

PALO ALTO **FIBER** Connecting the Community Through Local Broadband

Market Research Survey

Through Palo Alto Fiber, the City would potentially provide high-speed, broadband internet services directly to your home or business.

Later this month, a unique survey link from Magellan Advisors, the City's Fiber project consultant, will be sent to your email inbox.

The COVID-19 pandemic has shown the immediate need of providing high-speed and reliable internet for our community to support work, education and learning, health care and delivery of government services. Through Palo Alto Fiber, the City would provide broadband, high-speed internet services directly to your home and business.

SERVICE EXCELLENCE

Fiber is the gold standard for fast, reliable internet, far outpacing DSL and cable. It is capable of carrying vast amounts of data over enormous distances and can support the symmetrical upload and download speeds, allowing for the seamless connectivity that is needed in today's digital world.

LOCALLY OWNED

Whereas large corporations are accountable to their shareholders, the Palo Alto Fiber network is accountable to our community, creating more responsiveness and local control.

QUALITY OF LIFE

Community broadband networks provide high-speed, reliable connections at affordable costs, providing connectivity to support work from home, distance learning and telehealth across the community.
