

Save energy. Save money.

With a free energy efficiency system for your business.

Average Project Incentive: \$2,807

Average Annual Savings: \$670

The City of Palo Alto Utilities is partnering with GridPoint to help commercial customers automate energy and facility management. Using artificial intelligence, the GridPoint platform will learn your building's energy patterns and communicate via installed controls to help it be more efficient — saving you money, reducing your carbon footprint, and helping you meet your sustainability goals.

What You Can Get:

- Smart Thermostats
- GridPoint Controller
- Zone Temperature Sensors
- GridPoint Energy Manager
- MERV-13 Air Filters

Getting Started is Easy:

1. Pre-qualify your site in as little as five minutes at GridPoint.com/PaloAlto
2. Complete a virtual site inspection.
3. Schedule your free installation.
4. Access your GridPoint Energy Manager.
5. Start saving on your energy bills from day one!

Pre-qualify your site in as little as five minutes at GridPoint.com/PaloAlto or call **(408) 341-9786** to schedule a virtual site evaluation.

Energy Management on the Go.

GridPoint Energy Manager Mobile brings the same intuitive and data-rich experience that GridPoint customers enjoy on their computers to mobile devices.

GridPoint's smart building technology transforms the way businesses use energy. Our mobile app makes optimizing your building efficiency even easier.

- Collect energy, facility, and environmental data to understand what's going on inside your buildings.
- Automate the buildings to be most efficient using our advanced controls and patented algorithms.
- Deliver energy reports and allow users to check equipment health.
- Ensure maximum results with our experienced, 24/7 on-hand teams.

Pre-qualify your site in as little as five minutes at [GridPoint.com/PaloAlto](https://www.gridpoint.com/paloalto) or call **(408) 341-9786** to schedule a virtual site evaluation.
