

# The *worst* time to think about your water heater is when it stops working.

Do you know the age of your water heater? Most tank-style water heaters only last about **12 years**.

If you suspect your water heater is near the end of its useful life, you may be a good candidate for a **Heat Pump Water Heater (HPWH)**.

The **Home Efficiency Genie** can help look up the age of your water heater from the unit's serial number and offer project advice. Contact us at (650) 713-3411 or visit [efficiencygenie.com](http://efficiencygenie.com)

Not only are HPWHs one of the most efficient water heating technologies on the market, but yours will be powered by Palo Alto's **carbon neutral** electricity. As an added bonus, Palo Alto Utilities offers rebates up to **\$1500**.
