neighbor and Castilleja.

[note – unknown male speaker:] Hey Alan, how are you doing [unintelligible] ? You still there?

Ms. Tanner: We’ll try to mute that person I think if we can.

Ms. Klicheva: Yes, I muted.

Ms. Tanner: I did just want to... I’m sorry for this is a little awkward Chair Hechtman. Our procedural rules is kind... somewhat Commissioner Summa did indicate earlier do allow the Chair to reduce the speaking time for public comment to 3-minutes. But unlike Council, we don’t have in our rules reducing it further from 3-minutes to 2-minutes. I know it’s a bit awkward but that’s how I read our rules unless the City Attorney is aware of something else that I’m... an oversight that I’m may be having on our Procedural Rules.

Mr. Yang: No, that’s correct.

Chair Hechtman: Oh, the statement that appears on our agenda, Item Number Three. The Chair may reduce allowed time to speak to 2-minutes to accommodate a larger number of speakers. That’s an error?

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Tanner: Right, that’s an error and it’s that... I think under the general public comment like on non-agenda items. I think it may be different than for agenda items. So, I do apologize that we have that error which Commissioner Summa has pointed up before and I will... we will fix it. But that is just... I wanted to get that and I’m sorry to Mr. Cooper for not apprising of that earlier during his comments.

Chair Hechtman: So, alright if that is the limit of my discretion then, first of all, I apologize to the members of the public. I appreciate Staff bringing it up so earlier and I want to ask Mr. Cooper if he has another 60-seconds that he wanted to share with us but couldn’t. So, that he doesn’t get the same privilege everyone else does.

Ms. Klicheva: Just a moment, let me find him in the attendee list and unmute him.

Mr. Cooper: Thank you Commissioner for the opportunity. I would like to pass that opportunity for the extra 60-seconds, if possible, to Andie Reed later on. Thank you.

Chair Hechtman: Mr. Cooper, I think, first of all, Andie Reed I think she has a full 10-minutes on behalf of a group as item number 12 on my list. So, she wouldn’t be able to use your extra minute but I appreciate you didn’t have much... anything more to say and so let’s continue to move down the list. And while each of you do have 3-minutes, I’d encourage you all to be succinct and to not to be repetitious unnecessarily. If someone before you said something that you agree with, you could state it that simply rather than repeating the concept.

Ms. Klicheva: Thank you. Our next speaker is Anu Priyadarshi.

Ms. Anu Priyadarshi: Thank you and will try to be as synced as possible. So, good evening everyone and thank you so much for the work you do to support our community. Once again, my name is Anu and I live here in Palo Alto.

I am here to ask you to support Castilleja’s modernization plans. The changes will reduce the school’s impact on the neighborhood and the environment. The gradual move cars below ground without adding more traffic. You can choose the plan that you believe is best for all parties obviously but please bear in mind however that the 52 spaces planned severely curtails

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
the school’s ability to educate more women as per the City Staff’s latest report. For this reason, I do urge you to support Option D.

The new learning spaces will be fossil fuel-free and net-zero energy. Really goals that more organizations in Palo Alto should be pursuing and on that same note. The school’s traffic management program is a leader in the Bay Area. So, I hope others can acknowledge that.

Since the school first submitted plans, at this point several years ago, it has made changes to a few different things. The exit from the garage, the pickup and drop-off patterns, the exterior façade, the overall square footage to comply with current measurements, the tree plan, preserving more trees, and adding over 100 new ones. The hours of operations, the number of events, and the ways that families and employees can go from campus. Now you have further changes that improve the project. Castilleja is a good neighbor already and appears to want to become an even better neighbor with this modernization. So, please recommend it for approval again. Castilleja should be allowed to try thrive in Palo Alto. Especially because this project has no negative impacts and that’s all I’d really like to emphasize today. So, thank you again for all that you do for the City.

Ms. Klicheva: Our next speaker is Eduardo Llach.

Mr. Eduardo Llach: Yes, thank you. I’m assuming you can hear me?

Ms. Klicheva: Yes.

Mr. Llach: Wonderful. I just want to basically say that I would like to ask PTC to move this forward to the City Council. I live in Churchill, close to Castilleja and Pally. My grandmother graduated from Castilleja in 1917 and I benefited from the great education we received at Castilleja. We live next to Pally, my four kids went there, lots of buildings have been built and approved while I’ve been here.

And I’ve been speaking in support of Castilleja at hearings like this one for years. In fact, I spoke to you last year when you endorsed a plan for the first time. Well, here we are again. The basics are the same. We have a sustainable campus, we have a huge aesthetic improvement, no new above-ground footage, no new daily car trips, events will be held to a reduced number, and
there’s more educational opportunity for kids. Now, ever more trees are preserved and you can guide this project to [unintelligible] a productive compromise. You know how much parking do you feel should move above ground or below ground? Either way, daily trips will stay the same.

You know as someone concerned about green space, I care a lot about trees. I just read the Overstory and it’s a great book. I’m impressed that Castilleja has commitment to investing in the infrastructure of the neighborhood and I’m one of the neighbors who supports more capacity in the garage. So, I think the underground garage makes a lot of sense. However, I believe that there is an ability compromise and I believe that there is a way to move forward that pulls many different views into account. Clearly, so does Castilleja. You have many different plans in front of you. All of them are excellent improvements to preserve the trees, move cars below ground, enhance the neighborhood, and allow an institution to... that predates all of us to continue to thrive. By the way, my mother was born in 1899, she graduated as I mentioned in 1917. She was born in the 19 century.

So, choose a plan and move this City... this to the City Council for approval. The New York Times recently did a great piece on how time-consuming and expensive basic infrastructure and buildings updates have become. Let’s make a decision and let’s send this proposal to the City Council. Let’s help kids get back to learning and being great leaders and members of our community. Thank you.

Ms. Klicheva: Our next speaker is J. Fleming. Ms. Fleming, you can unmute yourself and share your comments. There may be some technical problem that Ms. Fleming is experiencing.

Chair Hechtman: Let’s move on and come back to her.

Ms. Klicheva: Okay, so our next speaker is Jochen Profit.

Mr. Jochen Profit: Good evening. I hope you can hear me. I’m Jochen profit. I live here in Palo Alto close to Casti. I really wanted to second Mr., I hope I pronounce this right, Eduardo Llach comments. I’m... this is probably the third year now that I’ve been speaking on behalf of Castilleja and I think his comment about how long this process takes is so true. And it’s just incredible to see how something that really should be a slam dunk like a school that is providing so much opportunity to young girls and what’s to update its facilities. It’s taken year and year...
and year. So, please move this project forward. All kinds of wonderful new benefits have been provided and played out already. There’s a lot of good options for you to choose from.

I was really struck by one of the comments from Michael Alcheck which I thought was terrific and while I’m not an expert in design architecture. I would say that don’t build the garage too small. I think the garage is the best solution but don’t build it too small. There will be growth and you will be really feeling terrible if you approve a project that will end up being too small. So, as from most, I think buildings that need to be [note – bigger?] in the University at Stanford. They quickly become too small so don’t approve one of... don’t approve a garage that will not be suitable in a few years. Thank you.

Ms. Klicheva: Thank you. Let’s try to return back to Ms. Fleming.

Chair Hechtman: Just before Ms. Fleming speaks, I want to remind the members of the public that it’s almost 9:30. So, if you haven’t raised your hand yet and you want to, you need to do so by 9:30. Ms. Fleming?

Ms. Klicheva: I believe Ms. Fleming still have some technical issues. So, I will move on to Julia Ishiyama.

Ms. Julia Ishiyama: Good evening Commissioners and Staff. I appreciate your review of Castilleja’s Conditional Use Permit and Transportation Demand Management Plan. I live close to the school in Old Palo Alto and I welcome a detailed analysis that will ensure residences the peaceful enjoyment of our neighborhood. I’m also confident that the current plan to allow a gradual enrollment increase up to 540 students stands up to scrutiny. I understand the concerns about traffic but by making any enrollment increase conditional on no net new trips and imposing substantial fines. You have already created an incentive structure that guarantees compliance. Under its current leadership, Castilleja has been a good citizen and has kept its word on TDM.

A small local group of residences still object but it clear based on the public record that they won’t be satisfied by any amount of additional mitigation or monitoring. And are instead, intractably imposed to anything other than a de minimis enrollment increase.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
I understand that the City Council has asked you to identify procedures that would allow for a larger increase and I ask that you approach this stage of the approval process by taking into account the five long years of hard work that you know even better than I do, has included careful consideration of the right path forward. Please hone your recommendations based on legitimate criticism but don’t let a refusal to compromise take us backward.

Since I’ve been bold enough to suggest the motives of my neighbors, I’ll reveal mine. I’m Castilleja alum who wants to see both my school and my City succeed. Goals that I know from experience go hand in hand. Castilleja’s unique educational environment is not available anywhere else in the area and the option of a local single-sex school has enabled thousands of Palo Alto young women to grow and thrive. The students educated at Castilleja are your friends, neighbors, babysitters, and dog walkers. Casti alums, teachers, and staff members shop alongside you at the California Avenue Farmers Market and jog next to you at the Moonlight Walk and Run. We are part of this community and as a Palo Altan who has always valued giving back, from serving on Congresswomen Eshoo’s student advisory board as a high school to supporting local non-profits as a working professional. I consider any good that I’m able to do here to be a return on Castilleja investment in me.

I’m also proud that in the inclusive City where I was raised, Castilleja can offer a quality education to others throughout the region. Particularly, to young women from under resources school districts.

In the past, I’ve heard commenters and City Official discuss residency as a potential enrollment factor and I urge this Commission not to limit the opportunities available to families who cannot afford to live in Palo Alto and access our excellent schools. Doing so would cut against the values of diversity and equity that we as a community [unintelligible].

I want to be clear, I do not combine my support uncritically and I will always push my alma mater to do better as a member of this community. But I support the parking design and enrollment changes as currently proposed because this is a good plan on its merits. One that holds the school to good behavior and supports its ability to be a real force for good in Palo Alto and I urge you to support this plan as well. Thank you.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Klicheva: Thank you and our next speaker is L... a speaker with the username LFP. Speaker with the username LFP you can unmute yourself and share your comments with us.

Ms. Tanner: Sir or ma’am, you’ll have to use your unmute button on your side. We’ve unmuted you from the City side but you’ll have to mute; which should be in the lower left-hand corner of your screen I believe or at the bottom of your screen on Zoom. We may have to return to that speaker, Chair.

Chair Hechtman: Let’s... yeah, let’s move on to the next and see if they can figure it out over time.

Ms. Klicheva: I’ll next speaker is Lian. Sorry if I miss pronounced your name.

Ms. Lian [note – no last name]: Hello, can you hear me?

Ms. Klicheva: Yes, we can.

Ms. Lian [note – no last name]: Good evening, my name’s Lian and as a new neighbor of Castilleja I want to speak about two issues, TDM, and the garage. I’m happy that after your hearing about Castilleja last fall, it was finally fully understood that the garage will not bring more cars to the neighborhood. Opposing voices have tried to confuse the issue but I appreciate that you... the EIR carefully studied the proposal and were able to see through those attempts. Castilleja is a TDM leader and I wish other organizations in Palo Alto would follow its lead. Throughout the pandemic, Castilleja has only improved upon its TDM with additional buses for students who are not ready to return to Caltrain yet. Castilleja’s commitment to keeping car trips low will not waiver because that’s the only way the school will be permitted to enroll more students in the high school. No cause for doubt here. Castilleja is already pivoting to do whatever it takes to keep car trips low.

As for the garage, I’m a strong supporter. It’s a gift to the neighborhood, a wise investment in the long-term, aesthetics, and infrastructure of both Palo Alto. The options before you all improve quality of life and preserve trees. Please remember that the new tree plan also adds over 130 new trees to campus. Another huge gift to our neighborhood.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
I’m looking forward to seeing this project finally begin. Please act quickly to lead your support again. Offer the City Council clear guidance toward a better future for my neighborhood with underground parking on Castilleja’s modernized, sustainable campus. Thank you.

Ms. Klicheva: Thank you and our next speaker is Mary Sylvester. Mary Sylvester represents a group and she will have 10-minutes. I see that Mary has removed her hand. Just a moment, let me find her in the speaker... in the attendee list. Mary, if you could raise your hand again, that would help me to find you. To you see you on the top of the list. Okay, Mary, you should be able to unmute yourself now.

Mary Sylvester: [unintelligible] Good evening, Commissioners and Staff. I’m Mary Sylvester, an immediate neighbor of Castilleja School and I have lived here for 43-years. I’m speaking tonight on behalf of Keith Bennet from Save Palo Alto’s Ground Water, who had to leave the call due to the late hour as he has work commitments, as many of us do.

Palo Alto’s Ground Water is particularly concerned with the impacts of underground construction as it impacts our community’s ground water which is becoming increasingly more valuable as a result of climate change and population growth. Underground construction has impacts during and after construction. We believe these impacts should be avoided and minimized through design and construction processes.

First, decisions on any underground construction need to be made based upon relevant and up-to-date geotechnical studies. The Environmental Impact Report must be specific for the actual project design and include accurate and current ground conditions. The DEIR for this project was prepared in 2017. The Geotechnical Studies have a clearly-stated expiration date in early 2020 and the DEIR does not consider the excavation proposed for the swimming pool but it only contemplates a single level underground for the garage. This is a very material difference.

The pool deck is 15-feet below ground surface and excavation for the pool will extend to approximately 27-feet below ground surface. Allowing for the 7-foot depth of the pool, pipes, and pumps below the pool and an approximately 2-foot thick slab of concrete to reduce the buoyance when the pool isn’t filled. The water table at this location is about 25-feet below ground surface in autumn, rising to about 18-feet below ground surface during winter storms. We must assume groundwater will be encountered during construction as it was in 2006 for construction of the gym.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Palo Alto Building Code requires contractors to dewater at least 2-feet below the deepest excavation and contractors invariably dewater further. Therefore, we can assume groundwater will be lowered at least 5-feet to 30-feet or more below ground surface. Applicants often site compliance with Palo Alto Groundwater Ordinance as providing necessary protections from impacts. However, Palo Alto Dewatering Ordinance does not impose any, and I repeat, any restrictions on the rate or total amount of groundwater pumped. Contrary to the perception of many, unless specifically required as a Condition of Approval, the ordinance does not require use of cut-off walls to limit groundwater waste. The extent and impacts of dewatering are significant. Based upon measurements in Old Palo Alto with similar soils, groundwater will likely be lowered by 5-feet or more many months likely over an area extending 500-feet from the construction site and 2-feet or more over a circle 1/2- to 1-mile in diameter and tens of millions of gallons of a valuable resource will be discarded.

Castilleja is on the border of an area of high recharge for our deep aquifer levels that Palo Alto uses for our emergency portable water supply. So, pumping groundwater here reduced aquifer recharge. It is well known that lowering the groundwater table results in subsistence which is pertinent for the alluvial fan soils typical of Old Palo Alto. Typical subsistence is about 1 percent of the amount of groundwater lowered which corresponds to 1 ½-inches or more for this project. I have clearly observed and documented such subsistence from residential dewatering at my house from basement construction 100s of feet away as well as associated permanent damage. Furthermore, groundwater is a source of moisture. Especially for trees as soils above the water table are moistened by water whipped up through the soil and the mature tree roots grow down into the moist soil zones.

An often overlook environmental impact of underground construction in high ground water areas is greenhouse gas emissions from the concrete used. To prevent the structures from floating up, Palo Alto’s Building Code requires the building to be heavier than the water it is displacing for the highest anticipated groundwater level. Although, an accurate geotechnical estimate is needed for design, considering the very large rise in groundwater levels during major storms. I estimate that the design requirement of buoyance for groundwater rising at least 8-feet above the bottom of the excavation. For a pool of this size indicated, 1,350-tons of concrete will be needed just to counter act buoyance. That’s 675-cubic yards. The pool deck and underground walls will likely use another 400-tons of concrete. Another approximately

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
2,000-ton of concrete is required for the floor, roof, and walls of the garage. For a total of 3,350-tons. The manufacture of concrete releases 400-lbs of CO2 per ton of concrete. The CO2 emissions for the underground construction are therefore approximately 1,340,000-lbs. Let’s put some perspective on this number. Palo Alto is strongly encouraging residents to replace their gas-burning ranges with electric. We use three therms per month of natural gas for cooking and hot water combined. Burning one therm of natural gas results in the emission of about 11.7-lbs of CO2. So, our consumption of natural gas for heating and hot water admits about 420-lbs a year. The CO2 omitted for this project under ground construction is the about the amount omitted doing to... due to cooking and hot water heating in 3,200-years. Retrofitting 320 residents with all-electric ranges and water heaters would offset these emissions over 10-years.

The large underground construction increases the load on our stormwater management system. Approximately 80 percent of stormwater is absorbed by soil. Then flows to the Bay. The buffering system both filters the runoff and reduces load on our stormwater drain and is motivation for Valley Water and the City of Palo Alto to require rain gardens, permeable pavement, and other features for capturing stormwater.

Underground garages are expensive to build. In summary, construction of the pool underground has many impacts on groundwater and greenhouse gas emissions. With construction of the underground garage likely will not directly impact the groundwater during construction. The loss of soil for absorbing groundwater and greenhouse gas emissions are significant. An updated and comprehensive DEIR is needed at a minimum and we suggest the applicant seriously consider design alternatives including ways the need for parking could be ameliorated through quality transportation demand systems. Thank you.

Ms. Klicheva: Our next speaker is Maya Blumenfeld.

Maya Blumenfeld: Hello and thank you. My name is Maya Blumenfeld and I’m here to speak in support of Castilleja’s thoughtful, environmental sounds and highly commended modernization plan. Single-sex education can be transformative, especially for some girls. Luckily, we live in Palo Alto, a town where students who want to go to a girls’ school can do just that at one of the finest girls schools in the country. Tonight, you can again recommend this proposal to City Council.
Last year, you began to discuss Conditions for Approval understanding that there is most certainly a path that should lead to approval for this project. One of the most important moments I believe during that meeting took place when Commissioner Hechtman relayed a conversation he had with his wife about what the number 540 signified. He explained that she’d reminded him that 540 represented real people. Girls who are seeking an outstanding education. Because the modest... because of the modest increase in students, it’s 25 per year for 5-years, can be accommodated on the Castilleja campus without an increase in traffic and without negative impacts. There must be a path forward to approval.

Tonight, you have more improvements and options offered by Castilleja. More additions to a series of compromises. One thing that we can all agree on, getting cars off neighborhood streets is a great idea. Castilleja has given you five ways to do just that and the sooner that decision is made and sent to City Council. The sooner those girls can gain access to the educations that they are hoping for. With no new trips to campus and fewer parked cars on neighborhood streets.

Please, approve this project again. It’s better than ever.

Ms. Klicheva: Thank you. Our next speaker is Rebecca Sanders.

Ms. Rebecca Sanders: Good evening Commissioners and Staff. My name is Rebecca Sanders, I am Co-Chair of Palo Alto Neighborhoods which is an umbrella organization supporting residents and neighborhood groups across the City. Our organization has voted to have me express our concerns and encourage better solutions.

When another applicant with an R-1 site recently came to Council and asked for unprecedented exceptions. Our Mayor suggested that they come back with something that complies with the law. Now, none of the five parking proposals submitted by Castilleja do comply because all would add way more floor area to the site than is allowed. The Council hasn’t even agreed it will allow that extra floor area. So, there may be significant legal obstacles as well.

So, here at PAN, we would like to discuss an alternative parking solution at Castilleja that does comply with the law. Right now, there are 89 parking spaces on the site. These are all surface
spots. If Castilleja adopts a TDM that earns them the 20 percent parking reduction as in Option C. They will only need to provide 83 parking spaces in total. So, they can actually remove six of the current surface spaces and fully meet their parking requirements. And ta-da, no huge underground garage is needed at all.

There are so many benefits to this alternative, we wonder why it isn’t at the very top of the Staff report, why it’s not under consideration. It will save millions of dollars of construction costs, lots of time, it’s far better for the environment, and it eliminates the need to excavate a massive hole. Pouring in tons of concrete, disrupting our water flow. With no garage, driveways, and ramps leading to it aren’t needed which Castilleja get’s an estimated extra 4,000-square feet of surface land to use. Having no garage helps both the neighbors and commuters on Embarcadero by avoiding an enormous disruption due to construction. And without the garage, you don’t need to craft a text to create a giant exception to Castilleja for the underground facility. Because with no underground facility, no exemption is needed.

So, just like Mayor suggested to the other applicant, there is a way that Castilleja can come back with a project that complies with the law. We’ve heard only one objection to eliminating the garage. Namely that surface parking isn’t so attractive but neighbors aren’t objecting to the current surface parking at Castilleja; which this proposal actually reduces anyway. We’re sure there are further ways to screen the remaining surface parking should anyone ever deem that necessarily.

Please consider an alternative to granting Castilleja this unprecedented waiver of our floor area but just having it use surface parking. It will be helping the environment, the school, and our entire community. And with my final moments here, I just personally would like to say thank you to Keith Bennett and Mary Sylvester for that fantastic review of the impacts on our water system. I thought that was excellent. Thank you.

Ms. Klicheva: Our next speaker is Andie Reed and Andie represents a group of five people. So, she… Andie will get… Ms. Reed will get 10-minutes. Ms. Reed, we cannot hear you well. It’s very low volume and it sounds like you’re under water.

Andie Reed: Oh dear.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.

Ms. Klicheva: Now we can hear you well.

Ms. Tanner: Yeah, that’s better. Thank you, Ms. Reed.

Ms. Reed: Oh ok. [unintelligible]

Ms. Tanner: Oh, can you come... I think you maybe you’re going away from the microphone perhaps or moving. It could be even slightly as moving your head sideways can sometimes decrease the sound.

Ms. Reed: How is this? Is that good?

Ms. Tanner: Try it one more time.

Ms. Reed: How is this?

Ms. Tanner: Come a little closer. You just... you were just audible... better audible a second earlier.

Ms. Reed: [unintelligible]

Ms. Tanner: Yes, there you go. Whatever you’re doing now please keep doing that.

Ms. Reed: Okay, thank you. Good evening, Commissioners. Just one quick note I wanted to let the Commissioners know that my neighborhood PNQL emailed two of the Planning Commissioners. [unintelligible] for directions where to drop off our binder. So, I’m sorry to not hear [unintelligible] on Mr. Alcheck and Mr. Hechtman but I would be happy to do so.

Let me start, we have [unintelligible](interrupted)

Chair Hechtman: We... can we pause the clock for a minute. I don’t know if it’s just me but I really can’t understand what Ms. Reed is saying.

Commissioner Lauing: I can’t either.
Ms. Tanner: Ms. Reed are you using a headset or anything or are you in a larger room?

Ms. Reed: You know, I can go over and use my husband Hank Sousa.

Ms. Tanner: I don’t know what you’ve just done. Right now, when you said Hank Sousa [unintelligible], I could hear you very clearly.

Ms. Reed: Okay, I’ll try not to move my head.

Ms. Tanner: I know it’s hard but we can hear you at this moment. Do you want to try to relocate or do you want to go on with what you have right now?

Ms. Reed: Well, I’ll just go on if you can hear me now.

Chair Hechtman: No, it’s... you’re really coming in and out and so perhaps what I’d like to do is have you take a minute. It sounds like you might have a different computer you could use. Let us move to the next speaker Ms. Gross and then try you again. Will that work?

Ms. Reed: Yes, my other computer says Hank Sousa on it. So, I’ll walk over to his computer.

Ms. Tanner: Okay, we’ll come back to you in about 3-minutes then.

Ms. Reed: Please, thank you.

Ms. Klicheva: Okay, great, so we have (interrupted)

Commissioner Alcheck: It might be because one is hearing the other and it’s designed to mute secondary sounds.

Chair Hechtman: If she and her husband are both active on their computers near each other, yeah.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Klicheva: Our next speaker is Barbara Gross. Barbara, you can unmute yourself and share your comments with us.

Ms. Barbara Gross: Good evening, this is Barbara Gross. I live and work and vote in Palo Alto. Thank you for sending this proposal forward with your approval last year. At the City Council’s direction, the school has improved upon the previous design which should make this quite easy for you to review and return to the Council with your support.

Among the improvements, more trees are preserved, there are many options of the underground parking, there are choices for the pool, and the delivery day.

You may have noticed by now that over the years the goal posts of this project keep moving. What’s more, the school is getting confusingly and seemingly contractionary guidance at times. With these many different choices for the size and configuration of the garage. You can help find a fair compromise that will stop this constant shifting of the debate.

The delivery options on Emerson both vastly improve our current conditions. Moving deliveries further inside campus and below-grade or behind a sound wall. Both options take neighbor’s needs and concerns into account and I see that the school again in the spirit of compromise is open to either option.

At the same time, I hear opposing voices who seem to be open to nothing at all. It becomes harder and harder to honor those perspectives when the school has spent years listening, adjusting, and making changes that just never seem to be enough. Please, it’s time for you to approve this project again. Thank you.

Ms. Klicheva: Thank you and we are coming back to Andie Reed. Andie Reed, I believe she said she’ll be using Hank Sousa’s laptop. So, I’ll unmute Hank Sousa.

Ms. Reed: Great, thanks very much. Can you hear me?

Ms. Klicheva: Yes, we can.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Reed: Awesome, okay, thanks so much. We are gratified that the City of City Council in March requested an accurate measurement of square footage for Castilleja’s expansion project. This is very important because the school is requesting a Variance to replace current existing floor area. But that number has changed over time and even that does require a Variance. Now at least we have an accurate count of the square footage being requested in this Variance. City Planning Staff solicited a professionally prepared building survey and gross floor area assessment which I’ll call the Dudek report which we got on November 17th. And it shows the current existing Gross Floor Area is substantially in excess of what is allowed by Code. It is 138,000-square feet versus 81,000-square feet. In turn, this information also shows that the Variance request is also significantly an excess of Code and I didn’t see this in PTC Packet a link to this very important document prepared by Dudek that finally settles Gross Floor Area. Does this report come under your purview tonight?

The middle of Packet Page 104 states tonight’s goal is receiving public feedback and PTC direction on any further adjustments that may be necessary. Seeks the PTC’s direction on any topic area that requires further analysis. Additionally, on Packet Page 105, second paragraph, the PTC in its review has the authority to review and make recommendations on the CUP, comprehensive review of the TDM, and the Variance. This would seem to include this Dudek report which we just got.

The next paragraph discusses the split vote on the Variance. However, the findings on the Variance in the 11/4/2020 PTC Staff report Packet Page 28 doesn’t actually give the number of square feet that is being asked for in excess of Code. I believe one of the Commissioners asked that now and that number is 47,300 and that Variance finding from last year didn’t say what the Code Floor Area Ratio is as compared to what the school wants to build. Now that Floor Area Ratio being proposed is 4.8 and what is allowed to be built per code is .30.

There is a schedule in the ARB Staff report showing the summary of Dudek’s count. City Staff adds the column showing proposed demolished buildings and proposed new buildings. Plus, some lines at the bottom that subtract out the volumetrics. At first glance you think oh well that makes sense but here’s the thing. Dudek was hired to provide the calculation of Gross Floor Area anal sized with reference to current Code. These... the two buildings that have immense extra square feet because of volumetrics were both rebuilt after the Code was in effect. We have to respect Dudek’s expertise and not change the numbers. Just because the

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
proper square footage wasn’t reported when those buildings were rebuilt. Does not make them
compliant with Code as Dudek points out in their analysis of what is existing Gross Floor Area?
The unabated growth of the school over the past decades, most of it since the Zoning Code
have been in effect. The gym, the fine arts buildings were rebuilt in 1998 and 2006. The
mechanical building was built in 2001 renders the school’s replacement of current GFA a much
larger ask than previously acknowledged.

This is not just a numbers game. The reason those Code sections were established is to limit
heights. Requiring them to be counted as second or third floors so the massing and stark nature
of the towering effect would be accounted for. Neighbors have been saying for years that the
proposed block-long building is too massive for our neighborhood of small houses. Further
review of the plans Pages G.004 and G.005, clearly show additional Gross Floor Area of 71,000-
square feet that is being proposed but is not being counted. These pool equipment building is
not under a building. It is underground. It’s not under a building. These square footages are not
a portion of a building. So, therefore, they have to be added to Gross Floor Area. We are always
having to find this stuff and it’s getting old. Can you ask the Planning Department to review
these plans when they get settled? Although it doesn’t add to Gross Floor Area, it is very
interesting to note that the underground square footage, not including the garage, is proposed
to increase from 41,000-square feet to 80,000-square feet. City Council Motion Item B
discusses reviewing an underground garage facility alternative that allows a maximum of 50
percent of the requires onsite parking to be below grade. I want to point out that the parking
report from July 2021 prepared by Fehr and Peers is linked on Packet Page 111, but the very
important point that this report identifies that there are currently 89 surface parking spaces on
campus is not mentioned in the Staff report. City Council has determined 89 parking spaces are
sufficient for this project. We understand that the school would like to move their pool in order
to increase the mass and volume of their large building. To very controversial issues. However,
doing so reduces surface parking by 60 spaces and takes advantage of a Floor Area Ratio based
on misstated existing Gross Floor Area. Removing 60 surface parking spaces causes a problem
they currently have as there are already 89 spaces. Can you please address?

Regarding an RPP, once we look at how it would require neighbors to pay for parking, which we
now have for free, and doesn’t cover nights and weekends during events when we sometimes
have issues and it excludes the school. We can’t figure out why it’s mentioned. As we have

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
   of speakers.
stated for 5-years, we have an understanding with the school that they park on their side of the street and we park on ours and generally, it works great.

As to events, the link in the Packet leads to a schedule that’s undecipherable. It would be helpful to have a complete suggested list and have the neighbors in on the conversation before any CUP is finalized.

As to the TDM, the link goes to a four-color public relations piece that is very impressive. Neighbors main concern is enforcement. This piece shows strategies for counting cars that include counters that are on campus driveways, self-monitoring via surveys, and staff/student oversight committee. But since most... some of the parents drop their children off on the streets. We can’t figure out how these will be counted. We realize that the actual details are yet to be finalize and we want to be in on that.

In closing, neighbors are amendable to an enrollment increase of 450, rebuilding in less volume and mass, using current surface parking spaces, and lowering the number of events at nights and weekends. We would love to get behind a rebuild that covers these issues. Thank you for your hard work on this project.

Ms. Klicheva: Our next speaker is Bill Burch and Bill get... Mr. Burch will receive 10-minutes. He represents a group of five people.

Chair Hechtman: But before Mr. Burch goes, it’s after... it’s 10:05 and so we’re going to take a 5-minute break. Let everybody stretch their legs and we will resume. Mr. Burch, please be ready to go at 10:10.

[The Commission took a short break]

Chair Hechtman: Commissioners as you return, please turn on your camera at least momentarily so I know that you’re back and we can resume. Alright, it looks like we’ve got six out of seven.

Commissioner Templeton: Chair, this is Cari. I am here but I’m not able to turn my camera on right now.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Chair Hechtman: Okay, alright so we are all back and can move to Mr. Burch on behalf of his group.

Mr. Bill Burch: Hi, just want to check and make sure you can hear me okay?

Ms. Klicheva: Yes, we can. Thank you.

Mr. Burch: Great, thank you. Members of the Planning and Transportation Commission and Staff, I want to thank you for this opportunity to speak on behalf of Castilleja School. My family has lived in Palo Alto for over 40-years and in that time, we’ve come to love and appreciate our community. We are blessed with wonderful natural resources stretching from the Baylands to Foothill Park. We also enjoy our cultural treasures including the Children’s Theatre, fantastic libraries, Stanford University, and yes, I would include Castilleja School as well. We can thank the foresight of those who came before us for these gifts. We should also appreciate the stewardship of our current civic leaders for such great new resources as the new Baylands Bike Bridge and the Junior Museum. The Palo Alto process can be painstakingly arduous at times but wonderful things can be achieved.

It’s in that spirit of process that I’d like to take you back nearly 10-years ago when Castilleja first reached out to City Staff and neighbors about their plans to upgrade the campus and desire to increase enrollment. Since those initial meetings, Castilleja has shown good faith and a willingness to listen and compromise. For example, on-campus events were drastically cut to reduce impacts. Deliveries and pick-ups have been reduced and limited at a cost to the school to improve conditions in the neighborhood and the school has limited it hours of operation.

Castilleja TDM, Traffic Demand Management Program, has grown to become a way of life with daily trips reduced by up to 31 percent by adding new bus routes, providing dedicated morning and afternoon shuttles to Caltrain and East Palo Alto; as well as requiring employees to commute by alternative means 3-days a week and park off-site on those days that they do drive. Castilleja advocates for internal carpools and ridesharing while encouraging cycling and walking for all community members who can do so. That willingness to listen and compromise is reflected in the evolving campus design. The architects have reduced the massing of the buildings along Kellogg and Bryant. While the underground parking and the pool area have

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
been reconfigured to further protect trees. As you know, the school is now offering several
different options for the garages and two choices for the location of deliveries in response to
guidance from the City Council.

A 10-years process, all the while time keeps passing, and all the while Castilleja cannot offer
admission to students who are seeking this education. Every year spent in process, negotiation,
and compromise has resulted in scores of young women being shut out from joining the
Castilleja community. Time is passing. The school is making compromises, many of them, and it
begins to feel like it will never be enough. Like there will always be a new issue to delay this
process. This project has been receiving unprecedented scrutiny for over 10 long years.

Meanwhile, while we are spending so much time talking about setbacks and trees, and traffic
patterns. We are forgetting the human impact. Castilleja is a school that is different from other
schools. It’s not the right place for everyone and luckily Palo Alto has other outstanding choices
for students who are seeking a larger co-ed environment. But for girls in Palo Alto who are
looking for something else, Castilleja is right in our midst. Walking and biking distance away
waiting for them and waiting.

Meanwhile, I know there are residents who take issue with the fact that some students come
from outside Palo Alto. They want Castilleja to cater only to our direct community and not the
surrounding towns. I feel compelled to point out that this line of thinking sounds a lot like
people want to build a wall around Palo Alto to keep the outsiders out and hoard our resources
only for ourselves. In truth, some students who come from surrounding towns live in areas
where the schools are not as strong, where they don’t have local options like Pally and Gunn,
and this chance to attend Castilleja is an opening to opportunities they can’t access any other
way. Whether we like to admit it or not, independent schools like Castilleja with 22 percent of
its students receiving tuition assistance are one of the most powerful ways to gain equal access
to educational opportunity. Especially in the Bay Area where real estate values make living in
well-resourced school districts impossible for many families. Time is passing.

I realize that many Palo Altans are concerned about growth, but let me remind you that this
project is not an expansion. The proposed building has a smaller footprint and car trips are
capped. The school has responded to neighbors, community members, City Staff, and City

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
   the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
   provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
   of speakers.
leaders with modifications that improve everything from drop-off patterns, from façade materials to roof lines.

Tonight, you will weigh in about enrollment, the garage, and events. Well, let’s run through what has already been done over the past 10-years on these topics. Events have already been brought to within the limits you’ve set and quite frankly, a further reduction in the number of events would weaken the communal fabric of the school. The garage has been reduced to preserve trees and improve conditions in the neighborhood and the school has offered several different compromises there.

So, let’s return to enrollment. The actual students who want to learn at Castilleja. The school will make sure they do so without adding trips. I know that critics have cast down on this promise but their doubts are unfounded. Castilleja is already keeping that promise with better Transportation Demand Management than anyone in the Bay Area. Castilleja will do what it takes to keep car trips level because Castilleja wants to educate more girls. This isn’t a big high-tech company, a factory, or a corporate office park. It’s a small school that seeks to build a 21st-century learning space and gradually add more students without adding traffic. If we step back for a moment, one could argue that years spent on debate have begun to make the proposal seem much bigger than it really is. Remember, small school, smaller footprint, and a gradual and modest increase in enrollment with no new traffic.

Let’s seize this opportunity to switch the onerous Palo Alto process to one of Palo Alto progress. The Conditions of Approval can be met. Let’s continue to respect the ideals of Palo Alto. Great schools, commitment to the greater good, opportunity, and community. It would seem to me that this proposal checks all of those boxes. Thank you very much for the opportunity to address you tonight.

Ms. Klicheva: Thank you. Our next speaker is Cindy Chen. Cindy, you can share your comments with us. Thank you.

Ms. Cindy Chen: Great, I just wanted to make sure your timer was ready for me. Thank you.

Ms. Klicheva: Thank you so much for waiting.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Chen: Of course, thanks for your help. Thank you, Commissioners, for this opportunity to speak. I live on Emerson Street very close to the Castilleja campus and I want to express my appreciation for the garage options presented to you this evening. I recall last year when the City Council directed the school to reduce the garage capacity to 52 cars. At that time, it struck me as an arbitrary number. It was significantly smaller in order to address concerns of a few neighbors but why 52? Did they actually know the number of spots that could be fulfilled the school’s required spaces per City Code? Did they know the number of spots that would still allow more trees to be preserved? Did somebody study that the 52 car capacity would mitigate traffic in a way that no other could? The answer to these questions is an emphatic no. The 52 car limit was an arbitrary finger in the wind number. Unfortunately, its effect is to significantly impair the school’s ability to educate more young women, and yet to oblige, the school has submitted plans to you that meets Council’s limit. Instead of recommending that plan, however, please approve their garage with 69 car capacity.

The slightly larger capacity will get more cars off the street, it will prevent parking on Spieker Field, it preserves trees, and it still adds to additional traffic on any surrounding street including Emerson, my street. Having a 60 car capacity is a sound proposal. I thank you for your continued attention tonight and I know it’s going to be another late night so thank you very much.

Ms. Klicheva: Thank you. Our next speaker is Hank Sousa. Mr. Sousa, you can unmute yourself and share your comments with us.

Mr. Hank Sousa: Thank you. Hello PTC Members. I live by… nearby Castilleja School, about 185-feet away, and would like to suggest some alternatives to their expansion plan. First, hold off on any additional enrollment increases after the 450 suggested by the Council motion. Leave off further increases until we neighbors can access the impact. Suggest the school stay at that number, 450, for 10-years. Most of us close-in neighbors are into our senior years and do not want to keep pushing back every time the school is granted an increase. Let’s see how they do with this less excessive enrollment bump.

Next is the parking discussion, there are currently 89 parking spots at grade on campus. More than enough to enroll 450 students and still a good number to continue the successful, small school model. Suggest the school no longer allow students to drive themselves and insist that

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
shuttling bring the vast majority of students to the campus. Off-campus sites would allow parents to drop their kids where they board the shuttles for the ride to campus.

The idea to move the swimming pool results in the loss of 60 parking spaces. Its current location is fine and will fit in with the new building after a couple of minor tweaks. The idea to excavate a large area to recess the pool is wrong-headed. Leave it where it is and that allows the current parking to stay in its several locations around the campus. No need for deep cut-off walls around the pool which interfere with drainage of the water shed. Put sound walls around the pool or a retractable cover like you see in some hotels. These are softer, easier solutions to the proposed rebuild.

We neighbors have conveyed these ideas for many years but don’t get much traction in the City Planning Offices. Who speaks for us? The Planning Staff appears to be advocate for the applicant. We have spent money hiring an attorney to advise us but again, who at the City speaks on behalf of the neighbors who want a less impactful project? Please don’t try to pack 10 pounds of nails into a 5-pound bag. The school is already very densely populated. Stick with a small enrollment increase while recommending against an underground garage. Thanks for hearing our concerns.

Ms. Klicheva: Thank you. Our next speaker is Jason Stinson.

Mr. Jason Stinson: Hopefully you guys can hear me?

Ms. Klicheva: Yes, we can.

Ms. Stinson: Great, thanks. Good evening Commissioners and everyone else on the call. Here we are again, still discussing the Castilleja project. For years the school’s been modifying and reducing the scale of their proposed modernized campus and I hope this evening you will recommend approval of the significantly smaller 69 car underground garage as well as modified pool design that includes moving a stairway.

I want to focus on the trees this evening. That’s been a big issue. It’s been brought up a lot in the past. I haven’t heard as much tonight, but many of the school’s recent changes have been

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
design specifically to further protect their canopy. In particular, changes have been made to the pool and the parking garage in order to mitigate the impacts on protected trees.

First, the 69 car garage protects the trees just as well as the 52 car garage. It also serves the neighborhood better by moving more cars below grade but most importantly it protects the trees. Secondly, making adjustment to the placement of the pool stairway and the electric transformer will further protect tree 89. In addition, choosing this pool option still allows deliveries to be moved below grade which I believe is ideal for the immediate neighbors from a noise standpoint. And thirdly, the school is adding 100 new trees to their campus as has been said by previous speakers. While it may be many years until these trees are mature, they are investing in the beautiful canopy for generations to come.

Like many Palo Altans, I really like trees, and the ones that line our City and beautify or line our streets and beautify the City are amazing. We also really love our City schools and investing in education has always been a Hallmark of Palo Alto values. Castilleja is consistently ranked among the top five all-girl schools in the country. It’s a remarkable resource for our community. They’re investing in their trees, they’re investing in sustainability, and they’re investing in education. And I believe now is the time that we just move forward with this project once and for all. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Jim Fitzgerald.

Mr. Jim Fitzgerald: Hi, this is Jim Fitzgerald. I am a long-time resident of Palo Alto and I’m here tonight to provide my unqualified support for Castilleja’s new redevelopment plan. I want to thank all of you on the Committee for your support and endorsement of the previous redevelopment plan. And it is just unfortunate that we need to tie up your time again to address this project once more due to a small group of objectors.

Everything about this updated project provides improvement for all parties. Including exceptional education for more young women, reduce traffic flow, enhance beautification of the campus, and... as well as enhance beautification for the neighbor-facing buildings and grounds. I might add this was accomplished in the first plan that you all approved but this plan just goes further in that direction and improves it further.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
This new Castilleja plan goes even further in preserving trees, reducing traffic and car trips, limiting hours of operation and education events, further enhancing the aesthetics of the campus for the neighbors with lower roof lines, increased setbacks, and more underground square footage to reduce the activity above ground. These steps have created additional burden for Castilleja in delivering its... on its noble mission but it continues to be a quality neighbor and very committed to making these changes work. Even through the operational inefficiencies that it may create. I’m doing... in doing so, they can finally build the modern facility needed to nurture and educate the next generation of women leaders.

As always, Castilleja has bent over backward to meet the concerns and objections of those who oppose this project. But however, no one is saluting themselves that any plan will really satisfy this obstinate group. So, I would advise you to not hold your breath waiting for that concurrence from them. What matters most is this Committee provides its endorsement of this excellent redevelopment plan. This plan addressed the concerns of the City Council and is even better than the last plan that was approved by your folks. So, this plan... so I’m asking that this plan receive your enthusiastic re-recommendation and in particular, supporting the larger parking options of this plan. And I request you provide that as soon as possible. Thank you very much.

Ms. Klicheva: Thank you. Our next speaker is Kathleen Foley-Hughes. Kathleen, you can unmute yourself and share your comments with us.

Ms. Kathleen Foley-Hughes: Thank you. Thank you. Again, my names Kathleen Foley-Hughes and I’m a long-time resident of Palo Alto. Good evening Commissioners and thank you for your service to the City. Thank you as well for voting to recommend this project to the City Council last year. Castilleja is a gem in our City, an absolute asset, and it has been frustrating to see these excellent plans move so slowly. I imagine it must be somewhat surprising to see them before you again after you put so much time and care into reviewing and recommending them last year.

These new improvements should only make that process easier this time around. Most trees are preserved in all options, TDM is still an institutional priority which the pandemic has only further proven as the school added new bus and shuttle routes when Caltrain ridership decreased.

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Castilleja is an excellent neighbor and a good citizen with students who are always giving back to Palo Alto. As the founder of Ada’s Café, I have experienced this first hand. From its inception, Ada’s has relied on Castilleja students’ engagement and we are not the only organization in Palo Alto that benefits from Castilleja’s presence in our community.

You label the Environmental Impact Report for this project as the gold standard. One of the best in the City’s history. This project is vital to the school’s future and the school is vital to our City’s future. These five different choices for the garage and two alternatives for the pool and location of deliveries together offer a way to arrive at a compromise. I know that all of the choices before you will improve conditions in the neighborhood with as the Environmental Impact Report proved. No significant and unavoidable impacts. Thank you so much for your time. Good night.

Ms. Klicheva: Thank you. Our next speaker is Lesley King and Lesley represents a group of five people. So, Ms. King will receive 10-minutes.

Ms. Lesley King: Great, thank you.

Ms. Klicheva: Just a moment, let me quickly adjust the time and we’re good to go.

Ms. King: Thank you. My name is Lesley King and I own a house about a block from Castilleja. First, I want to thank the Commissioners for all the hard work you do on behalf of our town. I’m speaking tonight on behalf of a few other residents as strong supporters of the Castilleja renovation and we have a few comments to make.

The nuances of this project review are very confusing as a lay person. So, some of our comments are meant to clarify some of the items that I believe should no longer be controversial. As I read the Staff report issued in advance of this meeting, I understand that you, the Planning and Transportation Commissioners have the authority to make recommendations on the CUP, the Transportation Demand Management Plan, the Variance, the parking adjustment, the EIR, and the Text Amendment proposed by City Staff. That’s a long list and one that Commissioner Lauing mentioned tonight and I know that you take this responsibility seriously.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
My first comment is about your recommendations on the CUP. I think this relates to the enrollment increase and the TDM measures to ensure no new trips. As of now, the mandate you have received from City Council calls for starting with an enrollment increase to 450 and identifying a procedure to allow Castilleja to increase to 540 in phases contingent upon compliance to no new trips. This procedure as far as I can tell is already outlined in the application and for some reason, I feel that this no new trip fact has been hard for the community to grasp. The application has specific language that outlines the very gradual and measured path the school would need to follow in order to be allowed to admit more students. If the growth begins by taking the school to 450 from the current 426 that Amy French just mentioned. The school would need to successfully meet the no new trips threshold before it is allowed to add more students. And if that goal is met, the school can then add another 25 to 27 students in the next year. As you can see, the procedure seems to already be in place and I was pleased to see that Castilleja put forth an even more detailed set of procedures in response to the City Council’s latest comments. Even the procedures were already comprehensive. In my study of the plans, I see that the successful traffic TDM measures were well developed and in place. Showing me the compromise and cooperation that Castilleja has demonstrated throughout this prolonged process. And from what I read in the Weekly, the school has again proposed additional policies. Including ones that have been mentioned tonight, new shuttles, bus routes, bike-sharing, guaranteed rides home in emergencies for employees who don’t drive, an internal lift program, and a kiss and ride program with parents dropping children off at an off-site location to meet a shuttle. All this comes in addition to the measures that Castilleja has already taken over the past 10-years to reduce traffic by over 30 percent. So, the school has already run a successful TDM program and seems determined to continue to succeed. And I just want to reiterate the good news that the burden is on the school to show continued success with TDM. Since Castilleja wants to enroll more girls, the no new trips will need to be a priority. It’s not the neighbors or the City’s or even the PTC’s burden. It’s on the school to earn the right to enroll more students.

The second point on this relates to the complaints I’ve heard from a few vocal opponents who point to the fact that the school over-enrolled over a decade ago and they point to this as evidence that it cannot be trusted. Those days are clearly over. The school has been under a microscope at every moment. The length of this renovation approval process, the depth of study invested in the EIR, the standards that have been applied to this project are not ones I’ve

seen applied to other projects. In my opinion, Castilleja has accurately recognized that accountability is essential to rebuilding trust and moving forward and thus accountability is built into the application.

The next item in the City’s Staff report that I want to address is the parking garage. I really appreciate Commissioner Alcheck’s comments that the debate about the size of the garage is counter to the original request from the community asking for underground parking. The City recently directed Castilleja to limit the size to 52 spaces and it’s my understanding that this is 50 percent of what was required for total parking for the project. But at the ARB hearing last week, the Board Members supported Plan E because it complied with the City Council’s guidance. However, all five of the five Board Members admitted that they also support Plan D with 69 spaces because it protected as many trees and maximized undergrounds space which they admitted seemed wise. So, the ARB Board Members were unanimous in their support of 69 spaces below ground. I agree with them. I was at the City Council meeting when the number 52 was introduced and it seemed to be pulled out of the air. Is it an arbitrary number? Where they just thinking that 50 percent is somewhat fair? Since the desire to reduce the garage was driven by the effort to preserve trees and reduce the construction scope. If the same benefits to trees can be accomplished with 69 spaces instead of 52. Why wouldn’t we put more cars below ground? This plan was deemed superior by the EIR. It is supported by the City’s Comprehensive Plan and even the City’s ARB Members were left tossing the question around at the end of their long hearing. They didn’t seem to have a good answer as to why we were going forward with 69 spaces.

My final observation about the Staff report is just a small and specific one that reveals a larger and more general concern that I want to present. As... on Page 10 in the short side, the report admits that even though the large chart in the previous several paragraphs suggests a shortfall of 30 spaces if the school enrolls 540 students. The chart and the parking demand study did not take into account any of the TDM measures. And I know that Amy French mentioned this earlier this evening but this analysis is inaccurate and incomplete and I don’t know why it’s being presented. It looks to us as... in the public that it’s underlying an inconsistency. We’re relying on arbitrary numbers to determine whether this project can succeed? Is that in the best interest of Palo Alto? So, 52 is the number of spaces that the City Council directed to be below ground. Why are we wedded to 52 when 69 spaces can be accommodated while still preserving the trees? 30 is the shortfall of spaces that the school reaches 540. That doesn’t take into account

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
the TDM so it’s irrelevant. Why would we begin a conversation this important with such flawed data?

And 50 percent the amount of parking capacity that can be allowed below ground in the suggested Text Amendment. This amendment which requires that only 50 percent of parking can be below ground or the entire measurement of the project will be redefined. Where did this guideline come from? How was this threshold derived?

I understand the need for compromise and it’s well past the time to find a middle path that serves all parties. And so, at this point I... even though the ARB and PTC have acknowledged that this is a project that should be approved. The Staff and the guidance from Council don’t seem to heed that advice and instead have raised some seemingly arbitrary numbers with incomplete data. As a concerned neighbor, I ask you please to remember that you have already said what you’ve already said about this proposal. That it should be possible to approve. I would like to see this project approved and underway so that we can all move forward. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Neva Yarkin.

Ms. Neva Yarkin: Good evening, Commissioners. My name is Neva Yarkin. I live 600-feet from Castilleja. My family has owned this property for close to 60-years. Adding another 125 students for Castilleja expansion will only lead to more traffic and congestion in the area because 75 percent of the students come from outside of Palo Alto. Building a parking garage with entrance off of Embarcadero/Bryant and exit Emerson/Embarcadero will only create more grid locks in the surrounding area. If Castilleja used a school-wide shuttling service, like Nueva and Harker Schools, this could help with some of the traffic problems. Building a parking garage will need many tons of cement. One ton of cement gives off one ton of carbon dioxide. Palo Alto should not allow any more parking garages if we are truly concerned about environment for future generations to come.

I have safety concerns regarding 5-years of construction and I’ve said this before. Castilleja continuing to teach classes in portable buildings while major building construction is going on would be an accident waiting to happen. You would have students, cars, bikers, pedestrians, neighborhood residents, etc. trying to navigate in between huge trucks and heavy equipment is
playing with fire. When Stanford was rebuilding their student housing, only construction workers were allowed into the construction site. What about Palo Alto’s future? Pally, Stanford, and train crossings will also have impacts and need to be considered in the future.

In summary, lowering student enrollment to 450 students, reducing traffic by using a school-wide shuttle service, having a construction safety zone, cutting greenhouse gases would help reduce Castilleja’s impacts in the area. Thank you for your time.

Ms. Klicheva: Thank you. Our next speaker is Rita Vrhel. Ms. Vrhel will receive 10-minutes because she represents a group of five people.

Ms. Rita Vrhel: Hi, can you hear me?

Ms. Klicheva: Yes, we can.

Ms. Vrhel: Okay, good evening Commissioners and the public. As a Castilleja parent, I have observed with acute interest the presentation and discussion of Castilleja expansion plans. I do not live near the school but I do need to remind everyone that there are other schools in Palo Alto that educate girls. So, this is really not a question of having our girls uneducated versus they must go to Castilleja. I also would like to disagree with several speakers who felt the need to not only state their opinions but to denigrate speakers who did not agree with them or were presenting the other side.

Recently, two very important reports were released. They were the Fehr and Peers 7/23/21 Castilleja Parking Study commissioned by Castilleja School and Dudek who wrote the DEIR, which Commissioner Hechtman I believe called the gold standard, released an 11/17/2021 report on Castilleja’s Built School Building Survey and Gross Floor Area assessment. This report was referenced earlier by Andie Reed. Interestingly, even though this report was... one report was published in July and the other in November. Neither report in total was included in the ARB Packet or in the Packet that was sent by City Staff to the PTC. I emailed them a copy of each report and hoped that they will take the time to read it because Ms. French basically did not discuss either report at all. This is probably because these reports equal what I am calling an inconvenient truth. The information in these two reports, if evaluated with a fair mind, should cause the PTC and the City Council to send Castilleja’s expansion plans back to the drawing

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
The 7/23/21 Fehr and Peers Castilleja parking study commissioned by Castilleja School indicated a parking garage of any size is not necessary. Therefore, a Text Amendment, as suggested by the City Council, is not necessary. On Page 1 of the report, they indicated “Alternative Four, the dispersed circulation/no garage alternative would meet the City’s Municipal Code requirements providing 104 parking spaces which is based on the number of teaching stations”. Please let me report... repeat that finding. “Alternative Four, the dispersed circulation/no garage alternative would meet the City’s Municipal Code requirements providing 104 parking spaces which is based on the number of teaching stations”. The report further stated, “that an enrollment of 540 students would still meet the parking... the 104 spaces would be enough to accommodate 400... 540 students”. There was not one word in Peers... in this report supporting the need for an underground garage. On Page 2 of the report, it indicated that Fehr and Peers have monitored the peak period generation on-site parking and on-street parking adjacent to the school since 2012. These people know what they’re talking about. They’re not presenting massaged facts or figures. They have been monitoring the parking etc. for over 9-years. On Page 5, the report details the location of all 330 on-street parking spaces comprised of 54 school fronting parking spaces and 276 non-frontage parking spaces. It must be remembered that some of the neighbors proposed a parking garage as one solution to reduce the number of cars in their neighborhood. But this report indicates that around the school, there are 330 available parking spots. Therefore, is it wrong for the neighbors who live near the garage to not want this toxic dump in their neighborhood?

Page 15 of this report discusses future parking demand and on Page 19 to 23 they discuss Municipal Codes, a 20 percent and a 9 percent reduction in parking, TDM strategies that reduce parking, etc. Again, there is not one word in Fehr and Peer’s report supporting the need for a parking garage. It is exactly the opposite. So, arguments on whether the City Council knew what they were talking about or whether they were confused, or whether it should be 59 or 62 spots underground is actually null and void given this report.

Historically... well and I’m going to go back to the first part of the letter that I sent you. Castilleja is a big business. They have benefited tremendously by ignoring their 2000 CUP and use permit. They have over-enrolled and the return on their investment for this over-enrollment and their
fine of $265,000 was over $12 million. According to Castilleja’s 2015 to 2020 tax returns, Form 990, publicly available through links on Charity Navigator, Castilleja School Foundation, a non-profit 501(c)3 subject to no taxes, is doing quite well. An increase in net assets or fund balances from $90 million to $120 million was reported during this period. During the same period, contributions and grants totaled $45 million with $14.8 million received in 2016 and $13.3 million received in 2018. So, I do ask you why can’t Castilleja afford a shuttle program as recommended in the recent Fehr and Peers report?

Also, when Castilleja received their use permit in 2000, Mr. Larzarty, who was then the Planning Official, wrote a letter and included in his report that at no time did Castilleja School indicate it was in their intent to submit a later application for additional students. He also stated “That any subsequent request for additional students will not favorably be looked upon by the City” and “While the City appreciates the school’s demonstrated willingness to work with the neighbors to address existing traffic and parking problems. The City is not willing to continue to approach increasing school enrollment for Castilleja in an incremental manner”. The use permit granted Castilleja, that would be Use Permit #99-UP-48, did not allow for any increase in Floor Area or for any increase in students.

I think that the PTC would be wise to actually have the documents that have been released which I’ve noted in my speech. Review them and send this project back to the drawing board based on those reports. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Roger McCarthy.

Mr. Roger McCarthy: Can you hear me?

Ms. Klicheva: Yes, we can.

Mr. McCarthy: Good evening Commissioners. My name is Roger McCarthy and I live about a mile from Castilleja on Waverly Street. Thank you for listening to me this evening and for service on Commission… on this Commission. I know you have all better things to do at 11:00 pm tonight.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
I am speaking tonight to urge the Planning Commission to approve as quickly and expeditiously as possible the changes and upgrades to the Castilleja project that have now undergone multiple years of review and as you’ve heard suggested multiple times tonight. Should be sent back to the drawing board again. This is hopelessly ridiculous. If these poor Castilleja folks weren’t so dedicated, they would have given up a long time ago.

I have no association with Castilleja, past or present. I have a daughter in the computer technology field but I didn’t send her there. With my Ph.D. in mechanical engineering, I wasn’t worried about her technological preparation. In the 40-years that I’ve lived locally, I don’t think I’ve ever set foot in Castilleja. My interest in this project stems solely from my technological leadership positions and my concern as a Palo Alto citizen.

I’m an officer and treasurer of the National Academy of Engineers. I’m a member of the Governing Board of the National Research Counsel and now I am a Director of the National Academies Corporation. The National Academies were chartered in 1863 by Abraham Lincoln as an independent body to advise the nation on issues related to science and engineering and now medicine.

In my position, I have a national perspective of our country’s much-lamented acute shortage of women in the STEM fields. If you’ll bear with me for a moment, I think it’s important for the Commission to appreciate just how bad this situation is because you are in a position to at least help do something about it.

Our nation... our national largely co-educational system has been failing to educate young female secondary students for STEM careers at a staggering scale for generation. This fiction, oh we have other schools in Palo Alto, these women won’t go uneducated. That’s true. They’ll just go uneducated in the STEM area. Now, what’s the problem with that? The massive under-representation of women in the nation’s STEM fields is nothing short but national disgrace. Just 17 percent of our engineers are women. Just 24 percent of our computer jobs are held by women and that percentage is predicted to shrink to 22 percent by 2025 and that was before COVID; which has already been commented on as a disastrous result in the education of women. As of ’17, 2017, reported in 2019, only 36 percent of the nation's doctor where women. This represents a wretched improvement over the 23 percent we had in 2000. To put this incredibly disgraceful performance in context, even Turkey, a Muslim nation, 37 percent of

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
their doctors are women. Our low percentage of women becoming doctors puts us in ranks of some of the most misogynistic nations in the world. The world averages 48 percent, so we have to ask ourselves why does virtually the entire Western world does better than us? And of course, all these numbers has been mentioned earlier. Have undoubtedly been aggravated adversely by COVID.

Despite the intelligence and talent which we [unintelligible] look in Silicon Valley. We are a sorry copy of our national figure. The valley is dominated by men from entry-level positions to the highest leadership roles. The few women who did emerge in tech a few years ago have all been must out. So, I turn the question to you Commissioners, so what are you going to do? Are you going to wait for something else to solve this problem again? We can’t cure the nations short comings in Palo Alto, but we can certainly begin to address our own.

A key part of our national solution to this problem is the all-girls school. Virtually every study that has ever addressed this issue has found women are far more likely to enter STEM fields in an all-girls secondary education environment. And we have one of the best in the whole nation right here in our backyard. Study after study proves that graduates from all-girls schools are six times more likely to pursue fields in STEM and three times more likely to pursue a career in engineering.

We have actually the second-best all-girls high school in the entire nation right next door and the only non-sectarian one right down the street. Co-ed schools will not solve our existing STEM gender imbalance which stands in mute testimony to their long-term ineffectiveness. Sure, we’ll send them girls to school and they’ll become teachers, go into the arts where it’s more culturally approved, and they won’t go into the STEM fields. This is just a fact. This is not an opinion. Our huge gender imbalance is not going to improve without change and we’re... and we are doing now, including what we are doing in Palo Alto, is not enough. We need to do more. We need to do it now. This problem is not going to solve itself.

We need to allow Castilleja to admit more girls now because we can’t sit back and wait for change. We have to make choices to actively promote change. We certainly can’t wait for the red states to do it. My concern is for years we have created the narrow nimby interest of a few dozen residents. While we have denied at least 1,000 additional women a Castilleja education.

__________

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
So, the question before you is actually simple. Is this forum going to act as a mechanism to put the economic interest of a few over the many? Or are you going to help the overwriting interest society has in getting this project approved and started?

Perhaps the most aggravating thing these last years, the engine of these delays and denials for Castilleja project has been the nit-picky requirements of R-1 zoning. But in fairness to the opponents of Castilleja plans, using the restrictive R-1... they are using the restrictive R-1 zoning for exactly what it was designed to do, to discriminate. R-1 zoning was invented abruptly in 1916 explicitly as an engineer to achieve racial segregation in Berkeley that would survive.[unintelligible] Previous attempts to segregate by zoning explicitly mentioning race were shut[unintelligible] out. So, R-1 was invented to use economics to accomplish the racial segregation explicit racism could not, and the target of our opponent's discrimination is tailor-made for the R-1 zoning discrimination engine. Young women who have no vote and have been the target for discrimination for generations anyway. Don’t take my word for any of this. I urge you to look up the history of R-1 zoning for yourself. It’s well documented on the internet and Berkeley recognizing its shame of authorship has repealed R-1 zoning. Perhaps most [unintelligible], Castilleja was established before any of this awful R-1 discrimination engine was even invented. I urge the Planning Commission to not permit itself to be used as a tool for the explicit demonstration goal that is a whole foundation of R-1 zoning.

We simply have had enough delay in the approval [unintelligible] of these plans. It would help enormously if you would just insist on the goal post stop moving, which they have for years, echoing the comments of Barbara Gross. What we don’t have enough of are women in high tech, women in medicine, women in research labs, and women in engineering. Girl schools like Castilleja are critical to change net and to bring women into the STEM field and leadership roles.

Please support this project. The footprint will get smaller. The car trips will remain the same. I don’t think I could improve on the comments of Nanci Kauffman, so I will just join her and ask you to support these plans in a way that provides a potential for girls and young women in the Bay Area to multiply meaningfully for generation to come. Thank you very much for your attention.

Ms. Klicheva: Thank you. Our next speaker is Roy Maydan.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Mr. Roy Maydan: Ready?

Ms. Klicheva: Yeah, we are ready. Thank you.

Mr. Maydan: Thank you. Hi, good evening, my name is Roy Maydan and I've been a resident in Downtown North for more than 25-years. And I’m very grateful for the attention that Commissioners that you’ve given to this project. Also, I’m someone who wants to see City leaders make the decisions that will positively impact our property values, quality of life in our community. I especially appreciate that you have already supported the merits of this proposal. Therefore, I’m disappointed to once again to be speaking to you at yet another hearing on the project as this does seem to deny all the work that you have put into this in the past. Now the good news is that you did act with clarity and conviction in the past and I’m sure that the improvements that the school has come back and proposed will only increase your desire to see this project become a reality.

Your previous review of this project solidified what the date in the EIR approved. That the garage will not bring more car trips to the neighborhood and you just need to determine how many parking spots should go below ground and how many should remain on the surface.

While I support a proposal keeping as many cars off the street as possible while preserving the trees. I trust your leadership as you make that decision. However, please keep in mind that the Staff report estimates that Option E will result in a shortage of parking spaces. Most of all, it’s important for leaders to be able to decide then act in this decisions. You’ve decided once and this review further defines the plans you have already supported. Now I hope you will make the choice and urge the City Council to act favorably. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Stewart Raphael.

Mr. Stewart Raphael: Can you hear me okay?

Ms. Klicheva: Yes.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Mr. Raphael: Great. Good evening Commissioners and Committee Members. My name is Stewart Raphael and I’m a Palo Alto resident for 9-years. When I spoke to you last October, I spoke about the need of increasing enrollment at Castilleja and also about power of an all-girls education. And also, the effectiveness of the school’s TDM program in mitigating any impacts from the enrollment increase. At that time, I couldn’t believe that now we’d still be debating this topic a year later. So, I’d like to take this opportunity to restated the results of Castilleja’s aggressive TDM program.

The school has reduced traffic in the neighborhood by around 30 percent thanks to requirements placed on employees and students. Their proposed CUP adds additional TDM measures to further mitigate traffic in the neighborhood. Examples include guaranteed emergency rides homes for employees who don’t drive, new bus and shuttle routes, and an internal Castilleja lift service. Castilleja is really demonstrating their commitment to TDM and the school has added new bus routes from San Mateo, from Burlingame, and Woodside when students from those communities did not want to take the train due to the pandemic.

And I might also point out, that the underground garage is not going to bring additional cars to the neighborhood because our trips to the neighborhood are capped. And please remember that the Environmental Impact Report showed there to be no negative impact on traffic with the new garage as long as drop off and pick up was distributed around the campus.

So, I asked you then, a year ago now, and I ask you now. Please recommend approval for this project, so that the opportunity could be expanded and the campus can be modernized with no negative impact to the community. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Tony Hughes.

Mr. Hughes: Great, hey thanks. My name is Tony Hughes and I’ve lived in Palo Alto for 65-years. I think this should kind of be a slam dunk. I mean you approved this proposal before and the project has been improved since then. You’ve now reviewed this project more than any other
project that I can think of and I remember the expansion of Oregon from a two-lane road to a four-lane expressway just to give you a little perspective there. So, the big question I keep asking myself is why are we still having these meetings? This is the third time that I’ve spoken on behalf of the project and I’ll speak a fourth and a fifth and sixth time if that’s what it takes.

I mean this is a small school with capped traffic looking to increase the student body by a small amount. The other schools that have split campuses have added new divisions or grown significantly. This is still going to be a 6th through 12th-grade school and they want to add 25 to 27 students a year as long as traffic does not increase. Repeating that, as long as traffic does not increase. So, once again, in my mind the salient details, it’s a small school, we’re talking about a modest increase in students contingent upon no new traffic.

So, I’m still asking the question, why this resistance? I mean when I went to Pally, there were 800 students. Today there are over 2,000 students. The gym at Pally has grown from 40,000-square feet to 91,000-square feet. The performing art center has grown from 12,000-square feet to 25,000-square feet. The football field has lights and there’s night activities there as well. If you’re still trying to figure out why there’s more traffic and parking challenges in this area. I have two more clues for you. Town and Country and Stanford.

With five different choices for underground parking and two different choices for deliveries in the location of the school. Less above ground square footage, more trees preserved. I’m confused, what’s the problem? In my eyes and in the eyes of many, many Palo Altans, there’s no problem here at all. This project should be approved for the second time by you and for the last time by the City Council. This is not an expansion, it’s a project with no significant impacts, and as I said at the outset. This seems like it should be a slam dunk. Thanks very much. Thanks for your good work and I’m finished.

Ms. Klicheva: Thank you. Our next speaker is Vania Fang.

Ms. Vania Fang: Hi, can you hear me?

Ms. Klicheva: Yes.
Ms. Fang: Good evening. Thank you, Commissioners, for the opportunity to speak. I’m Vania Fang and I live across the street from Castilleja on Kellogg Street. I cannot wait for this project to be approved. I want to look out the windows onto an updated campus with more trees and green space. The various garage plans which we have seen today will remove parking from our neighborhood streets to below ground and whichever plan you chose will also reroute some pickup and drop off below ground. All of this will improve conditions in the neighborhood and enhance the value of the homes in the nearby area.

As you all know, Castilleja is highly sought after school. I know many people move to Palo Alto because of our outstanding schools and Castilleja is among them. I truly appreciate the years of work that Castilleja has put into listening to neighbors questions and concerns. Now I hope you will listen to my concerns. I am counting on you to approve this project once and for all. You have sent it forward to the City Council with your endorsement before. With these improvements, it should be easy to do so again. Please urge the City Council Members to do as they have been entrusted to do. To follow your informed and careful guidance to approve this project.

During this long process, the school has willingly met every change requested by City Council and City Staff as the goalposts kept moving. This has now resulted in additional alternatives for you to review on their [unintelligible]. I trust you to find the best among these plans and to help bring this long chapter to a close. Please continue to urge the City Council to support this proposal. Thank you very much.

Ms. Klicheva: Thank you. Our next speaker is Yair Blumenfeld.

Mr. Yair Blumenfeld: Thank you for the opportunity to speak and thank you for staying up so late. I’m actually going to modify what I originally planned to say. Given that I honestly don’t have too much to add to the individuals who spoke so eloquently and really thoughtfully on behalf of the proposal. The proposal before you is clearly sound, it’s environmentally superb, and Castilleja has committed to not only keeping traffic at its current levels. But improving traffic over time and they’ve clearly done that over the last couple of years.

I’ve been here for about 12-years as... in Palo Alto with our family. We have two daughters, one at Castilleja, one in Pally, and honestly, I’m not aware of any other school or organization for
that matter in all of Palo Alto that has committed to improving traffic over this period of time. Or that has taken the environmental aspects of their remodel to this extent. So, I’ll just add my voice to the overwhelming support on behalf of the proposal and clearly all of us on this meeting and who’ve spoken before really hope that you recommend this project for approval.

Ms. Klicheva: Thank you. Our next speaker is Carolina Abbassi. I see that she left the meeting so I will move on to Rob Levitsky.

Mr. Rob Levitsky: Hello. I want to start off by saying I’m not the member of any prestigious board but I am a 65-year resident of Palo Alto and the only neighbor whose property actually adjoins Castilleja School. As of last at the ARB meeting, it became clear that the Planning Staff were pushing scheme E of the underground garage. Finally accepting that protected trees need to be left alone. 5 ½-years it took to get the Planning Staff to follow the Tree Ordinance. So, don’t blame the neighbors for asking the zoning rules be followed. It took about 4-years to protect the houses at 1235 and 1263 Emerson that Castilleja wanted to just demolish. We prevailed on the Planning Staff to follow the rules for merging lots that disallow merged lots to exceed 10,000-square feet.

Similarly, we had to prevail with the City Council in March so they provoke the idea that an underground parking garage was a basement. A concept that the planning was selling. That took 4 ½-years. These delays were caused by bad design and incorrect zoning interpretations. Castilleja and planning are still playing games with square footage allowed and a Variance for lot coverage.

You see, Castilleja is zoned R-1, yet they and planning are trying to plan the rules again. They claim they’re R-1 zoning when it comes to not counting square footage. Some 20 below grade classrooms with no windows, but then they claim a hardship that R-1 zoning allows only 30 percent lot coverage and they’re close to 50 percent. Way over the zoning limits. Sorry, Castilleja, you can’t have it both ways and no Variance should be considered.

And back to the underground garage which David Hersh of the ARB called functionless last week. It also depends on a Variance of sorts as the current designs depend on several permanent encroachments into the Melville Avenue public utility easement. Including a tunnel under the 8-inch Melville sewer line to walk from the garage to the campus. Again, tunnel

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
under the sewer. David Hersh called that one out as well. What is the status of the encroachment permits that would need to be approved by the City Manager to do this? The fact is, the garage is unnecessary and should be removed from the proposed design. There are plenty of surface parking spaces as the school was operating before with 448 students with no parking issues. We don’t need a CO2-belching industrial concrete garage in our neighborhood. If Castilleja really wants 500 to 600 students, it’s time to move or open another campus like so many others do. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Deborah Goldeen.

Ms. Deborah Goldeen: Good evening, Commissioners. My name is Deborah Goldeen. I am a 58-year resident of the City of Palo Alto, a 4th generation Bay Area. In such capacity, I feel I have an exceptional breadth and depth of understanding of what this City needs and what this area needs. And Castilleja is an incredibly important part of the value of this community and we desire... they desire support. Not our obstruction. You know what this reminds me of? Is Bleak House. You know, this is... it started out with some reasonable ideas but it’s gotten to the point where it’s just Jarndyce versus Jarndyce. You know this is not about parking space and dewatering and saving heritage oaks. This is just obstructionism, that’s all it is. The City would hold its residences to this standard? Oh my gosh, how amazing would that be? No, they don’t. They don’t care how big garage... underground basements people build and they don’t expect residents to be net-zero in their carbon emissions. They don’t... you know they don’t protect their heritage trees. Heck, the one on Webster that was 400-years old, the live oak just came down because of someone had to have their dream home built. You know I... it’s a... it’s just a pusillanimous City Council and Commissioners who allow this to proceed as if this is good government. And it’s not, it’s ridiculous.

I just... you know in my perfect world, what I would love to see happen is I would love to see Stanford University lease a huge track of land to Castilleja for a dollar a year just like it leases land to the City of Palo Alto for Paly and Gunn. And then Castilleja could sell its Kellogg and Bryant Street property. And it can be sold to developers and then because there is no more R-1 zoning which surprises me why anybody is using that as an argument anymore because [unintelligible], SB 9, and SB 10 passed. You know that property would be all condos and those few obstructionist, stubborn, self-people who are holding on tooth and nail to keep this development from happening would get what they deserve. Fine, you know you want to lose

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
this wonderful asset in the community and have condos in your backyard? Go for it. Just do that.

Anyway, obviously, I think that the Commission should proceed with approval as is with the parking garage. I for one would very much like Palo Alto to stop being an embarrassment in the world and I think this is a good place to start. Thank you.

Ms. Klicheva: Thank you. Our next speaker is Jeff Levinsky.

Mr. Jeff Levinsky: Good evening, Commissioners, Staff, and everyone still awake. I’m very glad that the Council adopted the position that Castilleja’s underground garage is floor area. Council is now asking you to consider whether to recommend exempting that garage from floor area. As you work that through, here are five things to consider.

One, as a number of speakers pointed out tonight, the proposed ordinance isn’t needed because Castilleja already has more than their required surface parking. That is with a 20 percent TDM, Castilleja needs only 83 spaces, but they currently have 89 above ground. They confirmed tonight that they’re even reducing their footprint so they should have more than enough room for 83 spaces with no garage.

Two, the proposed ordinance would give Castilleja exemptions from floor area that no [note – audio cut out]

Chair Hechtman: Will you pause the (interrupted)

Ms. Tanner: Yeah, let’s pause the time. Mr. Levinsky, we can’t hear you. If you can hear us, Mr. Levinsky, we cannot hear you. I think we should go to the next caller and see if we can get him back on.

Chair Hechtman: Great.

Ms. Klicheva: Our next speaker is a caller with the last digits 002 and to unmute yourself it is *6. Perfect, [unintelligible](interrupted)

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Mr. Terry Holzemer: Can you hear me now?

Ms. Klicheva: Yes, we can.

Mr. Holzemer: My name is Terry Holzemer, I’m a Palo Alto resident, I’ve been here over 28-years, and have been an educator in this area for over 20-years. To be very brief, I’d like to mention three quick areas that I hope the Commissioners will consider in their deliberations.

First of all, that this physical expansion of the school has never been about women’s education or its wonderful merits. Having been an educator for a very long time, I appreciate and push for women’s education every day. However, no one in this neighborhood or in the neighborhood around Castilleja has argued against the school’s needs to rebuild or remodel its campus. However, they have requested a reasonable expansion that fits in with their existing neighborhood like all neighborhoods in Palo Alto. It’s time to stop demonizing the neighbors. Stop calling them racist, stop calling them all kinds of names that have been described tonight, and it’s time to realize that neighbors want the same thing everybody else wants. They want a reasonable, quiet residential neighborhood.

I think a small increase to 450 students seems reasonable, given a period of time, of course, to see how it works out. And again, no garage as those reports earlier have been described, those reports earlier, an underground garage is not necessary, and that’s been clearly reported even to the school.

Number two, very quickly, the importance of fairness and total transparency. For example, why should Castilleja get exceptional treatment to not having to count for Gross Floor Area that already exceeds the current Code? I don’t think that this is fair and I think that this also has to be examined by the Commissioners.

And finally, precedence, will all non-profit schools and churches in R-1 zones and there are many, be allowed the extra floor space? Will underground garages be allowed and not without counting the square footage of course? There’s already a stream of cars going into the neighborhood. I know this, I’ve observed it, and with an increase of more than 1/3 of those cars on a daily basis. How this will impact the neighbors?

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
And finally, I’ll mention the events, 50 and 70 events a year sounds like a lot if you don’t live in that neighborhood. But if you do, any neighborhood, that’s a heck of a lot of events. Activities that I hope the school would either reconsider lowering or compromising to reduce this number over a period of years. Thank you very much and please, do not demonize the neighbors.

Ms. Klicheva: Thank you and we are coming back to Jeff Levinsky. Jeff... Mr. Levinsky, you should be able to unmute yourself and share your comments with us. I see that you are staying muted.

Ms. Tanner: Mr. Levinsky, on your side you have to unmute yourself I believe. We still see that you’re muted.

Ms. Klicheva: Maybe I should show a slide with phone number. So, that maybe Mr. Levinsky could call in instead.

Ms. Tanner: Yeah, if he would like to call in, we could do that, or if he wants to submit his comments in writing. You can go ahead and show the slide if you’d like to Madina. Mr. Levinsky, if you can hear us if you want to use the phone number to call in. 1-669-900-6833 and then the Zoom meeting ID for this meeting is 916 4155 9499. And we’ll just give a moment to see if you’re able to call in and if not, we will encourage you to write to the Planning Commission and submit your comments in writing. I did see him disappear but I’m not sure that I see another number yet appearing.

Chair Hechtman: Alright, I’m going to move us on now. Mr. Levinsky, sorry you had technical difficulties, but as Ms. Tanner said, to the extent you weren’t able to present your full comments, please send us an email which we will certainly consider. And that goes for the couple of other people who had some technical difficulties tonight. Ms. Fleming and I think somebody with three initials. Please email us with your concerns and comments. So, that was our last public commenter so now I want to bring it back to the applicant for rebuttal comments of up to 5-minutes. And then just to preview my thinking, and after the rebuttal, I want to query the Commission on this, but it’s 11:30. My intention or suggestion is that normally... the next steps we would normally have after rebuttal is to ask questions of the applicant. I propose that we proposed... that we pause this item after the rebuttal, before the

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
questions which I think maybe lengthy, continue this item to our meeting next Wednesday. To
ask those questions of the applicant and complete the public comment portion and do our
deliberation and direction to Council. So, that would be my strategy.

So, before I ask for your thoughts on what to do after rebuttal, let’s hear the rebuttal. Ms.
Romanowsky, are you going to start that off?

Ms. Romanowsky: Yes, thank you. Thank you for the opportunity to speak. My name is Mindie
Romanowsky, I am land use counsel for Castilleja School. First, I wanted to touch on something
that you were asking about earlier in the evening. While the City Council discussed the idea of a
Text Amendment at their March 15th hearing. I do want to emphasize what was said earlier
which is that the City Council refined their motion when they adopted the final motion on
March 29th. And if you look at the language of the March 29th motion, it did not require a Text
Amendment to effectuate the Council’s underground parking goals. So, because a Text
Amendment was not included in that final motion. I just want to state for the record that
there’s no Council mandate, nor legal requirement that the Planning Commission consider or
even recommend the Text Amendment that was drafted for you to consider. You can still
achieve the City Council’s direction by recommending a parking option without a Text
Amendment because your Comprehensive Plan prioritizes underground parking. The Municipal
Code has a pathway for supporting underground parking for non-residential uses, which of
course the school is, and there is relevant precedent as I have discussed in previous meetings.

So, tonight we really were hoping to get your feedback on the parking schemes and do hope
that you continue this meeting to next week. So, that you can really pick up the... this
information that you hear tonight can be fresh, top of mind, and we can get your feedback.
Because we really are hoping that you can make a clear recommendation to the Council and
meet their mandate.

If you do choose to consider the Text Amendment, we request respectfully that you preserve
the ability to park more than 50 percent of cars below grade in a way that does not necessarily
trigger a scenario where the entire parking garage would count towards FAR. If we are able to
provide an efficient parking solution. This could be accomplished, for example, if the size of the
garage remains unchanged, the trees are preserved, but efficient parking is utilized like tandem
parking for example. This could be a way to put more cars below grade, not have any new

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
of speakers.
construction impacts or tree impacts and it would minimize any parking adjustment that is
needed. It’s a very elegant solution. For this reason, Scenario D is something that we would
strongly ask you to consider just as the ARB was also in favor of.

Next, a couple of things I’d like to clarify that we heard this evening for the record. First, there
were a number of claims that I heard about the amount of concrete, the amount of
underground construction, groundwater questions. All of these claims were unfounded frankly,
due respect, but the requisite data and the analysis of these issues were analyzed by expert
third-party professionals complying with legal requirements of CEQA. And they are included in
the EIR for the record which is ripe for review. Long past the time where it should have been
certified and so, I would employer not only the Commissioners if you’re curious but members of
the public to take a look at those. And if you have questions for the various consultants, I’m
sure they can be consulted.

Next, with regard to the square footage and the Variance request. I know that’s not on the
table tonight, but I do want to just say that Ms. French did present those raw numbers in her
report tonight, and also those reports were done by the outside third-party consultant Dudek.
Those were linked to the report, which just for the record all of the reports have been produced
over the last 8-months, were linked, or are uploaded. So, I just want to clarify that because
there were some comments that those have not been provided. And just to be clear, the
analysis that was done does show that the above grade FAR will be less than what is on campus
if and when we are approved and built. Even if you take that second-floor equivalency into
account.

Finally, I would like to put a slide back up on the screen that… actually, can I share my screen?
Do you mind stopping the time for a minute? I’d like to put a slide up that illustrates how
essentially parking… the interplay between parking, enrollment, and TDM all sort of work
together. And if you would allow me to share my screen, is that possible?

Ms. Klicheva: Yes.

Ms. Tanner: Just give us a moment.

Ms. Romanowski: Okay, thank you.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
   the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
   provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
   of speakers.
Ms. Tanner: Do you have the icon at the bottom of your screen?

Ms. Romanowski: Yes, thank you. It seems to let me, so can you see my screen here? So, Fehr and Peers was commissioned. The City asked us to have Fehr and Peers do a parking study that would show based upon what we have on campus and what is adjacent to campus for each one of the parking options. And since the ARB seems to be focused on D and E and Staff is focused on E and these are the examples that I think are worthy of sharing. Which is to say that look at the proposed on-site spaces for our two options. Option D has 95 and then of course the frontage around the campus of the school only along our side of the campus is 54. Option D, there’s 149 spaces available, and Option E there’s 143 spaces available. At the peak parking demand, and this is in the Fehr and Peers report, there is a shortage of 19 spaces for Option D and 25 spaces for Option E. But this is when there is absolutely no TDM measures in place. Of course, we know this project needs to implement TDM. There’s no way to grow enrollment if we can’t cap our trips and the beauty and the sort of elegance of the TDM program is that when you introduce these measures. And this is just an example of some of the things that we can choose... that we already do frankly and that we will continue to do. When you have these measures, you know new school bus route, if there’s 10 TDM users. That’s 10 parking spaces that are not required and as you go down this list you can see not only are you reducing trips but you are reducing parking demand. And so, for example with these modes, we could get a reduction of 27 spaces which of course covers this maximum shortfall here of 25. The Staff report mentioned Option B where there was a shortfall of 30 spaces. Option B seems to be less interesting to both the ARB and Staff. So, I apologize for going a bit over. I want to thank you for your time, all the thoughtful comments this evening, the long meetings on this project. We really appreciate the feedback and we look forward to yours and hope that this is continued to next week. And I will stop sharing.

Chair Hechtman: Thank you, Ms. Romanowski. So, I’m going to... I want to bring it back to the Commission before asking questions of the applicant to get a reaction to my suggested way forward tonight at 11:37. Does anyone have a different idea they would like to propose? Mr.... Commissioner Lauing, your hand is up first.

Commissioner Lauing: Yes, I have a question and just a broader one is what else do we have to cover as always? It look like we’re going to be pretty full next week as well and we basically only

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
took public comment tonight and some questions. So, I’m just on the fly here trying to calculate how many more hours in one or two meetings we’re going to need to go through all of the things that we’ve been asked to look at. So, it... I don’t know how urgent wireless is and Channing for the fifth time but you guys have to plan that in as well. So, just a broader question of how’s this stake up for next week as opposed other things that have to get done?

Ms. Tanner: if I may, I would offer that we would move the wireless item to January. I think it’s important to probably take this up as close to being fresh in your minds as we can. I would like to see if we could keep the Channing item because we did hear most of that and it’s been delayed a couple times. Once due to our error, well twice in some ways, but that canceled meeting that we had. But hopefully, that would be somewhat brief, but we would probably just have the two items. I don’t think we could do... certainly couldn’t do wireless and this item on the same evening.

Chair Hechtman: Commissioner Alcheck.

Commissioner Alcheck: I was going to suggest that I support your suggestion. I think moving to December 15th is a wise and respectful choice.

Chair Hechtman: Does anyone else have additional comments or would someone...

Commissioner Summa: Hi, thanks. I can’t remember right now but weren’t there a couple things that Staff eluded to in the Staff report that they didn’t have ready for us for this meeting or least one report? I’m trying to remember. Would they be... whatever that was, it was missing and I honestly at this time of night can’t remember what it was.

Ms. Tanner: It’s okay. Ms. French, do you... are there items that you think you were planning to prepare for the next hearing, or maybe that might a future hearing?

Commissioner Summa: I think one was a comparison of other school events I think maybe. Would those be ready?

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Tanner: Well, I think part of what we would want to do next week is... well, what I might suggest would be to not introduce new information and so if this truly is a continued hearing. We would really just pick up with... you know we might reprint the Staff report for ease of access to the public but it wouldn’t be any additional information at this time come forward.

Commissioner Summa: Okay and for summary and Commissioner Lauing asked that question at the beginning of the meeting where there was going to be different information the next... continued meeting. Maybe I’m remembering incorrectly. Thank you.

Ms. Tanner: And on that note, I might suggest if there is a motion it might be helpful for the public to know if there will be public comment at the next one or you know, just to be clear for everybody.

Chair Hechtman: Right so before there is a motion (interrupted)

Commissioner Summa: [unintelligible] get to speak tonight, shouldn’t they be able to speak at the continued one? We’ve had discussions like this before but it only seems fair to me.

Chair Hechtman: So, let me clarify the intention. We are... we’ve been presented with information by Staff and the public tonight had a full opportunity to comment on that. The next step in this process is for us to discuss the items that Staff wants discussed and give them direction. And so, and I’m anticipating that’s going to happen, depending on the motion here, on December 15th. And during that dialog would be just like we continued to talk right now until 2:30 in the morning to give our direction to Staff. There would not be another opportunity for the public to comment on December 15th. But what happens after December 15th is Staff is going to take this direction and go away and refine a variety of items and bring that back to us. And when they do bring it back to us, what they bring back to us is going to be a lot of new information and we will have another round of public comment.

Commissioner Summa: Okay.

Chair Hechtman: Alright, Commissioner Chang.
Commissioner Chang: If we continued next week, would we be able to ask question of the applicant at that point? Right so just to pick up exactly... is your intent that we would pick up exactly the same process that we would have used if we continue on and the applicant would be able to come back and answer those questions.

Chair Hechtman: Yes, exactly right. It’s as though we continued tonight. So, that would be the first order of business and I was heartened to hear Ms. Romanowsky indicate that the applicant is supportive of coming back next week. That tells me that they will be ready with their full complement of consultants to answer our questions. So, that would be the first order of business.

Commissioner Chang: I hope that all... I hope all the speakers who spoke... presented will be here because that would be helpful.

Chair Hechtman: [unintelligible – no audio] behalf of the applicant you meant?

Commissioner Chang: Yes, on behalf... right because we heard from four different people I think from the applicant and I think it would be helpful to hear from them.

Chair Hechtman: [unintelligible – no audio] I know that they’re listening and I expect that they will make that happen. Other Commissioner comments? If not, would somebody make a motion and keep in mind Ms. Tanner’s suggestion as to referencing public comment in that motion. Commissioner Lauing.

Commissioner Lauing: Just one quick question. Is Council having a meeting after next week? The reason I ask is because it may be that whatever we work on next week still won’t get to Council until the second week of January. Whether or not that’s material, I have no idea but I just... I didn’t know if you were trying to create a timeline to get something to Council fast.

Ms. Tanner: No, I think it's mainly just to pick up as close to the conclusion of this hearing as possible. We wouldn’t be able to get to Council for some time even if they had... they aren’t meeting incidentally after next Monday. But even if they were, we would need at least 30-days, if not more, to get the Staff report through our process to them.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
1. **Commissioner Lauing:** Okay, fine.

2. **Chair Hechtman:** Just to clarify that, even if we did just stay here tonight and finish this, the result of that is not you take the... Staff taking information to Council. It’s Staff bringing information back to us. Isn’t that the next step or are you going to Council before you come back to us?

3. **Ms. Tanner:** I don’t think that’s our intention and additionally, the ARB still has work to do. So, I think we’ve got this body and the ARB has quite a bit of work I think before Council. So, I think my only point was is Council is not the deciding factor for the continuance.

4. **Chair Hechtman:** Commissioner Alcheck.

5. **MOTION**

6. **Commissioner Alcheck:** I’ll make a motion that we continue this item until December 15th, at our next meeting which is a special meeting. At such time, where we will pick up exactly where we left off with the close of public comment and at the start of our Planning Commissioner opportunity to ask questions of the applicant and its representatives. And then deliberate amongst ourselves in an effort to give direction to our Planning Department so they may come back with some fleshed-out options for this body to then recommend to City Council at a date uncertain. That’s how it’s done.

7. **Chair Hechtman:** Thank you. Do we have a second for that motion?

8. **SECOND**

9. **Commissioner Lauing:** I’ll second it.

10. **Chair Hechtman:** Thank you, Commissioner Lauing for the second. Any discussion? Commissioner Summa. Oh, no. Commissioner Alcheck, your hand is still up. I’m assuming that you don’t want to... do you want to speak to your motion?

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Commissioner Alcheck: Yeah, I think your... the wisdom tonight is that this is fresh and I think it’s prudent that the process... the ball be kept rolling as opposed to pause considering the context. So, I’m glad that you made that suggestion at the beginning of this discussion.

VOTE

Chair Hechtman: Alright Ms. Klicheva, can we have a roll call vote, please?

Ms. Klicheva: Commissioner Alcheck?

Commissioner Alcheck: Aye.

Ms. Klicheva: Commissioner Chang?

Commissioner Chang: Yes.

Ms. Klicheva: Chair Hechtman?

Chair Hechtman: Yes.

Ms. Klicheva: Commissioner Lauing?

Commissioner Lauing: Yes.

Ms. Klicheva: Vice-Chair Roohparvar?

Vice-Chair Roohparvar: Yes.

Ms. Klicheva: Commissioner Summa?

Commissioner Summa: Yes.

Ms. Klicheva: Commissioner Templeton?

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Chair Hechtman: Commissioner Templeton departed toward the end of the public speakers. So, she will reconstitute herself before the December 15th meeting.

Ms. Klicheva: Okay, the motion carries 6-0.

MOTION PASSED 6(Ayes: Alcheck, Chang, Lauing, Hechtman, Summa, Roohparvar) – 0 – with Commissioner Templeton absent

Chair Hechtman: Alright, thank you. Thank you to all of the members of the public who spoke and who stayed and I’m particularly appreciative of six groups putting together cohesive points of view on items in groups of five. That’s actually the most I’ve ever seen and I think it’s very effective tool and I’m glad to see so many people using it. So, and we will see all of you and those who have already gone to bed I hope a week from today. Well, it’s still today for a few more minutes. So, let… I’d like to move us now to approval of minutes.

Commission Action: Motion by Alcheck, seconded by Lauing. Pass 6-0 (Templeton absent)

Approval of Minutes

Public Comment is Permitted. Five (5) minutes per speaker.1,2

5. October 13, 2021 Draft PTC Meeting Minutes

Chair Hechtman: We have two sets of minutes. October 13th as revised and October 27th as revised. I think we take those serially. Can I have a motion on the October 13th minutes?

MOTION

Commissioner Alcheck: So, moved.

Chair Hechtman: Thank you, Commissioner Alcheck. A second, please? Please.

SECOND

Vice-Chair Roohparvar: Second.

VOTE

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Chair Hechtman: Thank you, Vice-Chair Roohparvar. A roll call vote, please?

Ms. Madina Klicheva, Administrative Assistant: Commissioner Alcheck?

Commissioner Alcheck: Aye.

Ms. Klicheva: Commissioner Chang?

Commissioner Chang: Yes.

Ms. Klicheva: Chair Hechtman?

Chair Hechtman: Yes.

Ms. Klicheva: Commissioner Lauing? Commissioner Lauing?

Chair Hechtman: You’re muted.

Commissioner Lauing: Yes.

Ms. Klicheva: Vice-Chair Roohparvar?

Vice-Chair Roohparvar: Yes.

Ms. Klicheva: Commissioner Summa?

Commissioner Summa: I believe I will abstain. I know I missed the 27th and I think it’s likely the
13th was the other meeting I missed.

Ms. Tanner: Thank you and did we get all the Commissioners Ms. Klicheva?

Chair Hechtman: Commissioner Templeton being absent.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Tanner: Right, okay great, and so then I think it would be the next set.

MOTION PASSED 5(Alcheck, Chang, Lauing, Hechtman, Roohparvar) – 0 - 1(Summa abstain) with Commissioner Templeton absent

Commission Action: Motion by Alcheck, seconded by Roohparvar. Pass 5-0-1 (Summa abstain and Templeton absent)

6. October 27, 2021 Draft PTC Meeting Minutes

Chair Hechtman: Yes, motion on the October 27th minutes that (interrupted)

MOTION

Commissioner Alcheck: So, moved.

Chair Hechtman: Is that you Commissioner Alcheck? Thank you. A second, please.

SECOND

Chair Hechtman: Commissioner Lauing second.

VOTE

Chair Hechtman: Roll call vote. Ms. Klicheva are you there?

Ms. Tanner: You’re muted if you’re talking.

Ms. Madina Klicheva, Administrative Assistant: Oh sorry, yes, thank you so much. Commissioner Alcheck?

Commissioner Alcheck: Aye.

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
Ms. Klicheva: Commissioner Chang?

Commissioner Chang: Yes.

Ms. Klicheva: Chair Hechtman?

Chair Hechtman: Yes.

Ms. Klicheva: Commissioner Lauing?

Commissioner Lauing: Yes.

Ms. Klicheva: Vice-Chair Roohparvar?

Vice-Chair Roohparvar: Yes.

Ms. Klicheva: Commissioner Summa?

Commissioner Summa: Abstain.

Ms. Klicheva: Commissioner Templeton is absent. Motion carries 5-1 with Commissioner Templeton absent.

MOTION PASSED 5(Alcheck, Chang, Lauing, Hechtman, Summa, Roohparvar) -0 -1(Summa abstain) -1(Templeton absent)

Chair Hechtman: [unintelligible – no audio] to Committee items.

Commission Action: Motion by Alcheck, seconded by Lauing. Pass 5-0-1 (Summa abstain and Templeton absent)
Committee Items

Chair Hechtman: Commissioners, are there any Committee items? Then we will move to Commissioner questions, comments, announcements or future agenda items.

Commissioner Questions, Comments or Announcements

Chair Hechtman: Commissioner Summa.

Commissioner Summa: Thank you. I have a question for I guess Assistant Director Tanner. I was curious... the meeting that I missed on October 27th had a discussion of electrification issues and I was just curious what the timeline for that coming back to us? And whether each issue would come as its own separate thing or if all the items would be brought together again?

Ms. Rachael Tanner, Assistant Director: That’s a great question. I... to be honest, I’m not sure the exact timeline. I think we’ll probably bring the first item in the first part of next year like first quarter, but they would come back separately. And it was kind of an overview of the items together kind of topically related and then they would come back probably separately because they’re... well, maybe some of them might be grouped together but they’d... some of these are pretty different from one another.

Commissioner Summa: Okay, in the first quarter probably?

Ms. Tanner: Yeah, we’d like to get started soon so.

Commissioner Summa: Thank you.

Chair Hechtman: Commissioner Alcheck.

Commissioner Alcheck: The emergency ordinance that was passed this week is responsive to SB 9. I’m curious to know when that... what is that going to be reviewed by the PTC at some point and when do you anticipate that? And also, how was that... I’m just curious how the process for that recommendation or Staff led discussion came about?

Ms. Tanner: So, just procedurally we didn’t have time to... we didn’t... we barely had time to draft the urgency ordinance honestly and the Objective Standards. So, due to the time that the

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
law passed and the time that it goes into effect and so part of the urgency is that it goes into
effect immediately. So, that goes into effect immediately on Monday and so it’s in effect on
January 1st. Otherwise, if it was just a regular ordinance, it would need two readings. The
second reading wouldn’t be able to happen until January and that would have already been the
time when SB 9 would be implemented and available. And so, then we would possibly have
some applications that would come and then we would have an ordinance that would pass and
that would change what’s allowed. And so, you’d have even just... you know, you can imagine
how that would be challenging to have a weeks’ worth of applications that have different rules
than all the other ones. So, that’s kind of the process there and what we would do is bring that
back to... not even just bring the existing ordinance back to the PTC because it’s got some good
stuff in it but again it was a rushed job. I think we did a really good job, but we really just
needed to get the bare minimum. And I think with the PTC and ARB will be able to be a little bit
more creative, more thoughtful, be more thorough in thinking about how do we want these
potential projects to be shaped in Palo Alto and that could... I think it’s a pretty exciting
opportunity.

Commissioner Alcheck: Was the framework influenced by our discussion of Objective Standards
in your opinion?

Ms. Tanner: Well, certainly Objective Standards are part of what we spent the bulk of the time
on, but what we did there it’s a little bit different because we built that off of the IR. The
Individual Review Guidelines which are guidelines for two-story homes and the scale that you
were considering with Objective Standards was more for multi-family buildings. Kind of a
different scale and shape. So, similar in terms of the ARB and PTC started with our existing
guidelines and tried to adapt them. So, I think a similar framework but just the scale is a bit
different and so then the guidelines themselves I think are a little bit just different in character.
Because of the scale of the house that they’re trying to shape but similar idea.

Chair Hechtman: Alright, other Commissioners? Well then, I would like to share that this picture
behind me, I’ve got my head over to the side so you can maybe see it better. But probably not
large enough for you to see that this of course is the pedestrian and bike bridge near San
Antonio and in this photo, it’s filled with people. Dozens and dozens of people at the grand
opening which occurred on November 20th in the morning and in fact here... there, there’s the
ribbon cutting with our very own Mayor and Joe Simitian and numerous other dignitaries if that

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at
the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair,
provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number
of speakers.
is showing up. So, anyway, it was great and I was really surprised by the number of people that
were willing to stand in line for and then eat free ice cream at like 10:30 in the morning. It was
quite something, but anyway it’s a great addition to our biking and hiking fabric, and if you
haven’t been out to walk or bike across it, I encourage you to access the Baylands that way. It’s
really a wonderful addition to Palo Alto and I’m appreciative of all the work that went into it
from at the community level, at Staff level, and at the leadership on the Council to get it done.
Any other Commissioner (interrupted)

Commissioner Alcheck: Chair, I just want to… just… it’s a good little anecdote. I think it was in
2013 that this body that I was a part of voted to start a process by which a design competition
would be conducted for the design of this bridge. Ultimately none of the designs were chosen
but if it ever seems like I’m in a bit of a rush to put things through. It’s because the bike bridge
took 8-years to finish in Palo Alto. So, a little perspective that the City that is disrupting the
world as wonderful as this bridge is because it is. I’ve been there and even the smallest
crossings are challenging. So, it’s worth appreciating that I hope for all of you as you move
forward on your Commissionship find that projects that you participate in come to fruition
while you’re still breathing on the Commission.

Chair Hechtman: Thank you, Commissioner Alcheck. So, as the moon rises behind
Commissioner Lauing I will declare this meeting of the PTC adjourned. Good night everyone.

Adjournment

12:05 pm

---

1. The Chair may limit Oral Communications to 30 minutes for all combined speakers.
2. Spokespersons that are representing a group of five or more people who are identified as present at the meeting at the time of the spokesperson’s presentation will be allowed up to ten (10) minutes at the discretion of the Chair, provided that the non-speaking members agree not to speak individually.
3. The Chair may reduce the allowed time to speak from five (5) to three (3) minutes to accommodate a larger number of speakers.
