

About how many visitors do you get in a month?

Foothills Park gets about 140,000 visitors each year which equates to a 10 - 12,000 visitors each month.

Most people like to come to parks and go hiking, camping or picnicking when the weather is nice. Our busiest months are in the summer (for our purposes the summer season is from May until October) when we can have over a thousand people on a single weekend day. The summer holidays (Labor Day, Memorial Day and Fourth of July) are usually very busy also and we expect 1,000 or more people to visit.

In late October we host our annual Haunted Lake program which gets about 700 visitors each night.

As a side note, if we have over 1,000 people in Foothills Park at one time we have to close the park. Fortunately, at any given time people are entering and leaving the park and we have only had to hold people at the gate once.
