The "Plan Update" will go to the City Council in the next couple months to award a contract. Following this, the project will officially kick-off.

This Plan Update will:
- Include robust community engagement
- Reevaluate previous plan progress
- Investigate safety data to propose impactful recommendations
- Explore e-Bikes and micro-mobility
- Establish plans to expand biking, walking, and other forms of non-motorized transit
- Support the City’s Sustainability and Climate Action Plan goals

Steady progress is being made, with several activities that need to take place before completion.

Later this week, sidewalks and surrounding area features at the El Camino Real and W Charleston/Arastradero Road intersection will be replaced.

Improvements at the El Camino Real intersection also include paving and striping.
