

# ***BAY AREA RECYCLED WATER***

**Commercial Truck Fill Facilities Location Guide**

**SEPTEMBER 2021**

## **Background**

This Guide was originally prepared in 2015 by Whitley Burchett & Associates under contract with the Bay Area Clean Water Agencies and under the direction of the BACWA Recycled Water Committee. The Guide was prepared in response to inquiries of commercial recycled water truck fill facilities in the Bay Area.

The Guide was updated in 2021 by BACWA staff with guidance from the Recycled Water Committee. It is the Recycled Water Committee's intention to update this Guide at regular intervals. If you see any information that should be updated, have a facility to add to this Guide, or have any questions please email [info@bacwa.org](mailto:info@bacwa.org).

## **Disclaimer**

The intent of this Guide is to provide prospective water haulers with general information regarding the location of Bay Area recycled water commercial truck fill facilities, permit requirements, and associated fees for recycled water. Information in this Guide represents data collected in August and September 2021. Please contact agencies directly for current information.

## Bay Area Commercial Recycled Water Truck Fill Facilities Location Map

\* Indicates the general location of a truck fill facility.

Each recycled water provider has restrictions on the geographic areas and types of sites where recycled water from truck fill stations can be applied. Check with your provider to learn where recycled water can be safely applied.

This summary is prepared from the December 2, 2000-adopted Title 22 Water Recycling Criteria and supersedes all earlier versions. Prepared by Bahman Sheikh and edited by EBMUD Office of Water Recycling, who acknowledge this is a summary and not the formal version of the regulations referenced above.

<sup>1</sup> Refer to the full text of the December 2, 2000 version of Title 22: California Code of Regulations, Chapter 3 Water Recycling Criteria. This chart is only an informal summary of the uses allowed in this version, with the exception of orchards and vineyards noted as "Not Allowed<sup>2</sup>" on page 1 and explained below.

<sup>2</sup> Per California Department of Public Health letter of January 8, 2003 to California Regional Water Quality Control Boards.

<sup>3</sup> Allowed with "conventional tertiary treatment." Additional monitoring for two years or more is necessary with direct filtration.

<sup>4</sup> Drift eliminators and/or biocides are required if public or employees can be exposed to mist.

<sup>5</sup> Refer to Groundwater Recharge Guidelines, available from the California Department of Public Health.
